PR/1596/21

Record of Executive Business and Chief Executive's Order

Reg. Reference: SD21A/0284 **Application Date:** 19-Oct-2021
Submission Type: New Application **Registration Date:** 19-Oct-2021

Correspondence Name and Address: Carew Kelly Architects 21-22, Grafton Street, Dublin 2

Proposed Development: Construction of self-storage facility with small ground floor café with total area of 8620sq.m composed of; part basement area consisting of self-storage area, open car parking and area for classic car storage; ground floor containing reception /office area, cafe of 124.5sq.m and self-storage area; first floor containing office area of 112.3sq.m and second and third floor containing self-storage areas; the proposed building is approximately 21.9 metres high from ground floor level; development includes external signage to building plus associated landscaping and drainage works; vehicular access to the ground floor is from the estate road and to the basement level is from the existing shared access road; the proposed site is located to South of N4, to the West of the existing Johnson and Johnson office building, to the north/east of Giraffe Childcare and to the north of Liffey Valley secondary estate road.

Location: Site at Liffey Valley, Dublin 22

Applicant Name: Oceanglade Ltd.

Application Type: Permission

(COS)

Description of Site and Surroundings

Site Area: stated as 0.72 Hectares on the application.
Site Visit: 17th of November 2021

Site Description

The subject site is a greenfield site that is located just south of the N4. To the west of the site there is a two-storey building currently occupied by a creche. To the east of the site there is a five-storey building occupied by offices. A link road is located to the south of the site. The Liffey Valley

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

shopping centre is located to the south-east of the site. The area is largely commercial in nature. The site slopes significantly towards the N4 in a northerly direction.

Proposal

Permission is sought for the construction of self-storage facility with small ground floor café with total area of 8620sq.m composed of:

- Part basement area consisting of:
 - self-storage area,
 - open car parking, and
 - area for classic car storage.
- Ground floor containing:
 - reception /office area,
 - cafe of 124.5sq.m, and
 - self-storage area.
- First, Second and Third floor:
 - First floor containing office area of 112.3sq.m,
 - Second and third floor containing self-storage areas;
- The proposed building is approximately 21.9 metres high from ground floor level;
- Development includes external signage to building plus associated landscaping and drainage works; and
- Vehicular access to the ground floor is from the estate road and to the basement level is from the existing shared access road.

Zoning

The subject site is subject to zoning objective 'MRC': *'To protect, improve and provide for the future development of a Major Retail Centre'*.

Consultations

Record of Executive Business and Chief Executive's Order

SEA Sensitivity Screening – no overlap is recorded in the SEA monitoring system.

Submissions/Observations /Representations

Submissions received raised the following concerns in summary:

- Proposed height, bulk, scale and proximity will dwarf childcare facility and reduce visibility.
- Reasons for refusal have not been addressed.
- Overshadowing and impact on possible future outdoor play areas for the childcare facility.
- Fire separation/external fire spread.
- Noise and dust from construction.
- Use of same access road as the childcare facility for emergency use is not possible to define or control and could result in excess traffic and accident risk.
- Overbearing and domineering and out of character with existing buildings.
- Proposed use is not in-keeping with the showroom and other sales buildings.
- Object to introducing a vehicular access and parking through the access road currently used exclusively by the childcare facility.
- Construction traffic will increase noise and dust and endanger the health and safety of children and staff at the facility.

The issues raised in the third-party submissions have been taken into account when assessing the proposal.

Relevant Subject Site Planning History

SD20A/0286

Construction of self-storage and retail facility of 5901.4sq.m consisting of open basement area containing car parking, ground floor containing reception/office area; self-storage area and integrated retail unit of 478.7sq.m; first floor containing office area of 72sq.m and second floor containing self-storage area; the proposed building in approx. 19.85 metres high from ground floor level; external signage of 4 facades plus associated landscaping and drainage works; vehicular access to the ground floor is from the estate road and to the basement level is from the existing shared access road on a site of 0.72 hectares at Liffey Valley, to the south of the N4, to the west of the existing Johnson and Johnson office building, to the north and east of Giraffe childcare and to the north of Liffey Valley secondary estate road.

Permission refused due to roads concern, justification for retail, visual impact and landscaping. These reasons for refusal form part of the assessment in this report below.

