1. Introduction

1.1 Overview

AECOM has been commissioned by Randelswood Holdings Ltd. to prepare a Mobility Management Plan (MMP) in support of proposed alterations to the permitted (Ref. ABP-307092-20) 250 unit 'Build to Rent' residential development on lands at Palmerstown Retail Park, Palmerstown, Dublin 20.

The development was granted planning permission by An Bord Pleanála in September 2020. The planning consent consisted of the provision of 250 no. 'Build to Rent' apartments (128 no. 1 beds, 122 no. 2 beds) in 5 no. blocks; with a café and ancillary residential amenity facilities.

The lands on which the proposed development will be constructed are brownfield, consisting of existing commercial properties which are to be demolished as part of this development.

To accompany this MMP, a Traffic and Transport Assessment (TTA) has also been prepared by AECOM, which outlines the traffic and transportation impacts associated with the development proposals. The TTA should be read in conjunction with this MMP.

The permitted SHD scheme is now under construction with demolition and excavation works well underway. The planned construction is proposed to alter as part of this application.

1.2 Objectives

The focus for a MMP depends on the particular nature of the site it covers. More generally, the aim is to promote more sustainable modes of transport. This MMP has been prepared in accordance with Section 11.4.6 of the South Dublin County Development Plan, which states the following:

"A Workplace Travel Plan or Mobility Management Plan, outlines a series of measures to encourage sustainable travel modes and reduce car borne traffic within a development. Initiatives might include proposals to encourage cycling and walking, car sharing (including car clubs), carpooling, flexible working hours, cycling and public transport use".

The Plan outlines the transport measures, initiatives and incentives which will be available to the prospective residents and visitors of the development as a means of reducing car dependency, in the interest of compliance with the following transport initiatives:

- **South Dublin County Development Plan Draft (2022-2028)**; Which stipulates in Chapter 7 a number of aims and policies to promote the use of sustainable modes of transport such as walking, cycling and public transport.
- **South Dublin County Development Plan (2016 – 2022)**; which stipulates a number of aims and policies to promote the use of sustainable modes of transport such as walking, cycling and public transport.
- **Design Manual for Urban Roads and Streets, DMURS**, May 2019 (Dept of Transport, Tourism and Sport/ Dept of Environment, Community & Local Govt); Which aim to put well-designed streets at the heart of sustainable communities.
- **Geometric Design of Junctions** (priority junctions, direct accesses, roundabouts, grade separated and compact grade separated junctions), DN-GEO-03060, (TII, June 2017); This Standard sets out the standards and advice for the geometric design of junctions. The design principles and geometric parameters which shall be considered by Designers when developing safe, traffic efficient junction layouts and vehicular accesses onto new and improved National roads are outlined.
- **PE-PDV-02045 Traffic and Transport Assessment Guidelines** (May 2014), Transport Infrastructure Ireland; The production of Traffic and Transport Assessment Guidelines aims to provide a framework to promote an integrated approach to development, which ensures that proposals promote more efficient use of investment in transportation infrastructure, reduce travel demand and promote road safety
- **Greater Dublin Area Cycle Network Plan** (National Transport Authority);

- **National Cycle Manual** (National Transport Authority, 2011); and This Manual embraces the Principles of Sustainable Safety as this will offer a safe traffic environment for all road users including cyclists. It offers guidance on integrating the bike in the design of urban areas.
- **Transport for Ireland Dublin Area Train and Tram Services** (Transport for Ireland).

As such, the key aims of this MMP are as follows:

1. To encourage behavioural and attitude changes toward healthy and sustainable travel;
2. Improve facilities for walkers and cyclists;
3. To improve existing transport; and
4. To minimise the number of individual journeys made to/from Palmerstown Business Park

The key objective of this MMP is to set out the infrastructural proposals and modal split targets for the development in general terms. The plan will then be further developed and informed by travel surveys undertaken by prospective residents of the subject site once the proposed development has been occupied.

