Summary developments at Cambridge Mass., Fall 1964

- (1) Radio piped concrete and water facilities are not available to meet the proposal.
- (2) The proposed development would be restricted by reason of the soil stability conditions in the production of water and concrete facilities and the period within which such facilities may reasonably be expected to be made good.
- (3) The site is normally occupied by dense primary road proposals with regard to the proposed F.R. and T.R. routes.