Assessment

The main issues for assessment relate to:

- Zoning and Council Policy;
- Previous Reasons for Refusal;
- Visual Amenity (Signage);
- Public Health;
- Services and Drainage;
- Access and Parking;
- Environmental Impact Assessment; and
- Appropriate Assessment.

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

Zoning and Council Policy

The site is zoned 'MRC': *'To protect, improve and provide for the future development of a Major Retail Centre'*. In terms of the uses proposed the applicant has stated that the building would consist of a self-storage unit and coffee shop.

A 'self-storage' use is not listed under the use classes related to the MRC zoning objective nor is it listed in Schedule 5: Definition of Use Classes & Zoning Matrix Table of the CDP. The applicant has stated that goods would be stored by homeowners looking for more space or business owners who require short term excess storage capacity. 'Warehousing' is defined in Schedule 5 of the CDP as *'A building or part thereof where goods are stored or bonded prior to distribution and sale elsewhere. It may include the storage of commercial vehicles where this is ancillary to the warehousing function'*.

It is considered that due to the fact that goods would be 'stored' within the premises the self-storage use would broadly align with the definition of 'Warehousing' which is 'Open for Consideration' under the MRC zoning objective. Therefore, the proposed use may be acceptable subject to detailed assessment on their own merits and particularly in relation to their impact on the development of the County at a strategic and a local level. The reception/office area is associated with the self-storage use.

Under the MRC zoning objective, a restaurant/café is Permitted in Principle. This use is therefore considered to be generally acceptable, subject to further assessment against the relevant policies, objectives and standards set out under the Plan.

Previous Reasons for Refusal

There was a recently refused planning application on the subject site for a similar development (Reg. Ref. SD20A/0286). This application was refused based on the following reasons.

Reason for Refusal No. 1

The proposed emergency access would rely on access via a site that is outside of the control of the applicant and currently used as an accessway for the dropping off and pick up of children attending an existing childcare facility. The proposed accessway is not considered to be suitable due to the lack of control over the accessway and risk of an accident with other vehicles, which could result in a traffic hazard and endanger public safety.

In addition to this the planning authority is not satisfied on the basis of the information submitted that the proposed eastern vehicular and pedestrian accessway would not result in a traffic hazard.

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

The planning authority is not satisfied on the basis of the information submitted that the level of parking proposed is suitable for the site and surrounding area or that the applicant has provided sufficient justification for the proposal by means of a Traffic and Transport Assessment given the proximity to the Liffey Valley shopping centre. The proposal would therefore be contrary to the proper planning and sustainable development of the area.

Response:

The current proposal still provides for the access via the car park and access for the neighbouring existing childcare facility. The applicant states that this access road would be for emergency services only and a barrier would be provided at the bottom of the ramp. The use of this access was identified as a significant concern in the previous application. The Planning Authority is concerned that the neighbouring site is outside the control of the applicant. Should this neighbouring site ever change in terms of its layout or if additional buildings are proposed that would block the emergency access. The Roads Department raises concerns that this arrangement impacts traffic safety, especially given that both sites would have different types of activities. It is also noted third party submissions from this adjoining site raise concerns with the use of this access.

The applicant states that there is a right of way in place. Further information on this right of way is required. If there are wayleave(s) these should be shown on the site location map in accordance with the Planning and Development Regulations 2001 (as amended). However, the Roads Department still has serious concerns regarding this access and an alternative arrangement and proposal should be considered. Therefore, this reason for refusal has not been fully overcome. Even if the concern regarding the control of the access can be overcome, concerns regarding traffic safety still apply. **The applicant should be requested to revise the current proposal so that this access is provided in an appropriate location paying particular regard to traffic safety.**

It is likely that the proposed building will have to be reduced in size and floor area to make way for the revised emergency access. The applicant should liaise with the Roads Department prior to providing a response. It is noted that this access was a key part of the reason for refusal previously and the same concerns apply here. The Planning Authority would have serious concerns in granting permission for the development with this access in its current form.