1.3 Structure of this Mobility Management Plan

The remainder of this report is divided into the following sections:

- Section 2 provides a review of the relevant guidance and policy documents that have helped establish the principles of this report;
- Section 3 summaries the results of a detailed site audit to understand the transportation context in which the proposed development is located;
- Section 4 provides a summary of the proposed development itself with regard to the key MMP objectives.
- Section 5 outlines the estimated travel behaviours of the subject site;
- Section 6 proposes a series of targets of the projected modal splits of the proposed development;
- Section 7 outlines the mobility management measures to be implemented and considered as part of the Mobility Management Plan;
- Section 8 details the monitoring and review process for the MMP; and
- Section 9 presents a summary of the Mobility Management Plan for the development.

2. Policy Context

2.1 Overview

In order to complete this MMP, AECOM has made reference to the following documents and websites:

- South Dublin County Development Plan Draft (2022 – 2028);
- South Dublin County Development Plan (2016 – 2022);
- Transport Strategy for the Greater Dublin Area 2016 – 2035 (National Transport Authority)
- Project Ireland 2040,
- Smarter Travel: A Sustainable Transport Future: A new Transport Policy for Ireland, 2009 – 2020, (Department of Transport Tourism and Sport (DTTAS), 2008);
- Greater Dublin Area Cycle Network Plan (National Transport Authority);
- The National Cycling Policy Framework 2010; and
- Transport for Ireland Dublin Area Train and Tram Services (Transport for Ireland);

The planning policies will aid in preparing a strategy that, upon implementation, will reduce the overall single vehicle dependence and increase more sustainable forms of transport through incentives and create a positive sustainable transport environment for residents while adhering to the local and national policies.

2.2 South Dublin County Development Plan (2016 – 2022);

South Dublin County Council 2016 - 2022 sets out the vision, policies, strategies and objectives for planning and sustainable development within South Dublin. In the context of the subject site a number of the most relevant policies include:-

TRANSPORT AND MOBILITY (TM) Policy 1 Overarching

It is the policy of the Council to promote the sustainable development of the County through the creation of an integrated network that services the needs of communities and businesses. to support the delivery of sufficient public transport and road capacity to facilitate sustainable new development in the County.

TRANSPORT AND MOBILITY (TM) Policy 2 Public Transport

It is the policy of the Council to promote the sustainable development of the County by supporting and guiding national agencies in delivering major improvements to the public transport network and to ensure existing and planned public transport provide an attractive and convenient alternative to the car. To secure the implementation of major public transport projects as identified within the relevant public transport strategies and plans for the Greater Dublin Area.

TRANSPORT AND MOBILITY (TM) Policy 3 Walking and Cycling

It is the policy of the Council to re-balance movement priorities towards more sustainable modes of transportation by prioritising the development of walking and cycling facilities within a safe and traffic calmed street environment. To ensure that all streets and street networks are designed to priorities the movement of pedestrians and cyclists within a safe and comfortable environment for a wide range of ages, abilities and journey types

TRANSPORT AND MOBILITY (TM) Policy 5 Traffic and Transport Management

It is the policy of the Council to effectively manage and minimise the impacts of traffic within the County. To effectively manage the flow of through traffic along the strategic road network and maximise the efficient use of existing road resources.

2.3 South Dublin County Development Plan Draft (2022 – 2028);

South Dublin County Council Draft development plan 2022 - 2028 sets out the vision, policies, strategies and objectives for planning and sustainable development within South Dublin. In the context of the subject site a number of the most relevant objectives include:-

TRANSPORT AND MOVEMENT (SM1) Objective 4

To ensure that future development is planned and designed in a manner that facilitates sustainable travel patterns, with a particular focus on increasing the share of active modes (walking and cycling) and public transport use and creating a safe and attractive street environment for pedestrians and cyclists, in accordance with RPO 5.3 of the RSES/MASP

TRANSPORT AND MOVEMENT (SM1) Objective 5

To ensure that future development is planned and designed in a manner that maximises the efficiency and protects the strategic capacity of the metropolitan area transport network, both existing and planned, and to protect and maintain regional accessibility, in accordance with RPO 8.3 of the RSES.

2.4 Transport Strategy for the Greater Dublin Area, 2016 – 2035

The Transport Strategy for the Greater Dublin Area (2016 – 2035), which has been prepared by the National Transport Authority, with the purpose of the strategy being:

To contribute to the economic, social and cultural progress of the Greater Dublin Area by providing for the efficient, effective and sustainable movement of people and goods.

