## Conditions and Reasons

- 1 The development to be carried out in its entirety in accordance with the plans, particulars and specifications lodged with the application as amended by additional information received on 28/03/2002, save as may be required by the other conditions attached hereto.  
REASON:  
To ensure that the development shall be in accordance with the permission and that effective control be maintained.
- 2 The residential and office elements of the Swanbrook Building shall be used solely in relation to the operation of the Religious Society of Friends in Ireland, and shall not be used for commercial purposes.  
REASON: In the interests of the proper planning and development of the area.
- 3 Prior to the commencement of development on site, the applicant shall submit the following to the Planning Authority for written agreement:  
(i) A scheme of tree felling and surgery works, based on the submitted tree survey by Southern Tree Surgeons.  
(ii) A detailed landscape plan with full works specification, including a bill of quantities, in accordance with South Dublin County Council's "Guidelines for Open Space Development and Taking in Charge" available from the Parks and Landscape Services Department.  
REASON: In the interests of visual amenity and the protection and preservation of trees on site.
- 4 The stone removed from the front boundary wall to provide for the entrance to the site shall be reused in the wing walls at the point of entry.  
REASON: In the interests of visual amenity.
- 5 The proposed stone cladding finish to the external walls of the building shall consist of natural stone.  
Reason: In the interest of visual amenity.
- 6 The applicant shall ensure that protective screening be erected, as per Drawing no. 3649.t02a submitted as additional information on 28/03/02, prior to the commencement of any development on site and that the screening shall remain in place until all works are completed.  
REASON: To protect and preserve trees on site.

E-Mail: [planning.dept@sdblincoco.ie](mailto:planning.dept@sdblincoco.ie)

- 7 That prior to commencement of development the requirements of the Chief Fire Officer be ascertained and strictly adhered to in the development.  
REASON:  
In the interest of safety and the avoidance of fire hazard.
- 8 That no advertising sign or structure be erected except those which are exempted development, without prior approval of Planning Authority or An Bord Pleanála on appeal.  
REASON:  
In the interest of the proper planning and development of the area.
- 9 The following requirements in relation to Environmental Health matters shall be satisfied.
  - (i) During demolition works on site, all necessary steps to contain dust arising from the demolition shall be taken so as to prevent a nuisance being carried to occupiers of other buildings in the locality. This shall include covering skips and slack-heaps, daily washing down of pavements or other public areas, use of water spray at demolition site to suppress dust and any other precautions necessary to prevent dust nuisances. During the demolition phase the proposed development shall comply with BS 6187 "Code of Practice for Demolition".
  - (ii) During the construction phase of the development, Best Practicable Means shall be employed to minimise air blown dust being emitted from the site. This shall include covering skips and slack-heaps, netting of scaffolding, daily washing down of pavements or other public areas, and any other precautions necessary to prevent dust nuisances. There must be compliance with British Standard B.S. 5228 "Noise Control on Construction and Open sites".
  - (ii) All rooms, passageways, sanitary accommodation and lobbies shall be ventilated to the external air.
  - (iii) Full consultation shall take place with the Environmental Health Department prior to the commencement of the development.
  - (iv) All mechanical plant and ventilation inlets and outlets should be sound insulated and / or fitted with sound attenuators as necessary to ensure that the noise level as expressed as Laeq over 15 minutes at 1 meter from the façade of any noise sensitive location does not exceed the background level by more than 10dB(A) for daytime and shall not exceed the background level for evening and night time.
  - (v) Any heavy construction equipment/machinery (to include pneumatic drills, construction vehicles, generators, etc) shall not be operated on or adjacent to the construction

site before 08.00 Hours on weekdays and 09.00 Hours on Saturdays nor after 18.00 Hours on weekdays and 13.00 Hours on Saturdays, nor at any time on Sundays, Bank Holidays.  
REASON: In the interest of public health.

- 10 The applicant shall satisfy the following requirements in relation to foul drainage.
- (i) The foul sewerage system for the development and the existing golf club system shall remain the responsibility of the applicant and golf club respectively.
  - (ii) All wastewater from kitchens shall be routed via an appropriate grease trap or grease removal system before being discharged to the public sewer. Full details of this system shall be submitted for approval prior to the commencement of development.
  - (iii) No buildings shall be erected within 5 metres of a public sewer or any sewer with the potential to be taken in charge.
  - (iv) The applicant shall ensure full and complete separation of foul and surface water systems.
  - (v) All pipes shall be laid with a minimum cover of 1.2m in roads, footpaths and driveways, and 0.9m in open space. Where it is not possible to achieve these minimum covers, pipes shall be bedded and surrounded in C20 concrete 150mm thick.
- REASON: In the interests of public health.

