**Reasons**

- 1 The proposed site is formed by subdivision of the site of a dwelling in a rural area for which permission was granted under Reg. Ref. S97A/0281. The road frontage for the site of the proposed dwelling is approximately 35 metres and for the site remaining around the approved dwelling is approximately 50 metres. This constitutes undesirable ribbon development on a substandard road network and materially contravenes the policy set out in Paragraph 3.3.15(i) of the Dublin County Development Plan in which it is stated that in order to preserve the rural quality of the area road frontage should be at least 60 metres. As a result the proposed development would be contrary to the proper planning and development of the area. The proposed development would result in the existing approved development having inadequate site width.
- 2 The proposed development materially contravenes paragraph 2.3.6(a) of the Dublin County Development Plan, 1993 in that the submission does not include evidence that the applicant has established a genuine need to reside in close proximity to their employment where related to the rural community or reasons of close family ties with the rural community. As a result the proposed development would be contrary to the proper planning and development of the area.
- 3 The proposed development would constitute undesirable ribbon development in this area and would lead to a demand for the uneconomic provision of services and would set an undesirable precedent for further similar developments in the area.