Chapter 5 of the Transport Strategy for the Greater Dublin Area, sets out the “strategic infrastructure that is proposed to be delivered within the lifetime of the strategy”. The strategy proposals are presented by the various modes of transport as follows:

- *Heavy Rail Infrastructure;*
- *Light Rail Infrastructure;*
- *Bus Infrastructure;*
- *Cycling Infrastructure;*
- *Walking; and*
- *Road network.*

Within each section of the modes of transport the NTA outline the proposed measures to be adopted when providing a development and the considerations that have to be given.

2.5 Project Ireland 2040

The National Planning Framework (NPF), published in February 2018, is a national document intended to guide at a high-level strategic planning and development for Ireland over the next 20+ years, so that as the population grows, that growth is sustainable (in economic, social and environmental terms). The NPF details ten National Strategic Outcomes’ and the National Development Plan 2018 – 2027 outlines how public capital investment over the next ten years aims to secure the realisation of each of these under corresponding ‘Strategic Investment Priorities’. The National Development Plan 2021-2030 outlines how an ‘infrastructure led recovery’ and a ‘green recovery’ is detailed in this vision for Ireland over the next 10 years.

National Strategic Outcome No. 4 (p.53) states that:

An environmentally sustainable public transport system will enable growth and change; meet the significant increase in travel demand and urban congestion while also contributing to our national policy vision of a low-carbon economy. A step change is required under the NPF in putting in place environmentally sustainable public transport systems in order to secure Ireland’s climate action goals. These must represent a decisive shift away from polluting and carbon-intensive propulsion systems to new technologies such as electric vehicles and introduction of electric and other alternatively fuelled systems for public transport fleets. The expansion of attractive and sustainable public transport alternatives to private based car transport will reduce congestion and emissions and enable the transport sector to cater in an environmentally sustainable way for the demands associated with longer term population and employment growth envisaged under the NPF. Furthermore, the provision of safe alternative active travel options such as segregated cycling and walking facilities can also help alleviate congestion and meet climate action objectives by providing viable alternatives and connectivity.

2.6 Smarter Travel – A sustainable Transport Future

The Smarter Travel policy published in 2009 set a goal to reduce work-related commuting by car nationally in Ireland from 65 percent to 45 percent by 2020. The policy set out forty-nine difference actions to achieve a more sustainable transport system grouped into four overarching actions outlined on page 29 of the policy as follows:

- Actions to reduce distance travelled by private car and encourage smarter travel, including focusing population and employment growth predominantly in larger urban areas and the use of pricing mechanisms or fiscal measures to encourage behavioural change;
- Actions aimed at ensuring that alternatives to the car are more widely available, mainly through a radically improved public transport service and through investment in cycling and walking
- Actions aimed at improving the fuel efficiency of motorised transport through improved fleet structure, energy efficient driving, and alternative technologies; and
- Actions aimed at strengthening institutional arrangements to deliver the targets.

The smarter Travel policy emphasises the potential of mobility management to encourage people to change their travel behaviour and committed to ensuring better integration of land use planning (Action 2) as well as to requiring and encouraging large workplaces to develop and implement workplace travel plans (Action 8) and that personalised travel plans should be prepared to encourage citizens to use public forms of transport (Action 9).

ACTION 2

We will ensure better integration of land use planning and transport policies in the relevant planning guidelines as part of their ongoing review and we will avail of policy directives to give effect to specific measures needed to meet the vision for sustainable travel.

The following will also be included in future planning guidelines:

- *A general requirement that significant housing development in all cities and towns must have good public transport connections and safe routes for walking and cycling to access such connections and local amenities*
- *Integration of cycling and public transport*
- *Promotion of targets requiring a minimum percentage of new residential and mixed-use development to take place on brownfield/existing sites to consolidate urban growth and enable organic development of urban areas from the centre out*
- *Ensuring a general minimum housing density of between 35 and 50 dwellings per hectare in urban areas of suitable size and population and requiring substantially higher densities where local circumstances warrant, particularly in high capacity public transport corridors*
- *Specification of a maximum permitted level of car parking for commercial sites, which have suitable public transport facilities and are within walking/ cycling distance to amenities requirement that developments above a certain scale have viable travel plans in place*
- *A requirement that development in urban rail corridors be high density and appropriate for public transport use (e.g. not warehousing or other activities with low employment intensity)*
- *Guidance on the incorporation of cycling and walking policies in development plans*
- *A general restriction of the future development of out-of-town retail centres except in exceptional circumstances and consideration of a similar requirement that parking charges be introduced for most existing centres*
- *Encouragement of the use of local area plans and strategic development zones (SDZs) within major urban areas as a way of improving the land use-transport interface, particularly to ensure that employment and residential centres are co-located.*