The proposal also includes an access to the east via an existing internal access road on the neighbouring site to the east. Again, there are concerns regarding control over this access and traffic safety. The applicant should be requested to submit evidence that they have legal right to utilise this access. This might be in the form of a written letter, detail of any right of way(s) and/or drawings. A revised layout plan showing a two-way (access/exit) design through this shared access which shows

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

traffic priority and proposed road line markings is required. **This information should be submitted by way of additional information.**

The applicant has submitted a Transportation Assessment Report prepared by NRB Consulting Engineers. The floor area, proposed uses, and car parking have been revised since the previous application. The total number of car parking spaces has been reduced to 50 spaces. The total maximum number of car parking spaces for the development under the County Development Plan is identified as 49. The provision of 50 spaces is therefore considered to be generally acceptable. It is noted that there is a space at basement level identified as for 'dedicated secure storage for classic cars'. These spaces are not considered to contribute to the car parking provision for the development and the applicant has correctly not included them in their calculations.

Reason for Refusal No. 2

The applicant has failed to provide sufficient justification for the retail element of the proposal in terms of the potential impact on the vitality and viability of the nearby Liffey Valley Core Retail Area. The proposal would therefore be contrary to the Retail Planning Guidelines for Planning Authorities (2012), policy R4 and section 11.3.6 (v) of the South Dublin County Council Development Plan (2016-2022) and would be contrary to the proper planning and sustainable development of the area.

Response:

The previous proposal included a retail unit of approx. 478.6sq.m. This retail unit has been omitted from the current proposal and the floor area of the self-storage unit increased. Additionally, a café unit is proposed. Restaurant/café use is Permitted in Principle under the site's zoning objective. It is therefore considered that this reason for refusal has been overcome.

Reason for Refusal No. 3

The applicant has failed to provide sufficient justification for a building of this scale, design and appearance within the context of the site and surrounding area. The proposed structure, by reason of its excessive scale, bulk and poor design would result in an incongruous and visually prominent feature that would detract from the visual amenity and character of the Major Retail Centre zoned area. The proposal is therefore considered to be contrary to the South Dublin County Development Plan 2016-2022 and the proper planning and sustainable development of the area.

Response:

The applicant has included the Design Statement in the Planning Assessment. Images of a 3D model of the development have also been submitted. The proposed unit has been redesigned in terms of height, bulk and design. The building would now step down in height towards the south

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

(facing the estate road). The front part of the building, including the café unit, would be approx. 6.1m in height. The building then increases by approx. 9.3m and then by approx. 6.0m so that the highest part of the building is setback from this frontage.

The Planning Authority welcomes the redesign of the front elevation and considers this somewhat addresses concerns in regard to the visual impact of the building when viewed from the front (south). However, the inclusion of brick (brick similar in colour to the brick structures located both to the east and to the west of the site) within the front (south) and side (east) façade would help strengthen the streetscape at this location and connect the three buildings (proposed and two existing structures). The applicant should be requested to submit revised proposals for the southern and eastern façades that incorporate significant sections of brick materials. **ADDITIONAL INFORMATION.**

The building has also been redesigned so that the cladding is coloured light grey across the majority of the western, northern and eastern elevations. This helps the building better integrate with surrounding development and is more visually acceptable. The southern elevation would have cladding coloured yellow and blue, the corporate colours of the subject business. Black brick or similar would be used for the cladding of the café unit. Additional fenestration has also been introduced across the elevations. The overall changes to the building are welcomed, subject to additional brick being introduced as above.

It is noted that the overall height of the building has increased by approx. 2.0m. It would be approx. 25.4m in overall height when viewed from the north and approx. 21.9m when viewed from the south (front). The proposed height at the front (approx. 6.1m), adjacent to childcare facility, is acceptable. Due to the massing of the building at the front this height is acceptable from this elevation. Some concerns remain in regard to the visual impact of the proposal on the southern elevation. The building would be higher and closer to the southern boundary than neighbouring buildings. It is noted that this view is from the N4, however, consideration could be given to breaking up what would appear as a bulky façade/development from this view. The applicant should be requested to consider providing a setback at the top to reduce the bulk of the building. The top of this setback could also be coloured lighter. **This should be addressed by way of additional information.**

The area of surface car parking at the front of the building has been reduced and the building line brought forward. This provides for a better frontage and connection with the streetscape.

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

Reason for Refusal No. 4

Having regard to the lack of information submitted in relation to existing trees, hedges and vegetation within the site and their protection and the excessive amount of hardstanding proposed, the proposal would result in a poor-quality landscape and environment and would therefore be contrary to the proper planning and sustainable development of the area.

