

SOUTH DUBLIN COUNTY COUNCIL

INTERNAL MEMORANDUM

Department: **Parks & Landscape Services / Public Realm** Date: **18/10/2021**

Sarah Watson

Planning Department

Development: Demolition of the abandoned single storey dwelling and associated outbuilding (206sqm); construction of 2 two storey data centers with plant at roof level of each facility and associated ancillary development which will have a gross floor area of 40,589sq.m consisting of 1 two storey data center (Building 11) which will be located to the south of the site and will have a gross floor area of 24,667sq.m. including 22 emergency generators located at ground floor level within a compound to the western side of the data center with associated flues that will be 22.3m in height; 1 two storey data center (Building 12) which will be located to the north of the site, and to the immediate north of Building 11 and will have a gross floor area of 12,915sq.m including 11 emergency generators located at ground floor level within a compound to the western side of the data center with associated flues that will be 22.3m in height; each of the two data centers will include data storage rooms, associated electrical and mechanical plant rooms, loading bays, maintenance and storage spaces, office administration areas, and plant including PV panels at roof level as well as a separate house generator for each facility which will provide emergency power to the admin and ancillary spaces; each generator will include a diesel tank and there will be a refuelling

area to serve the proposed emergency generators; the overall height of each data center apart from the flues and plant at roof level is c. 14.23m above the finished floor level; the overall height of each data center apart from the flues and plant at roof level is c. 14.23m above the finished floor level; single storey step-up substation (38sq.m) as well as 2 single storey switch substations (121sq.m); AGI Gas Regulator compound that include 3 single storey buildings (134sq.m); construction of a gas powered generation plant in the form of a 13m high single storey building with a gross floor area of 2,714sq.m that will contain 10 gas generators with associated flues that will be 25m in height, and grouped in pairs and threes; the Gas Plant will be located to the west of Building 11; ancillary site development works, that will include reorientation of the Baldonnel Stream, biodiversity management initiatives, attenuation ponds and the installation and connection to the underground foul and storm water drainage network, and installation of utility ducts and cables, that will include the drilling and laying of ducts and cables under the internal road network within Profile Park; other ancillary site development works will include hard and soft landscaping, lighting, fencing, signage, services road, entrance gates, sprinkler tanks and pump room; a temporary gas powered generation plant within a fenced yard containing 21 generator units in containers, each with associated flues (each 25m high), 12 transformers and 10 containers of controls to be located to the west of, and associated with the first phase of Building 11, and will be required for a period of up to 2 years if connection to the national grid is delayed; this temporary plant will not be built if the connection to the national grid is in place prior to the operation of Building 11 at this site that includes an abandoned single storey residential property on the New Nangor Road (R134), Dublin 22; and on land within the townlands of Ballybane and Kilbride within Profile Park, Clondalkin, Dublin 22 on an overall site of 8.7 hectares.

Location: In the townlands of Ballybane & Kilbride within Profile Park, Clondalkin, Dublin 22

Applicant: Vantage Data Centers Dub 11 Ltd.

Reg. Ref: SD21A/0241

Recommendation: Additional Information

Main concerns:

1. Impacts of the proposed development on existing trees, hedgerows and local biodiversity
2. Insufficient SuDS (Sustainable Drainage System) shown for the proposed development. SDCC do not approve of using underground tanks as part of SuDS schemes where the full potential of the natural drainage features has not been explored.
3. Maintenance access for machinery.

Site Area

8.7 ha

Zoning

Objective EE - To provide for enterprise and employment related uses.

Relevant Sections, Policies and Objectives of the SDCC Development Plan 2016-2022:

Chapter 4 ECONOMIC AND TOURISM (ET) Policy 3 Enterprise and Employment (EE)

ET3 Objective 5: To ensure that all business parks and industrial areas are designed to the highest architectural and landscaping standards and that natural site features, such as watercourses, trees and hedgerows are retained and enhanced as an integral part of the scheme.

Chapter 7 INFRASTRUCTURE & ENVIRONMENTAL QUALITY (IE) Policy 2 Surface Water & Groundwater

It is the policy of the Council to manage surface water and to protect and enhance ground and surface water quality to meet the requirements of the EU Water Framework Directive.

IE2 Objective 1: To maintain, improve and enhance the environmental and ecological quality of our surface waters and groundwater by implementing the programme of measures set out in the Eastern River Basin District River Basin Management Plan.

IE2 Objective 2: To protect the regionally and locally important aquifers within the County from risk of pollution and ensure the satisfactory implementation of the South Dublin Groundwater Protection Scheme 2011, and groundwater source protection zones, where data has been made available by the Geological Survey of Ireland.