ACTION 8

Workplace Travel Plans encourage employers and employees to take steps to reduce dependency on the car and to take alternative transport options. The Minister for Transport has already provided initial funding for a pilot scheme managed by the Dublin Transportation Office (DTO) and the Department of Transport was the first Department to introduce such a Plan. The Government has also introduced a parking levy on employee car parking

in key urban areas in the region of e200 per annum to dissuade use of the private car for commuting purposes. We will now focus on encouraging alternative ways of travelling to work. We will, therefore:

- *Work towards a requirement on organisations with over 100 staff to develop and implement workplace travel plans;*
- *Provide support and guidelines for the development and implementation of workplace travel plans; and*
- *Seek a plan from the Office of Public Works to reduce car-parking spaces at Government offices where alternative travel options are possible and require other public sector organisations to do likewise as part of their workplace travel plans.*

ACTION 9

Personalised travel plans aim to encourage individuals to take alternatives to car travel where these are available. International experience shows that such plans must be accompanied by good targeted marketing and involve incentives to encourage people to use alternatives to the private car. We will implement a programme to promote Personalised Travel Plans aimed at citizens in areas served by Public Transport.

3. Existing Infrastructure

3.1 Overview

This section of the report outlines the available transport facilities within the receiving environment of the site which can be utilised to reduce the number of single vehicle trips and promote the use of sustainable forms of transport. A review of the existing baseline conditions has been undertaken including the existing site layout, the local road network, pedestrian / cycling facilities, public transport and committed development.

3.2 Existing Site Access

Existing vehicular access to the eastern section of the site is provided at Kennelsfort Road Lower. This access point serves the existing commercial properties located on the subject site.

The western section of the site is currently accessed from the Old Lucan Road via the Palmerstown Business Park as illustrated in Figure 3.1 below.

Figure 3.1 – Existing Site Access Locations

3.3 Local Road Network

The subject site is located approximately 8km west of Dublin City Centre, situated along the Chapelizod Bypass and Kennelsfort Road Lower which are to form part of the Core Bus Corridor Project, Route No. 6 – Lucan to City Centre. Travelling west from the site will bring motorists to the M50 Junction 4 which allows motorists to access the wider road network.

The general location of the subject site in relation to the surrounding road network is illustrated in Figure 3.2 whilst Table 3.1 indicates a number of key destinations that the residents of the development may travel to and their distances from the site.

Table 3.1 – Distances to Points of Interest

Ref	Key Destinations	Distance from site
1	Liffey Valley Shopping Centre	3.0 km
2	Blanchardstown Retail Park	7.2 km
3	Dublin City University (DCU)	14.7 km
4	Heuston Station	5.9 km
5	Connolly Station	9.1 km
6	Trinity College Dublin (TCD)	8.3 km
7	Technical University Dublin (TUD)	8.9 km