Response:

The revised proposal submitted includes a revised landscaping plan. The hardstanding area in the north has been further setback and the vegetation along this boundary proposed for retention. Planting is provided along the neighbouring childcare facility site, which is welcomed. The Public Realm Section has reviewed the proposed development and have the following comments:

1. SuDS/Blue/Green Infrastructure

The current drainage scheme does not fully comply with the objectives of the County Development Plan in terms of Green Infrastructure or as regards the proper implementation of SUDS and is contrary to Green Infrastructure Policy G5 -Sustainable Urban Drainage Systems, Objective G5 1 and G5 2 and Infrastructure and Environmental Quality Policy 2 Surface and Groundwater Objective 3, 5 and 6. SDCC do not approve of using underground tanks as part of SuDS schemes where the full potential for the natural drainage features has not been explored.

The term Green Infrastructure is used to describe an interconnected network of waterways, wetlands, woodlands, wildlife habitats, greenways, parks and conservation lands, forests and other open spaces that adjoin and are threaded through urban areas. The Green Infrastructure network supports native plant and animal species and provides corridors for their movement, maintains natural ecological processes and biodiversity, sustains air and water quality and provides vital amenity and recreational spaces for communities, thereby contributing to the health and quality of life of residents and visitors to the County.

The proposed drainage system needs to be developed further in order to sustainably manage surface water through a more natural hydrological regime / SUDS scheme within the development. The philosophy of SUDS is an integrated multi-disciplinary approach which locally addresses water quality, water quantity, and provides for amenity and habitat/biodiversity enhancement. A SuDS strategy should be developed for the proposed development which takes account of and maximises these issues.

The applicant is requested to revisit the design and layout of the proposed development and to submit revised plans and particulars to include:

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

- a) *Natural SUDS features shall be incorporated into the proposed drainage system. The SUDS shall be an integrated multi-disciplinary approach which locally addresses water quality, water quantity, and provides for amenity and biodiversity enhancement which meets the objectives of South Dublin County Council Development Plan 2016-2022.*
- b) *The applicant shall show natural SuDS features for the development such as green roofs, grass areas, channel rills, swales, detention basins, attenuations ponds/reed bed/wetlands and other such SuDS and show what attenuation capacity is provided by such SuDS. The use of underground tanks should be avoided.*
- c) *A detailed SUDS scheme for the proposed development to be agreed with Public Realm. The SuDS features should be integrated into the landscape proposal with details provided on how they work and their attenuation capacity.*

ADDITIONAL INFORMATION

2. Existing Tree Protection

In areas to be planted, any existing trees should be retained. CONDITION

The treeline northern boundary is considered important. Notwithstanding the Public Realm's Report, the northern boundary should be augmented with additional planting to provide additional screening from the N4. This can be achieved **by way of condition.**

Surface Water drainage is addressed under the Services and Drainage section of this report.

Summary

While the proposed development has come some way to addressing the previous reasons for refusal the Planning Authority still has concerns in regard to the proposed accesses, visual impact of the southern elevation and landscaping and planting and ADDITIONAL INFORMATION should be sought in this regard.

Visual Amenity (Signage)

The visual impact of the proposed building has been addressed under the reasons for refusal section above. In regard to signage, a total of approx. 84.61 sq.m of signage is proposed. These would be located on all elevations apart from the western elevation. The proposed signage has been assessed in relation to Section 11.2.8 of the County Development Plan and the South Dublin County Council Outdoor Advertising Strategy (2019).

The site is zoned and located within a Major Retail Centre where signage would be expected. Advertisements and Advertising Structures are Permitted in Principle under this zoning. The site is

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

located within Zone 2 of the Outdoor Advertising Strategy, where outdoor advertisements may be permitted subject to special development management measures.

There is existing signage on buildings along the road to the south of the site. Due to the scale and proximity of these to the site it is not considered that the proposal would lead to an overconcentration in the area. It is noted that the third sign on the front elevation is clearly associated with the coffee unit and is acceptable in this instance. The proposed development does not provide for the lighting or illumination of the signage (CONDITION TO BE ATTACHED TO PERMISSION). Given its scale and design the proposed signage is considered to be in compliance with Council policy.

