Monitoring and Controls at Corbally, Ballaghd

- (1) The proposal would be in conflict with the Council's Draft Development Plan proposals for this area, in that it is located in a predominantly rural area, above the built envelope, where commercial and industrial activities are not envisaged in the foreseeable future and industrial provision for main drainage services has not been made, and would seriously injure the amenities of this rural area by reason of the scale of industrial activities proposed.
- (2) The proposed development would be premature by reason of the said existing deficiency in the provision of drainage facilities and the period within which such deficiency may reasonably be expected to be made good.
- (3) The proposed development, which is likely to involve the movement of heavy industrial vehicles to and from the site, fronting to the main Nonsington Road, would create a serious traffic hazard.
