

LEGEND:

- Category (A, A1, A2, A3) - These are high quality trees which in such a condition as to be able to make a substantial contribution to the urban environment (at least 40 years)
- Category (B, B1, B2, B3) - These are of moderate quality and value. These trees are considered to be able to make a significant contribution to the urban environment (at least 20 years)
- Category (C, C1, C2, C3) - These are low quality and value. These trees are considered to be able to make a contribution to the urban environment (at least 10 years) or young trees with a stem diameter below 100mm
- Category (U) - These are in such a condition that any existing value would be lost within 10 years and which should, in the normal course of management, be removed for reasons of safety or other reasons

AGE GROUPINGS:

- Y - YOUNG
- MA - MIDDLE AGE
- M - MATURE
- OM - OLDER MATURE
- V - VETERAN

D1 TREE PROTECTION FENCING
 02 Scale 1:50

TREE PROTECTION FENCING - BS 5837:2012 Trees in relation to design, demolition and construction

All tree protection works to be in accordance with BS 5837:2012 and approved by Contract Administrator / Project Arborist / Landscape Architect.

All trees to be retained on site are to be protected by effective fencing defining the Construction Exclusion Zone (CEZ). The fencing excludes construction activities from the Root Protection Area (RPA) which contains sufficient rooting volume to ensure the survival of the tree.

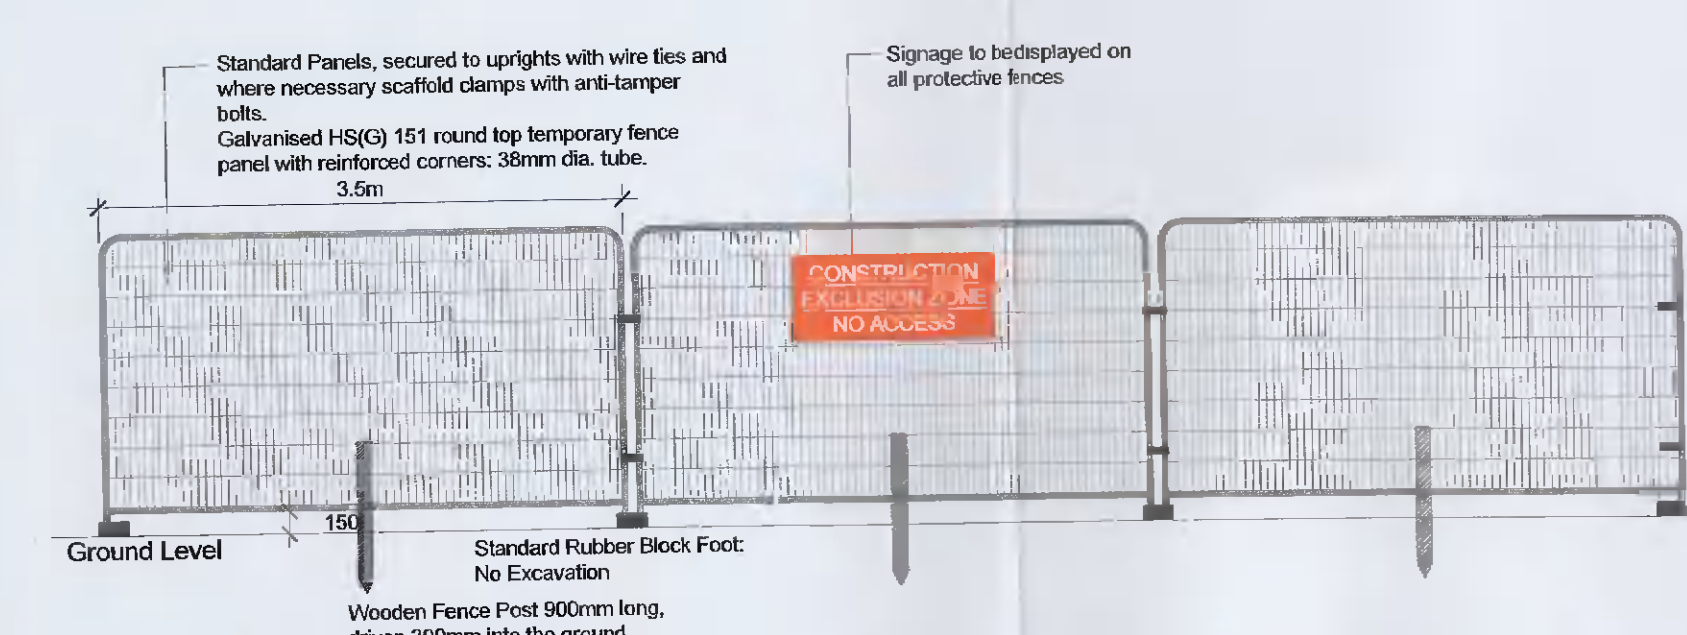

Fencing is to be installed before any materials or machinery are brought onto the site and before any demolition or development commences.

Once erected, fencing is to be regarded as sacrosanct, and should not be removed or altered without the prior consultation with the consulting Arborist or Landscape Architect.

No access is to be permitted for workers to areas behind fencing line (except for specific works such as construction of no-dig paths or planting or with written authorisation from Contract Administrator / Project Arborist / Landscape Architect), no works may be carried out in this area, no materials, machinery, tools, soil or other objects can be stored here and absolutely no excavation may be carried out.

Protective fencing should consist of galvanised steel mesh panels in accordance with drawing (right) comprising a vertical and horizontal framework, staked in place and braced to resist impacts.

Notices should be erected on the fence with following wording:
CONSTRUCTION EXCLUSION ZONE: NO ACCESS

TREE PROTECTIVE BARRIER - BS 5837:2012 TREES IN RELATION TO CONSTRUCTION
 Item Nos. 6.2 Technical Design and 7 Demolition and construction in proximity to existing trees

Trees to be removed to accommodate swale in this area. Native replacement tree planting proposed. See Landscape Plan: DB080-MA-LS-XX-DRL-PLNT-1050