- 11 The applicant shall satisfy the following requirements in relation to surface water drainage.
- (i) As per the applicant's proposal, the surface water discharges from the site shall be attenuated by the provision of a 128m<sup>3</sup> underground storage tank, fitted with a hydrobrake flow control or similar, such that the maximum surface water discharge from the site shall not exceed 3 litres per second. The attenuation system shall be maintained and cleaned regularly by the applicant and kept free from siltation.
  - (ii) The surface water drainage system for the development and the existing golf club system shall remain the responsibility of the applicant and golf club respectively.
  - (iii) Surface water runoff from vehicle parking / marshalling areas shall be routed via a petrol/oil/diesel interceptor before discharging to the sewer
- REASON: In the interests of public health.

- 12 The applicant shall satisfy the following requirements in relation to water provision.
- (i) The water supply to the development shall be commercially metered to the satisfaction of the Water

Management Section of South Dublin County Council

(ii) Full 24hour water storage shall be provided.

(iii) The connection to and tapping of public watermains shall be carried out by South Dublin County Council personnel at the applicant's prior expense.

REASON: In the interests of public health.

- 13 That a Bond or Cash Lodgement of EUR 80,000 (eighty thousand euro) shall be lodged with the Planning Authority before development commences to ensure the protection of trees on the site and to repair any damage caused during the construction period.

REASON:

In the interest of the proper planning and development of the area.

- (1) All buildings must be designed and constructed in accordance with the Building Regulations 1997.
- (2) Building Control Regulations require a Commencement Notice. A copy of the Commencement Notice is attached.
- (3) A Fire Safety Certificate must be obtained from the Building Control Authority, where applicable.
- (4) Free Standing Walls must be designed and constructed in accordance with IS 325: Code of Practice for use of Masonry Part 1 : Structural use of unreinforced Masonry. The Owner must also ensure that the construction of all walls is supervised by a competent person.

Signed on behalf of South Dublin County Council.

LOCAL GOVERNMENT (PLANNING AND DEVELOPMENT) ACTS, 1963 TO 1999  
AND PLANNING AND DEVELOPMENT ACT 2000

Decision Order Number 3445	Date of Decision 22/11/2001
Register Reference S01A/0625	Date: 25/09/01

**Applicant** Bloomfield Committee,  
**Development** Development comprising: a friends meeting house for religious worship and administration purposes, in a two storey building of approx. 1,252 sq. metres; associated landscaping and site development works, car parking and site services and sub-station of approx. 87 sq.m.

**Location** Laurel Hill, Stocking Lane, Rathfarnham, Co. Dublin.

**App. Type** Permission

Dear Sir/Madam,

With reference to your planning application, received on 25/09/01 in connection with the above, I wish to inform you that before the application can be considered under the Local Government (Planning & Development) Acts 1963-1999 and the Planning and Development Act 2000, the following ADDITIONAL INFORMATION must be submitted in quadruplicate:

- 1 It is noted from the drawings submitted that there is a significant residential and office element to the proposed Swanbrook House. The applicant is requested to state the exact purpose of these uses and their relationship with the Meeting House. The applicant is also requested to clarify the reference to 'rental offices' on the elevation and section drawings.
- 2 The applicant is requested to submit a revised site plan relocating Swanbrook House so as to reduce the visual impact of the building as viewed from Stocking Lane. The applicant is advised that this may be achieved through a greater set back distance from the road or a re-design of the scheme involving the relocation of Swanbrook House elsewhere on the site.