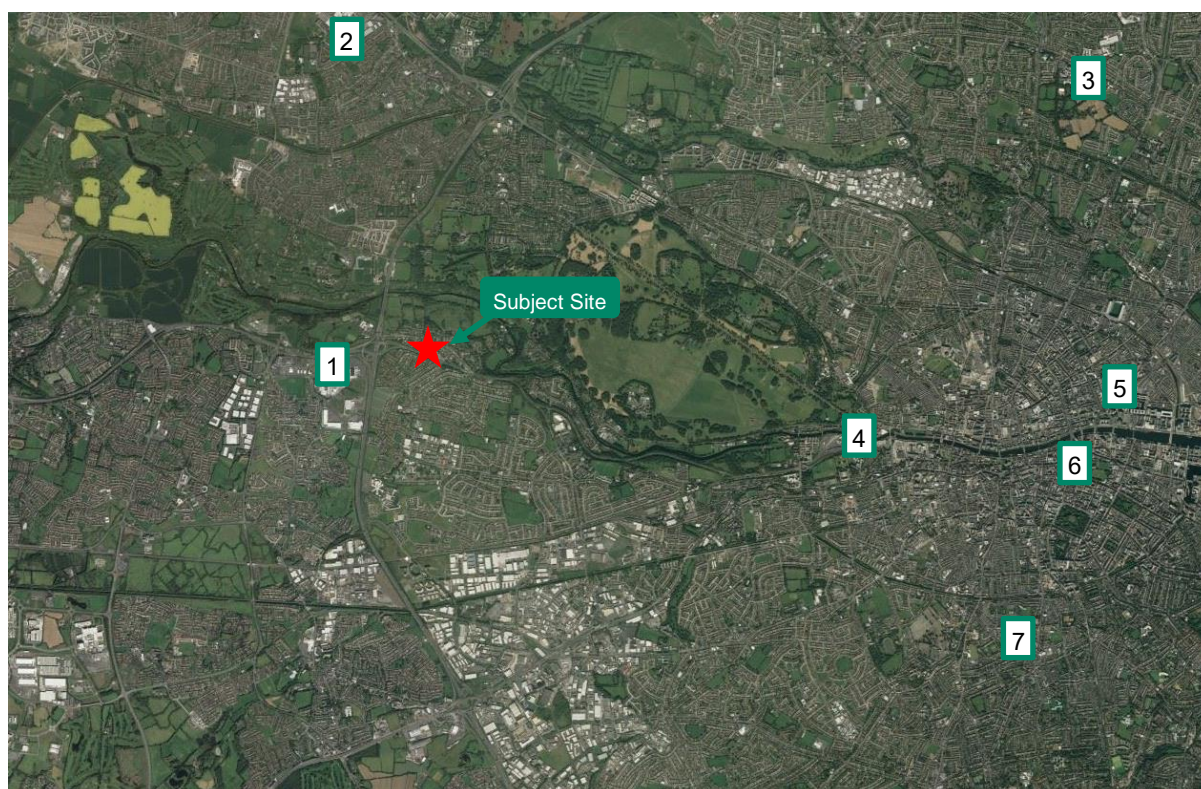

Figure 3.2 – Points of Interest (Source: Bing Maps)

3.4 Pedestrian Facilities

In the vicinity of the subject site there are pedestrian footways along both sides of the Kennelsfort Road Lower. There is a signalised pedestrian crossing provided on Kennelsfort Road Lower adjacent to the site, north of the existing vehicular access point. The aforementioned crossing leads to a pedestrian footbridge across the Chapelizod Bypass, which allows pedestrians to access Kennelsfort Road Upper.

East of the subject site, there are pedestrian footways available along the Chapelizod Bypass providing access to the bus interchanges situated adjacent to the pedestrian footbridge.

Figure 3.3 illustrates the existing pedestrian routes leading to and from Palmerstown from the external road network.

Figure 3.3 – Public Pedestrian Connections/Facilities (Source: Bing Maps)

3.5 Cycling Facilities

Cycle lanes are provided to the south of the proposed development along Kennelsfort Road Upper connecting with the Ballyfermot Road at Cherry Orchard Industrial Estate. From there, there are staggered cycle lanes to the east and west along Ballyfermot Road and Oldcut Road.

To access this cycle lane from the entrance to the site, cyclists can cycle through the existing signalised junction between the Chapelizod Bypass and the Kennelsfort Road.

There is also a pedestrian and cyclist bridge to the south east of the development to facilitate pedestrians and cyclists crossing the M50 and with access to Liffey Valley Shopping Centre. The recently completed Palmerstown Cycle Track commences close to the site, which enhances connectivity towards Dublin City Centre from Palmerstown. Figure 3.4 illustrates the existing cycle facilities available on the routes leading to/from the subject site.

