Re: Local Government (Planning & Development) Acts 1963 to 2000 (as amended) and Regulation 2009-2018 (as amended) - permission for to construct a 25 metre high free standing monopole type structure carrying antenna and communication dishes, within an existing 2.4m high palisade compound at ESB's Palmerstown 38kV Substation, Kennelsfort Road Upper, Palmerstown, Dublin 20.

Dear Sir/Madam

We write in connection with the above-mentioned site to formally submit a planning application for the permission for the proposed development as outlined above.

The existing structure can no longer accommodate 2 operators due in part to the ending of an equipment sharing arrangement between the two entities currently sharing co-locating on the 18m monopole structure. Furthermore, said structure is not capable of facilitating more the modern antennae required for more recent technological iterations of mobile broadband technologies. A technical justification by Eir for the proposed development is included as part of the application. Coverage plots showing impact on Eir's mobile coverage in the vicinity of this structure are included in Appendix 1. RF Emissions tests taken by ESBT contractors on a bi-annual basis have been included in Appendix 2, showing the emissions from the site to be far lower than the safe levels set by ICNIRP.