IE2 Objective 3: To maintain and enhance existing surface water drainage systems in the County and promote and facilitate the development of Sustainable Urban Drainage Systems (SUDS), including

integrated constructed wetlands, at a local, district and County level, to control surface water outfall and protect water quality.

IE2 Objective 4: To incorporate Sustainable Urban Drainage Systems (SUDS) as part of Local Area Plans, Planning Schemes, Framework Plans and Design Statements to address the potential for Sustainable Urban Drainage at a site and/or district scale, including the potential for wetland facilities.

IE2 Objective 5: To limit surface water run-off from new developments through the use of Sustainable Urban Drainage Systems (SUDS) and avoid the use of underground attenuation and storage tanks.

IE2 Objective 6: To promote and support the retrofitting of Sustainable Urban Drainage Systems (SUDS) in established urban areas, including integrated constructed wetlands.

IE2 Objective 9: To protect water bodies and watercourses, including rivers, streams, associated undeveloped riparian strips, wetlands and natural floodplains, within the County from inappropriate development. This will include protection buffers in riverine and wetland areas as appropriate (see also Policy G3 Objective 2 – Biodiversity Protection Zone).

Chapter 8. Green Infrastructure

Section 8.1.0 Green Infrastructure Network

G2 Objective 1: To reduce fragmentation of the Green Infrastructure network and strengthen ecological links between urban areas, Natura 2000 sites, proposed Natural Heritage Areas, parks and open spaces and the wider regional Green Infrastructure network

G2 Objective 2: To protect and enhance the biodiversity value and ecological function of the Green Infrastructure network.

G2 Objective 3: To restrict development that would fragment or prejudice the Green Infrastructure network.

G2 Objective 4: To repair habitat fragmentation and provide for regeneration of flora and fauna where weaknesses are identified in the network.

G2 Objective 5: To integrate Green Infrastructure as an essential component of all new developments.

G2 Objective 6: To protect and enhance the County's hedgerow network, in particular hedgerows that form townland, parish and barony boundaries, and increase hedgerow coverage using locally native species.

G2 Objective 9: To preserve, protect and augment trees, groups of trees, woodlands and hedgerows within the County by increasing tree canopy coverage using locally native species and by

incorporating them within design proposals and supporting their integration into the Green Infrastructure network.

G2 Objective 12: To seek to control and manage non-native invasive species and to develop strategies with relevant stakeholders to assist in the control of these species throughout the County.

G2 Objective 13: To seek to prevent the loss of woodlands, hedgerows, aquatic habitats and wetlands wherever possible including requiring a programme to monitor and restrict the spread of invasive species.

GREEN INFRASTRUCTURE (G) Policy 3 Watercourses Network

G3 Objective 1: To promote the natural, historical and amenity value of the County's watercourses and address the long-term management and protection of these corridors in the South Dublin Green Infrastructure Strategy.

G3 Objective 2: To maintain a biodiversity protection zone of not less than 10 metres from the top of the bank of all watercourses in the County, with the full extent of the protection zone to be determined on a case-by-case basis by the Planning Authority, based on site specific characteristics and sensitivities.

G3 Objective 3: To ensure the protection, improvement or restoration of riverine floodplains and to promote strategic measures to accommodate flooding at appropriate locations, to protect ground and surface water quality and build resilience to climate change.

G3 Objective 5: To restrict the encroachment of development on watercourses, and provide for protection measures to watercourses and their banks, including but not limited to: the prevention of pollution of the watercourse, the protection of the river bank from erosion, the retention and/or provision of wildlife corridors and the protection from light spill in sensitive locations, including during construction of permitted development.

GREEN INFRASTRUCTURE (G) Policy 4 Public Open Space and Landscape Setting

G4 Objective 2: To connect parks and areas of open space with ecological and recreational corridors to aid the movement of biodiversity and people and to strengthen the overall Green Infrastructure network.

G4 Objective 4: To minimise the environmental impact of external lighting at sensitive locations within the Green Infrastructure network to achieve a sustainable balance between the recreational needs of an area, the safety of walking and cycling routes and the protection of light sensitive species such as bats.

GREEN INFRASTRUCTURE (G) Policy 5 Sustainable Urban Drainage Systems

G5 Objective 1: To promote and support the development of Sustainable Urban Drainage Systems (SUDS) at a local, district and county level and to maximise the amenity and biodiversity value of these systems.