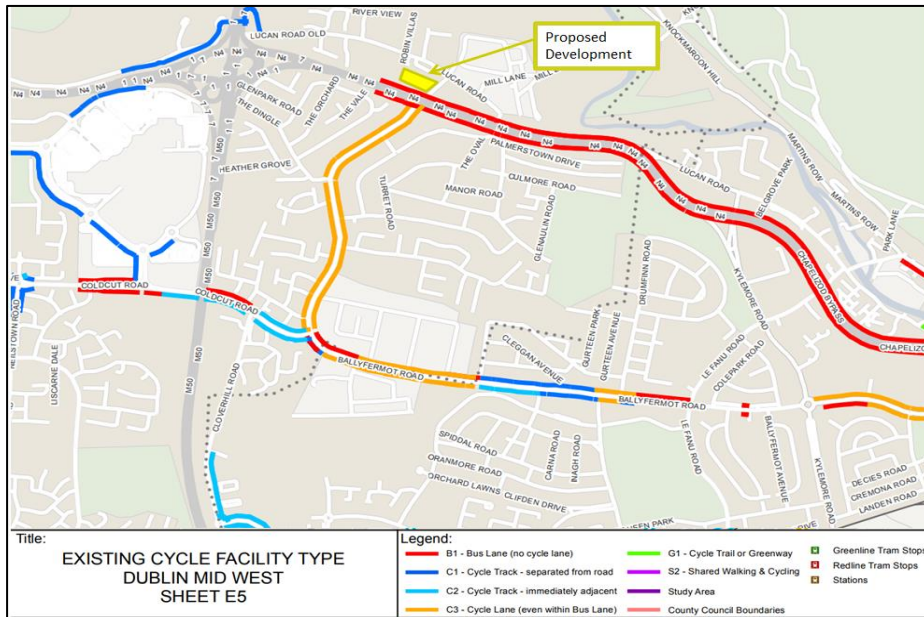

Figure 3.4 – Existing cycle Routes Leading to/from (Source: NTA)

3.6 Bus Services

As graphically illustrated in Figure 3.5 below, the site is situated to benefit from bus transport connections allowing residents of the subject site to travel by this sustainable mode.

The closest bus stops to the site are located on Kennelsfort Road Lower and Chapelizod Bypass approximately 50 meters north-east of the site and 50m south-east of the site, respectively. These bus stops are served by a number of Dublin Bus Routes, as detailed in Figure 3.6 below. The majority of these services are destined for the Dublin City Centre (Merrion Square), travelling on the Chapelizod Bypass and there are high frequency services travelling along these routes. In the opposite direction, travelling outbound from the city, there are services destined for Maynooth, Dodsboro, Lucan and Adamstown, also travelling on the Chapelizod Bypass.

Importantly, the area is serviced by the Lucan QBC, a high Quality Bus Corridor that gives dedicated road space and traffic signal priority to buses in order to reduce journey times and improve service consistency.

To the east of the site, on the Kennelsfort Road Upper bus services are provided in the destination of Sandymount, servicing Kimmage, Rathmines, Ranelagh, Ballsbridge and Sandymount.

