

ADDITIONAL INFORMATION

REFERENCE : SD21B/0490

Dear Sir/Madam

Enclosed in the new design for the above application you will notice the design is keeping with the original design of the TARA Hill house, keeping the original 'tear drop' window design, flat roofed and smooth render finish matching the original house. I enclose pictures of the original house. I also enclose pictures of other houses on my road. There is lots of different designs and porches, and extensions some of which are within the council's remit.

I have been in contact with the councils ACO and environment section in regard's the drainage pipe west of my property.

Finally the extension for our home is necessary for our family needs as we currently are overcrowded. We have 2 adult boy's an adult daughter and an 8 year old son with special needs. Myself and my wife are currently using our livingroom as our bedroom. Without an extra bedroom two of my older children will have to move into emergency accomadation. Finally in current covid times we really need an downstairs bathroom as there is only an upstairs bathroom. Kind Regards
Mark Carroll
