Conclusions

Summary of Findings

- (1) That the development in the United States of the atomic bomb is a direct result of the policy of the United States Government and the scientific and technical personnel who are engaged in the development of the atomic bomb.
- (2) That the technical staff members in the United States who are engaged in the development of the atomic bomb are being trained and equipped with the necessary knowledge and equipment to carry out the development of the atomic bomb.
- (3) That the technical staff members in the United States who are engaged in the development of the atomic bomb are being trained and equipped with the necessary knowledge and equipment to carry out the development of the atomic bomb.

- (4) That the technical staff members in the United States who are engaged in the development of the atomic bomb are being trained and equipped with the necessary knowledge and equipment to carry out the development of the atomic bomb.
- (5) That the technical staff members in the United States who are engaged in the development of the atomic bomb are being trained and equipped with the necessary knowledge and equipment to carry out the development of the atomic bomb.
- (6) That the technical staff members in the United States who are engaged in the development of the atomic bomb are being trained and equipped with the necessary knowledge and equipment to carry out the development of the atomic bomb.
