

Subject to the exact location of the hedge row status in this area, it is proposed that the hedge row be maintained during construction. It is proposed that the hedge row be maintained during construction and under the supervision of the consulting arborist.

Subject to the exact location of the hedge row status in this area, it is proposed that the hedge row be maintained during construction. It is proposed that the hedge row be maintained during construction and under the supervision of the consulting arborist.

This section of hedge row to be fully retained during construction and shall be sensitively maintained out of the working season and under the supervision of the consulting arborist.

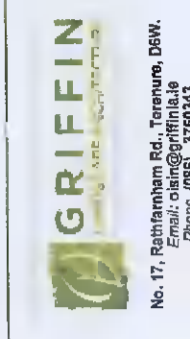

This section of hedge row to be fully retained during construction and shall be sensitively maintained out of the working season and under the supervision of the consulting arborist.

Trees Top 1256, 1255A, 1255B, 1257, 1258 are located on the adjoining road side edge, outside / to the west of the existing nature stone rustic wall. It is proposed where feasible to retain these trees as proposed in the plan. The trees are to be monitored by the consulting arborist during and post construction.