Fax: 01-414 9104

REG REF. S01A/0625

- 3 The Roads Department has expressed concerns regarding the inadequate vision splays when exiting the site. It is the view of the Planning Authority that the mature trees and stone wall fronting Stocking Lane contribute to the visual character of the area and should be retained. Having regard to the foregoing, the applicant is requested to investigate the possibility of (a) relocating the entrance to the opposite (south-western) end of the site and to demonstrate that adequate vision splays could be achieved at this point or (b) the possibility of improving vision splays at the currently proposed access point through consultation with adjoining landowner(s) regarding the relocation of the wall(s) on the adjacent site(s).
- 4 The applicant is requested to submit a revised site plan omitting the formal garden area adjacent to the proposed Meeting House, so as to minimise any possible damage to the roots of the existing trees fronting onto Stocking Lane.
- 5 The applicant is requested to submit precise details in relation to any proposed treatment/upgrading of the boundary to the site along Stocking Lane, together with an assessment of the impact of these proposals on existing trees.
- 6 The applicant is requested to submit a plan showing the proposed location of protective fencing to be erected and kept in place for the duration of site construction works, around all those trees to be retained on site.
- 7 The applicant is requested to submit a revised Landscape plan taking into account the suggested amendments to the layout and site plan required to minimise the damage to trees. This plan is to be in accordance with South Dublin County Council's "Guidelines for Open Space Development and Taking in Charge", available from the Parks and Landscape Services Department.
- 8 The applicant is requested to re-examine the design materials and finishes proposed for the building in the context of its location in an area zoned 'B', 'to protect and improve rural amenity and to provide for the development of agriculture'. In particular the proposed roofing material is considered inappropriate in this location.

REG. REF. S01A/0625

9 The applicant's drawing R76/01 states that "Foul Water to Discharge in to existing Rathfarnham Golf Club System". The foul drainage system is private. The applicant is requested to submit the following additional information relating to foul drainage.

- (i) Written consent from Rathfarnham Golf Club stating that they have no objections to the proposed connection to their foul drainage system.
- (ii) A foul drainage layout, as well as a longitudinal section, of the proposed foul drainage system from the applicant's site, through Rathfarnham Golf Club, up to and including the point of connection to the public sewer. It shall clearly show pipe sizes, gradients, cover and invert levels, as well as the location of all drains, manholes, AJs etc. up to and including connection to the public foul sewerage system.
- (iii) Detailed estimates of the expected daily and peak effluent discharge from the development, as well as information on the current flows from the Golf Club to demonstrate that the existing system, up to the point of connection to the public system, has the capacity to cater for the additional development.

10 The applicant is requested to submit the following information in relation to surface water drainage.

- (i) The surface water run-off from the new development shall be limited to 6 l/s/ha for the effective impermeable area of the site. Therefore the applicant shall submit revised details indicating surface water attenuation facilities and flow control mechanism necessary to limit surface water discharges based on a rainfall intensity for a 20 year return period of 2 hour duration. Details to include discharge calculations, pipe sizes, invert levels and gradients, manhole locations, required storm water storage volume, location of storm water storage area together with a cross-section of the storm water storage area showing details of both inlets and outlets. Details of proposed flow control mechanisms to limit surface water discharges shall also be submitted. Full details of how the attenuation facility shall be kept free from siltation and cleaned shall also be included.

- (ii) On a revised surface water layout the applicant shall clearly show the line of the existing ditch throughout the site clearly identifying the point of exit from the site. The layout shall show spot levels/gradients along the ditch.
  - (iii) Full details of the surface water outfall to the existing ditch shall be submitted. The following points shall be noted:
    - The invert level of the outfall should be 200mm above the normal water levels.
    - If backflooding is likely a non-return valve should be fitted.
    - The outfalls should be so formed as to avoid, or provide against, local erosion and should be so angled as to discharge in the direction of flow of the watercourse.
    - Outfall details must include headwall, wing walls and apron.
    - Suitable grating shall be provided at the outfall to prevent access by children etc.
- 11 The applicant is requested to submit the following information relating to water supply.
- (i) A watermain layout for the proposed development. This shall clearly show pipe sizes, pipe class, pipe route, location of all valves and hydrants as well as the point of the proposed connection to the existing public watermains. The layout and the provision of the proposed watermain shall comply with Part B of the 1997 Building Regulations Technical Guidance Documents.
  - (ii) Detailed estimates of the expected water demand for the development. This shall include figures for the both daily and peak water to determine whether the existing 100mm public watermain in Stocking Lane has the capacity to serve the development.

NOTE: The applicant is advised to contact the Planning Officer Siobhan Duff, Senior Executive Planner (4149000 Ext. 2348) prior to submitting a response to this request for additional information.
