**OBJECTION TO PLANNING APPLICATION FOR DEVELOPMENT AT LANDS AT NUTGROVE
AVENUE ("Application") FOR THE CONSTRUCTION OF
4 STOREY BLOCK APARTMENT COMPLEX ("Development")
Applicant: SIRIO INVESTMENT MANAGEMENT LIMITED
REF: SD 21A/0101**

Dear Sir/Madam

I am writing in my capacity as treasurer of the Longwood Stonepark residents association and have been requested by households within Stonepark\Longwood to object to this application in the following manner and on the following grounds, in accordance with the Planning and Development Act 2000 (PDA).

It is noted that the planning authority must place prime importance on the need for "proper planning and sustainable development of the area" in considering an application and we believe this application does not do so.

General Comment

It is noted that this is the third application by this Applicant (or its predecessor in title) to develop this site and it is acknowledged the Applicant seems to have responded, in good faith, to previous objections/observations that have been made in respect of the proposed development of this site.

Residents of Stonepark and Longwood do accept that there is a particular need for housing to be provided for an ever-growing population in the Dublin area. We therefore want it noted that our objection is not to the provision of housing generally on this site – instead, our objection is for the purpose of addressing issues to ensure that "the proper planning and sustainable development" of this site takes place.

*The Treasurer, Stonepark & Longwood Residents Committee,
C/O 131 Stonepark Abbey, Rathfarnham, D14 W2F7*

We believe the issues that arise in respect of this application are as follows:

- 1. The number and nature of entrances and exits**
- 2. The height of the development**
- 3. Decontamination and impact upon the environment**

1. The number and nature of entrance and exits

The Applicant and SDCC are aware that proposed entrance and exit points have been an issue in the past. We note that the application letter dated 27th April 2021 makes reference to "access and egress are proposed from a singular location located on the site's north-eastern corner boundary on Nutgrove Avenue", but are concerned there is a lack of clarity as follows:

- (a) The letter noted above makes reference to "singular" location.
- (b) Section 5.1 of the Planning Statement (page 17) makes references to "pedestrian access to the building.....are provide at numerous points along Nutgrove Avenue";
- (c) Section 5.3 of the Planning Statement (Access and Permeability page 19) references 3 pedestrian points along Nutgrove avenue and additional pedestrian points along the Western boundary;
- (d) Figure 5 as set out on page 19 of the Planning Statement and the accompanying language of Section 5.3 does not fully include the Southern edge of the site which does abut onto Stonepark Abbey.

In the event that the only entrances are along Nutgrove Avenue, we have no objection to this aspect of the development. We are concerned that the developer will be undertaking significant work along the boundary wall with Stonepark Abbey. This wall is of considerable age and care must be taken to ensure its integrity. In that regard, we would ask that SDCC ensure this integrity by the inclusion of some form of condition within the planning that addresses this point. The most prudent and practical way to address this point may be the inclusion of a condition that ensures that some form of insurance/financial contribution is in place to allow SDCC replace/repair any breach/demolition of this wall in a speedy manner should it be breached during the construction of any approved development.

In the event that SDCC might try to impose an access point between Nutgrove Avenue and Stonepark, we would strongly object to this, on the following grounds:

1. There has been no prior engagement with any of the residents or residents' group within Stonepark and any potential access from Nutgrove to Stonepark would significantly change the character of the Stonepark estate, given the significant increase in footfall that would result. Parking within Stonepark is already relatively limited – the potential turning of Stonepark into a parking bay for Nutgrove Avenue residents would be significantly damaging to the amenity value for Stonepark residents.

*The Treasurer, Stonepark & Longwood Residents Committee,
C/O 131 Stonepark Abbey, Rathfarnham, D14 W2F7*

2. If access was created, it would be less than clear as to which party would be responsible for the maintenance, upkeep and repair of any such access, and hence it is not possible for the impact of an access point to be evaluated.

Whereas there does appear to be a significant number of assurances that no such throughway is planned, we wish to ensure that no such access is created.

For information, please note that An Bord Pleanála has referred to the open space of Stonepark in the recent decision in relation to Ely Place (Inspectors Report for decision ABP 307 682 -20) which states that this open space is “modest” and any entrance/exit “in the vicinity would significantly reduce its amenity value.”

2.The Height of the Development

Again, the Applicant and SDCC are aware that this issue has also been a significant one in the past. In Section 3.2 of the Planning Statement the Applicant refers at some length to the objections that SDCC had in relation to this matter with regard to Planning Application SD18A/0421.

SDCC was particularly concerned with what it termed the “overbearing visual impact on the streetscape of Nutgrove Avenue and the dwellings to the south of the site, in particular 17 and 18 Stonepark Orchard”.

This appears to have been addressed in the current application by:

- (a) Tiering the height of the proposed development so that it is 4 storeys on the Northern boundary at Nutgrove Avenue which goes down to three storeys at the Southern boundary with Stonepark Orchard.
- (b) In respect of 17 Stonepark Orchard it is noted that [page 12 of Document Nme] that “the southern setbacks for the upper level have been further recessed to provide a separation distance of 15.8 metres from the gable end of 17 Stonepark Orchard”

We make the following comments in relation to this matter:

- While the tiering approach does attempt to address the matter, given the width of the site the reality is that Nutgrove Avenue is now significantly overlooked and the residents on Nutgrove Avenue are affected with regards to light and general amenity.
- Having reviewed the plans in detail it would appear that given that there is a balcony on the fourth four apartment, 17 Stonepark Orchard can still be overlooked and that the distance is actually 11.5 metres (because of the length of the balcony/terrace).

In the context of the Applicant having generally made a good faith effort to engage with the issues that arose in previous planning permissions, we would ask that the following be undertaken which would be limited in impact upon the development but which would address the issues set out above and, more generally would address the overlooking issue:

*The Treasurer, Stonepark & Longwood Residents Committee,
C/O 131 Stonepark Abbey, Rathfarnham, D14 W2F7*

1. The fourth floor should consist of only one 3 bedroom apartment, not three. The removal of the outermost apartment on the top floor from both the Eastern and the Western side would:
 - (a) Considerably reduce the overlooking and general reduction of visual amenity in respect of Nutgrove Avenue and
 - (b) would also mean that 17 and 18 SPO would also benefit from a reduction in being overlooked.

2. There are references to the provision of opaque glass and also a very significant tree planting programme (all to address the issues of visual intrusion/overlooking of the Southern boundary. There should be a specific financial requirement, by way of planning condition or otherwise by a financial contribution, so that the relevant opaque glass and the trees as specified are definitely provided for.

3. Decontamination and impact upon the environment

We note that this proposed development is taking place on a former petrol station. It is not clear what steps have been taken to deal with the petrol tanks and other potential hazards.

Summary

We believe the following steps should be included in whatever permission might be granted by SDCC:

- (a) It should be made absolutely clear that there is no access from Nutgrove Avenue into Stonepark;
- (b) There should be a financial condition/bond put in place so that in the event of any accidental damage to /removal of the southern boundary wall that SDCC is in a financial position to replace /repair it promptly;
- (c) The Fourth storey should either be removed or limited so that the overlooking/visual intrusion in respect of the Southern and Northern boundaries is minimised (by way of making the fourth storey smaller and centring it);
- (d) The very specific steps that are being taken generally to reduce overlooking and visual intrusion on the Southern boundary should be supported by specific financial conditions that will allow SDCC ensure that all relevant opaque glass and the very specific tree requirements are definitively met by the developer.

Cheque in the sum of twenty euros to support this objection.

Yours sincerely,

Dave Sheehan
