Re: RFI Planning Retention Application.
Apts at Milstone House, Old Nangor Road, Clondalkin, Co.Dublin
Storm Water SUDS.

Rory,

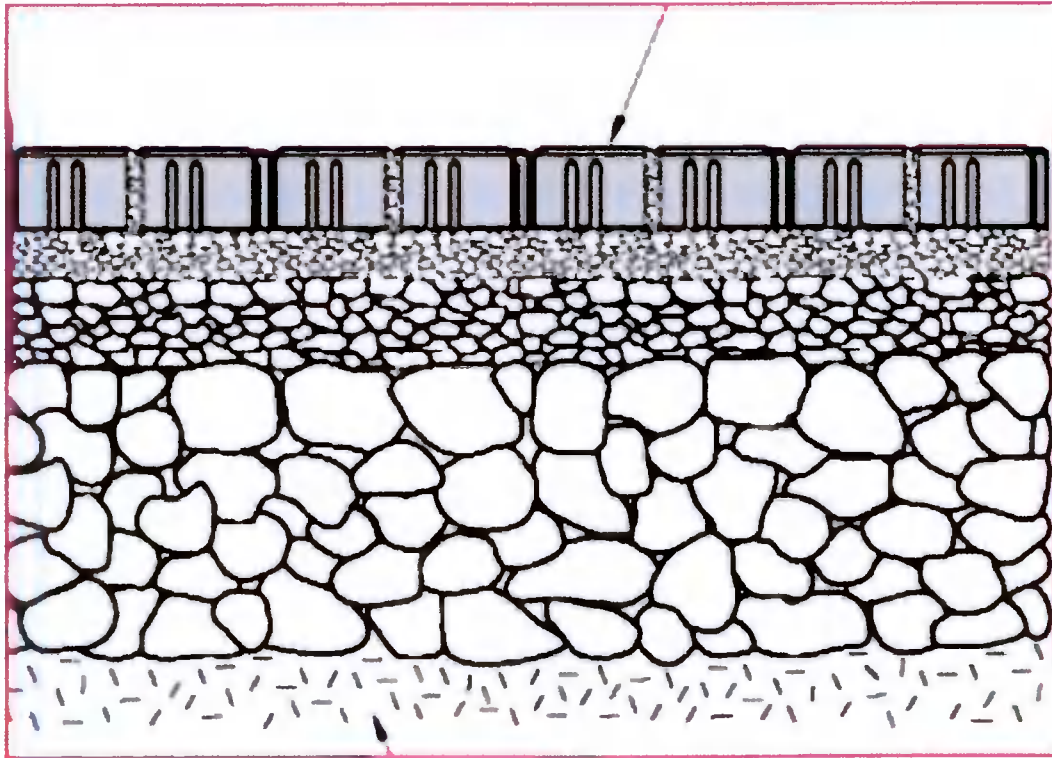

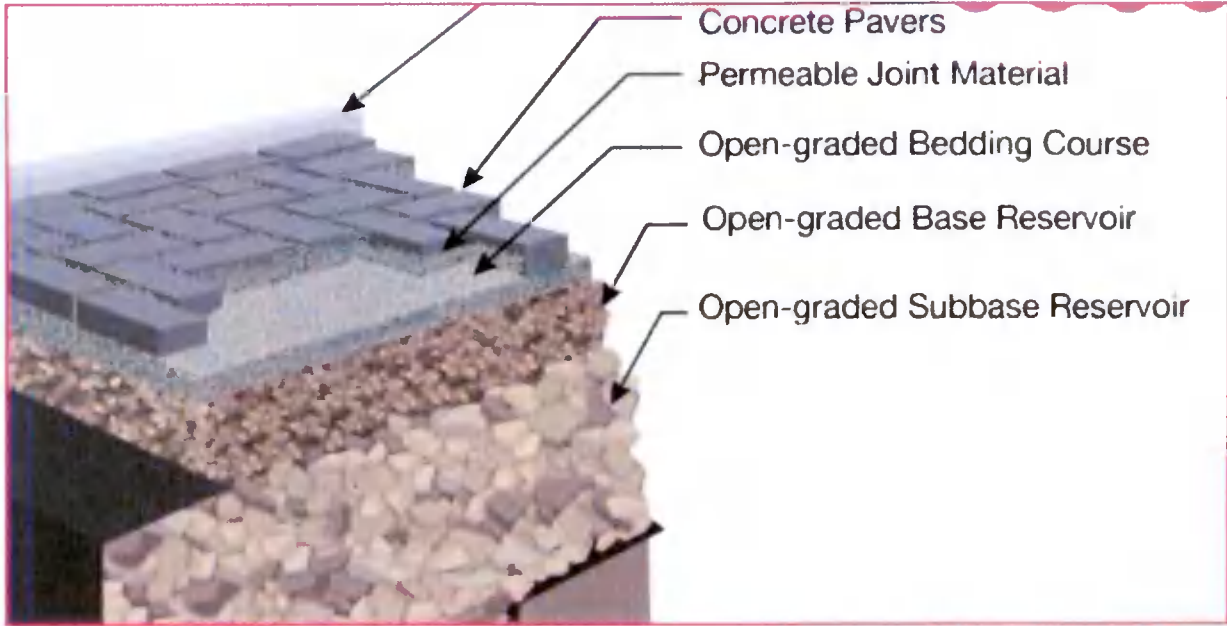

Further to our previous discussion in relation to improvements to disposal of Storm Water from the roofs of the existing structure which is the subject matter of this application for Change of Use, please note the following.

There is an existing paved area, within the site, at the rear of the building.

It is proposed to remove this concrete paving and to replace it with Permeable Pavement to provide a SUDS.

I have discussed this proposal with Brian Harkin, SEE, SDCC who agreed that it was an improvement on the current method of dealing with the Storm Waters on the site. See copy of Brian's email attached.

Also, see below details of proposed Permeable Paving proposed for the rear yard.

Kind regards,

Billy Moyles

To: Billy Moyles Senior Engineer,

Thank you for discussing this development by telephone today.

In general permeable paving is a preferred option to concrete because it is a SuDS feature.

All applications must go through the normal planning process and assessed by each respective department.

Please note that information provided in pre planning discussions is **for guidance only and does not mean that planning permission will or will not be granted.**

Yours sincerely.

Brian Harkin