Public Health

Third party submissions have raised concerns in regard to potential impact on the existing childcare facility to the south-west of the site. Due to the proposed building's location to the north of the childcare facility this would reduce the loss of natural light and overshadowing. Concerns have been raised in regard to fire safety, however, this is not a planning consideration and is dealt with under separate legislation.

Standards conditions in relation to appropriately controlling noise and dust during construction should be imposed in the event of a grant of permission. The applicant should also be asked to liaise with the H.S.E Environmental Health Officer prior to the commencement of development to confirm their requirements.

Services and Drainage

Water Services has reviewed the proposed development and request further information in regard to surface water:

1.1 It is unclear what areas of site are being attenuated by proposed attenuation system. Submit a revised drawing to show what areas of site are being attenuated by proposed attenuation system/s. The drawing should also show how and where each area of site is being attenuated. Prior to submission of additional information contact water services to discuss revised drawing.

1.2 Petrol interceptor/s shall be provided where required as per Section 20 of the Greater Dublin Regional Code of Practice for Drainage Works.

The report from Water Services is noted. However, the Planning Authority and Public Realm Section have concerns with the reliance on underground attenuation tanks to manage surface water onsite, which is contrary to Policy 2 Surface Water & Groundwater in general and specifically IE Objective 5, which requires 'to limit surface water run-off from new developments through use of Sustainable Urban Drainage Systems (SUD) and avoid the use of underground attenuation and

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

*storage tanks'. The Public Realm Section state that "the surface water drainage proposal is not sustainable and do not comply with the County Development Plan. SDCC do not approve of underground tanks unless the full natural potential of the site to manage surface water runoff has been explored. The drainage proposals deliver no amenity or biodiversity". A SuDS strategy that incorporates above ground soft natural solutions and that is fully integrated with and detailed in the Landscape Proposals is required. **This can be sought by way of additional information.***

Irish Water has reviewed the proposed development and state no objection subject to conditions relating to connection agreements. This report is noted and should be conditioned as such.

Access and Parking

The Roads Department has reviewed the proposed development and request further information:

This application is for the construction of self-storage facility of 8620 m2 consisting of open basement area for car parking, ground floor containing reception/office area; self-storage area and integrated retail unit, first floor containing office area, and second floor containing self-storage area.

Breakdown of GFA

<i>Description</i>	<i>Area</i>
<i>Storage & reception</i>	<i>8496m²</i>
<i>Café (Retail)</i>	<i>124m²</i>
<i>Total</i>	<i>8620m²</i>

Access and Internal Layout:

Proposed vehicular accesses to the site would be through 2no. main accesses and 1no. emergency exit.

- *Main access (coffee shop/reception) to the proposed development*
- *Shared access road with Johnson & Johnson/Abbott – East side*
- *Emergency exit/shared with "Giraffe Childcare Liffey Valley" - West side*

The applicant shall possess a written agreement between "Johnson & Johnson/Abbott" and the developer/owner of the proposed site, which shall be submitted to SDCC in the event of granting permission.

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

Regarding the previous planning permission application SD20A/0286, it contained a proposed 'emergency access', the roads report for this application stated the applicant shall provide an alternative route away from Giraffe Childcare Liffey Valley, the current arrangement aggravates the risk of an accident occurring on site specially that both site has different the type of activities. The applicant has not provided an alternative route, the emergency access is still proposed to pass through a childcare facility, and this remains an item of concern for the Roads Dept.

Pedestrian access to the site is provided at the main entrance plaza, and along the shared access road with Johnson & Johnson/Abbott. The basement car park shall include a demarcated pedestrian route and dropped kerbs at the access points.

The road layout is unclear for traffic turning off OR departing onto the shared access road for either facility (existing Johnson & Johnson/Abbott OR proposed U-Store-It) and a revised drawing is required which clearly shows traffic priority and proposed road line markings. The main road and accesses to site is not taken in charge by SDCC.

Parking

Cars

50 no. parking spaces are proposed in total.

