Damian,

I was in contact previously (below) in relation to IAA permission to use cranes on our construction site. We have also been in daily contact with Air Corp and have had no issues. This part of the construction process is now complete.

On another matter – our client has requested planning permission to install solar panels on the roof on our building. This has since been granted with one condition. We require IAA approval of the attached Glint and Glare report. Is this something you can respond to or can you please point me in the direction of someone who can. I will be writing to my Air Corp contact under separate cover.

I have attached the planning conditions with the relevant highlighted and the Glint and Glare Reports.

Thanking you for your assistance

Brian

Subject: RE: further corresp. from Baldonnel

Hi Brian,

Thank you for your email and the additional clarifications.

Based on the information provided and confirmed details of the arrangements with regard to the proposed cranes with Casement / Department of Defence, the IAA has no further specific requirements in relation to the proposed cranes at Aerodrome Business Park.

Best Regards,

Damian