G5 Objective 2: To promote the provision of Green Roofs and/or Living Walls in developments where expansive roofs are proposed such as industrial, retail and civic developments.

CHAPTER 9 . HERITAGE, CONSERVATION AND LANDSCAPES (HCL)

Policy 15 Non-Designated Areas

It is the policy of the Council to protect and promote the conservation of biodiversity outside of designated areas and to ensure that species and habitats that are protected under the Wildlife Acts 1976 and 2000, the Birds Directive 1979 and the Habitats Directive 1992 are adequately protected.

HCL15 Objective 1:

To ensure that development does not have a significant adverse impact on rare and threatened species, including those protected under the Wildlife Acts 1976 and 2000, the Birds Directive 1979 and the Habitats Directive 1992.

HCL15 Objective 2:

To ensure that, where evidence of species that are protected under the Wildlife Acts 1976 and 2000, the Birds Directive 1979 and the Habitats Directive 1992 exists, appropriate avoidance and mitigation measures are incorporated into development proposals as part of any ecological impact assessment.

HCL15 Objective 3: To protect existing trees, hedgerows, and woodlands which are of amenity or biodiversity value and/ or contribute to landscape character and ensure that proper provision is made for their protection and management in accordance with Living with Trees: South Dublin County Council's Tree Management Policy 2015-2020.

Living with Trees – Tree Management Policy 2015 – 2020

South Dublin County Council's Tree Management Policy 'Living with Trees' 2015-2020 contains information within Chapter 7 Trees and Development that relates to the retention, protection and planting of trees on development sites. Relevant points within this section include:

- The Council will use its powers to ensure that where it is conducive with the objectives of the County Development Plan, and other planning objectives there is maximum retention of trees on new development sites.
- In the processing of planning applications, the Council will seek the retention of trees of high amenity / environmental value taking consideration of both their individual merit and their interaction as part of a group or broader landscape feature.
- On construction sites all work must be in accordance with British Standard 5837 (2012): Trees in Relation to Design, Demolition and Construction – Recommendations.
- The Council will promote the replacement of trees removed to facilitate approved planning and development of urban spaces, buildings, streets, roads, infrastructural projects and private development sites.

The Public Realm Section has assessed the proposed development in accordance with the County Development Plan and best practice guidelines. We recommend the following ADDITIONAL INFORMATION is requested:

1. Tree and Hedgerows Protection

The applicant shall submit a Tree Protection Plan and Arboricultural Method Statement, all in accordance with, BS 5837: 2012 Trees in relation to design, demolition and construction – recommendations. The method statement shall include no dig or other solutions to retain the existing trees within hedge number 5 along the western boundary.

2. Landscape Proposals

The applicant shall:

- i. clarify the discrepancy between trees to be retained as shown on the Landscape Masterplan versus those shown on the Tree Removal and Retention Plan.
- ii. provide a method statement to include no dig or other solutions to retain the existing trees within hedge number 5 along the western boundary.
- iii. Provide details of invasive species within native hedgerows referred to in page 1 of the landscape report and proposed necessary measures to remove/manage them
- iv. Explain how the landscaped areas that are fenced off can be accessed by machinery for maintenance?

- v. Investigate opportunities to increase natural SuDs on the site.
- vi. Show how the design of the attenuation basin maximizes amenity and biodiversity.
- vii. All SuDS proposals to be shown on the landscape proposals with detail on how they work.

3. **Sustainable Drainage Proposals**

The Public Realm Section consider that the proposed development is contrary to Policy G5 - Sustainable Urban Drainage Systems and Objective G5 1 and G5 2 in the County Development Plan.

The applicant should be requested to:

Further natural above ground SUDS features should be incorporated into the proposed drainage system. The SUDS should be an integrated multi-disciplinary approach which locally addresses water quality, water quantity, and provides for amenity and biodiversity enhancement which meets the objectives of South Dublin County Council Development Plan 2016-2022. The use of underground tanks should be avoided.

Although permeable surfaces and a stormwater attenuation basin is proposed, the applicant is requested to:

1. Revisit the design and layout of the proposed development and propose a comprehensive SuDS strategy that fully delivers a 'treatment train' maximizing the use of natural SuDS. The proposals shall incorporate as appropriate:
 - i. green roofs, grass areas, SuDs tree pits in the car park/adjacent to hardstanding, channel rills, swales, rain gardens and other such SuDS and show what attenuation capacity is provided by such SuDS.
 - ii. Maximise the amenity and biodiversity of the attenuation basin to provide a more natural habitat feature in the landscape.

Fionnuala Collins

Assistant Parks Superintendent