Breakdown of parking spaces proposed:

Description	Number of spaces
Car spaces	43
Electrical spaces	5
Mobility impaired	2
Total	50

The maximum car parking spaces calculated in conjunction with SDCC CDP 2016-2022 Table 11.23: Maximum Parking Rates (Non-Residential) are as follows:

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

		Car parking	
Description	Area sqm	SDCC Rate Zone 2	Calculated
Storage	8384	1/200m ² GFA(Retail WH)	43
Retail	124m ²	1/35m ² GFA	4
Reception/Office	247m ²	1/75m ² GFA	3
Total	8620m²		50

Roads Department considers the provision of 50 carpark spaces to be appropriate, though one additional mobility impaired space to be provided in the basement parking lot.

Bicycles

11 Sheffield Bike Stands (2 bikes per stand; giving 22 parking spaces in total) are proposed.

The minimum Bicycle Parking rates calculated in conjunction with SDCC CDP 2016-2022 Table 11.22:

Minimum Bicycle Parking Rates are as follows:

		Bicycle parking	
Description	Area sqm	SDCC Rate Zone 2	Calculated
Storage	8620m ²	1/200m ² GFA(WH)	43
Total	8620m²		43

Roads Department is not satisfied with the proposed total, and recommends min 10 Bike Stands are located to the front of the building, and that min 10 Bike Stands are located as secure/long term bike parking within the basement carpark (40no. spaces provided minimum)

All outdoor Bicycle parking spaces must be covered.

Traffic & Transport Assessment (TTA)

The applicant has submitted a TTA (titled TAR – Traffic Assessment Report).

The report concludes as follows:

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

- 5.4 This report demonstrates that the proposed Development will have an absolutely negligible impact upon the established local traffic conditions and can easily be accommodated on the road network without any capacity concerns arising.
- 5.5 The assessment confirms that the proposed access junction is of more than adequate capacity to accommodate the worst-case traffic associated with the proposed development during the selected year of opening and the design year 15 years following opening.
- 5.6 It is considered that there are no significant Operational Traffic Safety or Road Capacity issues, affecting the established road network, that prevent a positive determination of the application by South Dublin County Council.

SDCC is satisfied with the report's findings.

Other items:

The attached documents did not include a public lighting design, bin storage and waste collection arrangement.

Roads recommends that additional information be requested from the applicant:

- 1. The applicant shall provide further detail regarding the shared access road with Johnson & Johnson/Abbott. A revised layout showing a two-way (access/exit) design through this shared access which shows traffic priority and proposed road line markings is required. Note that a written agreement between Johnson & Johnson/Abbott and the Developer/Owner of the proposed site shall be submitted to SDCC in the event of granting permission.*
- 2. The applicant shall submit a revised layout showing an alternative "emergency access" route which is not shared with the Giraffe Childcare Facility. The current proposal aggravates the risk of an accident occurring on site, given both sites have different types of traffic activities.*
- 3. The applicant shall submit a revised layout showing, a demarcated pedestrian route and dropped kerbs within basement and surface carpark.*
- 4. The applicant shall submit a revised car parking layout to include for an additional mobility impaired space to be located in the basement carpark.*
- 5. The applicant to submit revised layout showing covered bicycle parking to front of building for min 10no. Sheffield Bike Stands, and for 10no Sheffield Bike Stands in basement parking area.*
- 6. The applicant shall submit a revised layout showing, bin storage locations and waste collection arrangement.*

Comhairle Chontae Atha Cliath Theas

PR/1596/21

Record of Executive Business and Chief Executive's Order

Conditions have been offered in the event of a grant of permission. However, having regard to the nature of the concerns raised, additional information should be sought in this instance.

The report from the Roads Department is noted. **These items should be requested via additional information.** Given the nature of the development (number of staff) the Planning Authority considers a reduction in bicycle parking from the minimum requirement (over 43 spaces) to be acceptable. The Planning Authority considers the proposed 22 spaces to be sufficient. In addition, the applicant should consider providing internal bicycle parking for staff members.

Screening for Environmental Impact Assessment

Having regard to the modest nature of the proposed development there is no likelihood of significant effects on the environment arising from the proposed development. The need for environmental impact assessment can, therefore, be excluded at preliminary examination and a screening determination is not required.

Screening for Appropriate Assessment

The applicant has provided a section on screening for Appropriate Assessment in the Planning Assessment. Having regard to the nature and scale of the development, and the distance from the Natura 2000 sites the proposed development would not require a Stage 2 Appropriate Assessment.

