Date of Application: 16/11/2021

RE: Licence Application under S. 254 of the Planning and Development Act, 2000 (the "Act"), for overground electronic communications infrastructure and associated physical infrastructure.

NBI Infrastructure DAC ("NBI") applies for a licence under Section 254 of the Act for overground electronic communications infrastructure in the form of fibre optic cable and associated physical infrastructure as described in Schedule One (the "Development") at the location(s) described in Schedule Two (the "Works Parameters").

NBI confirms that it has:

- reviewed the Development and have concluded that the Development is "exempted development" following on from the approval of the Section 254 application within the meaning of the Act and the Planning and Development Regulations 2001;
- ensured that the proposed Development and associated works will not cause any issue that would endanger public safety by reason of traffic hazard or obstruction to road users;
- ensured the Development does not consist of works along, adjoining, in, on, under or over any land comprised in a motorway, busway or protected road; and
- created a T1 in the MRL system as set out in Appendix 1.2 of 'Guidance on the Process of Engagement between NBI and Local Authorities on the Application for Section 254 Licences'.

NBI Deployment Designated Activity Company
