RE: Waste Management on Cloverhill Road Site

Dear Jason/Ray,

This letter is to verify our waste management plan in writing to help with our Additional Information requirements on the planning application for the Cloverhill Road site.

Operating Hours

We intend to open the facility on average 6 to 7 hours per week throughout the year due to the surface being natural grass. There will be less hours available during winter periods to give the surface time to recover and during dry periods between spring and autumn a greater amount of activity will be possible.

Waste

Currently we are gathering approximately 200 litres of general waste and 100 litres of recycling every two weeks.

Collection Arrangements

We have arranged for Thornton Recycling to be our waste partner and provide us with two 1,100 litre bins (general & recycling). Collections from Thorntons will be arranged by phone call 2 or 3 days in advance. Our current level of waste would give rise to one collection every two months or so.

Storage & Access

The bins will be stored next to the well & pumping system. As previously outlined, we will be surrounding this area with mesh fencing and under lock & key for security.

Access to the site by Thorntons will be provided by our volunteer groundman.

Bin Collection Cost

As per the quotation attached the price per collection will be €24 general waste and €8 recycling excluding vat.

Future Proofing

Our plans to further develop the site and to add artificial surfaces will increase site activity considerably. Therefore, we have chosen 1,100 litre bins so as activity increases the frequency of collections would rise too.

If you require any more information on this matter, please do not hesitate to contact me.

For and on behalf of the board of directors.

Yours faithfully,

Christopher Spellman
Treasurer