Conclusion

Having regard to the:

- provisions of the South Dublin County Development Plan 2016-2022,
- the established character of the area, and
- the nature and scale of the proposed development,

it is considered that **Additional Information** is required to ensure the proposed development would be in compliance with Council policy, would not seriously injure the amenities of the area or of property in the vicinity, and would, therefore, be in accordance with the proper planning and sustainable development of the area.

Recommendation

I recommend that **ADDITIONAL INFORMATION** be requested from the applicant with regard to the following:

1. (1) Western Access - The Planning Authority remains concerned with the proposed access via the neighbouring childcare facility lands to the south-west of the site. Insufficient information has been provided in regard to the right the applicant may have to use lands

Record of Executive Business and Chief Executive's Order

outside their control for this access. However, even if this concern can be overcome the Roads Department still has concerns that this arrangement impacts traffic safety, especially given that both sites would have different types of activities. The applicant is requested, therefore, to submit a revised proposal that relocates this access to a more appropriate location in regard to traffic safety. It is likely that the proposed building and floor area will have to be reduced in size to make way for the revised emergency access. The applicant should liaise with the Roads Department prior to providing a response.

(2) Eastern Access - The proposal includes an access to the east via an existing internal access road on the neighbouring site to the east. Again, there are concerns in regard to control over this access and traffic safety. The applicant is requested to submit evidence that they have legal right to utilise this access. This might be in the form of a written letter, detail of any right of way(s) and/or drawings. A revised layout plan showing a two-way (access/exit) design through this shared access which shows traffic priority and proposed road line markings is requested and should form part of the response to this item of Additional Information.

2. The Planning Authority remains concerned with regard to the visual impact of the proposed design of the structure:
 - (1) The building would be higher and closer to the northern boundary than neighbouring buildings. The view from the N4 should be slightly redesigned to break-up the façade and introduce more articulation in the design (in its current design it would appear as a bulky development from this view). The applicant should consider providing a setback at the top to reduce the bulk of the building and the top of this setback could also be of a lighter colour. The applicant is requested to submit a revised proposal addressing this concern.
 - (2) The Planning Authority welcomes the redesign of the front elevation and considers that this somewhat addresses concerns in regard to the visual impact of the building when viewed from the front (south). However, the inclusion of brick (brick similar in colour to the brick structures located both to the east and to the west of the site) within the front (south) and side (east) façade would help strengthen the streetscape at this location and connect the three buildings (proposed and two existing structures). The applicant is requested to submit revised proposals for the southern and eastern façades that incorporate significant sections of brick materials within the design.
3. There are concerns with the reliance on underground attenuation tanks to manage surface water onsite. The surface water drainage proposal is not considered to be sustainable and conflicts with the County Development Plan. SDCC do not approve of underground tanks unless the full natural potential of the site to manage surface water runoff has been explored. The drainage proposals deliver no amenity or biodiversity. The applicant is requested to revisit the design and layout of the proposed development and to submit revised plans and particulars to include:

PR/1596/21

Record of Executive Business and Chief Executive's Order

(a) Natural SUDS features shall be incorporated into the proposed drainage system. The SUDS shall be an integrated multi-disciplinary approach which locally addresses water quality, water quantity, and provides for amenity and biodiversity enhancement which meets the objectives of South Dublin County Council Development Plan 2016-2022.

(b) The applicant shall show natural SuDS features for the development such as green roofs, grass areas, channel rills, swales, detention basins, attenuations ponds/reed bed/wetlands and other such SuDS and show what attenuation capacity is provided by such SuDS. The use of underground tanks should be avoided.

(c) A detailed SUDS scheme for the proposed development to be agreed with Public Realm. The SuDS features should be integrated into the landscape proposal with details provided on how they work and their attenuation capacity.

4. The Roads Department requests that the applicant submit the following:

(a) A revised layout showing, a demarcated pedestrian route and dropped kerbs within basement and surface carpark.

(b) A revised car parking layout to include for an additional mobility impaired space (3 in total) to be located in the basement carpark.

(c) A revised layout showing additional bicycle parking spaces located internally for staff members of the development.

(d) A revised layout showing bin storage locations and waste collection arrangement.