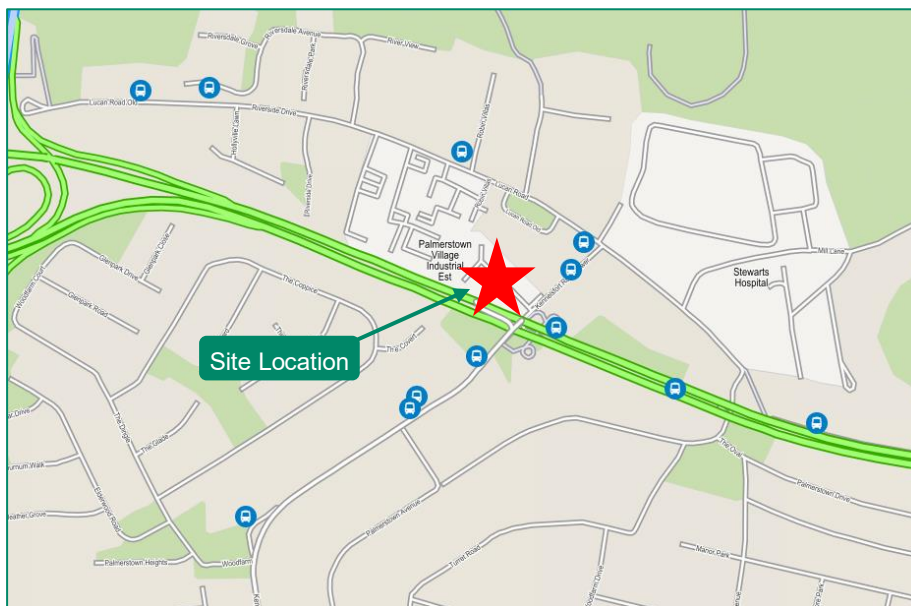

Figure 3.5 – Bus Stops in the Vicinity of the Site (Source: www.journeyplanner.transportforireland.ie)

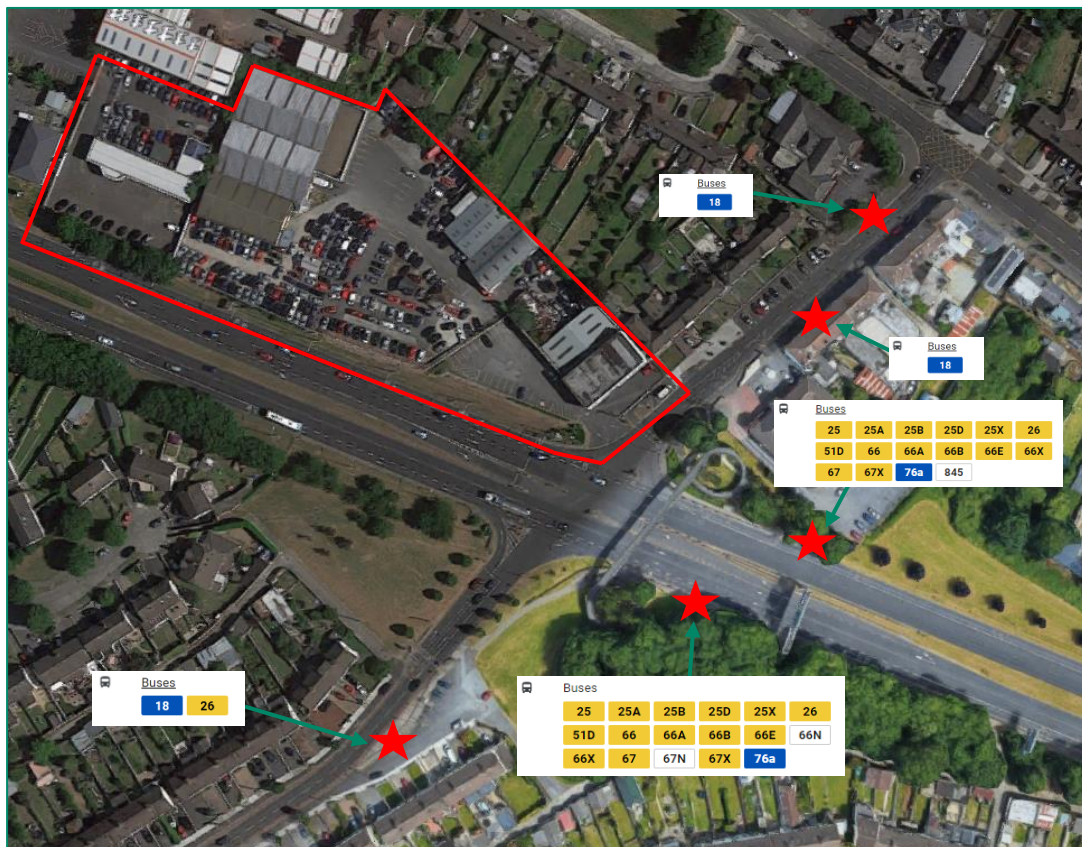

Figure 3.6 – Existing Bus Services (Source: Google Maps)

3.7 Heavy Rail Network

The closest railway station to the site is Park West and Cherry Orchard, located 3.3km (45 minute walking distance) to the south of the development. It provides commuter rail services to/from Dublin Heuston and Dublin Grand Canal Dock. Alternatively Heuston Station is accessible via Dublin Bus route 25a and 25b with an approximately 12min travel time.

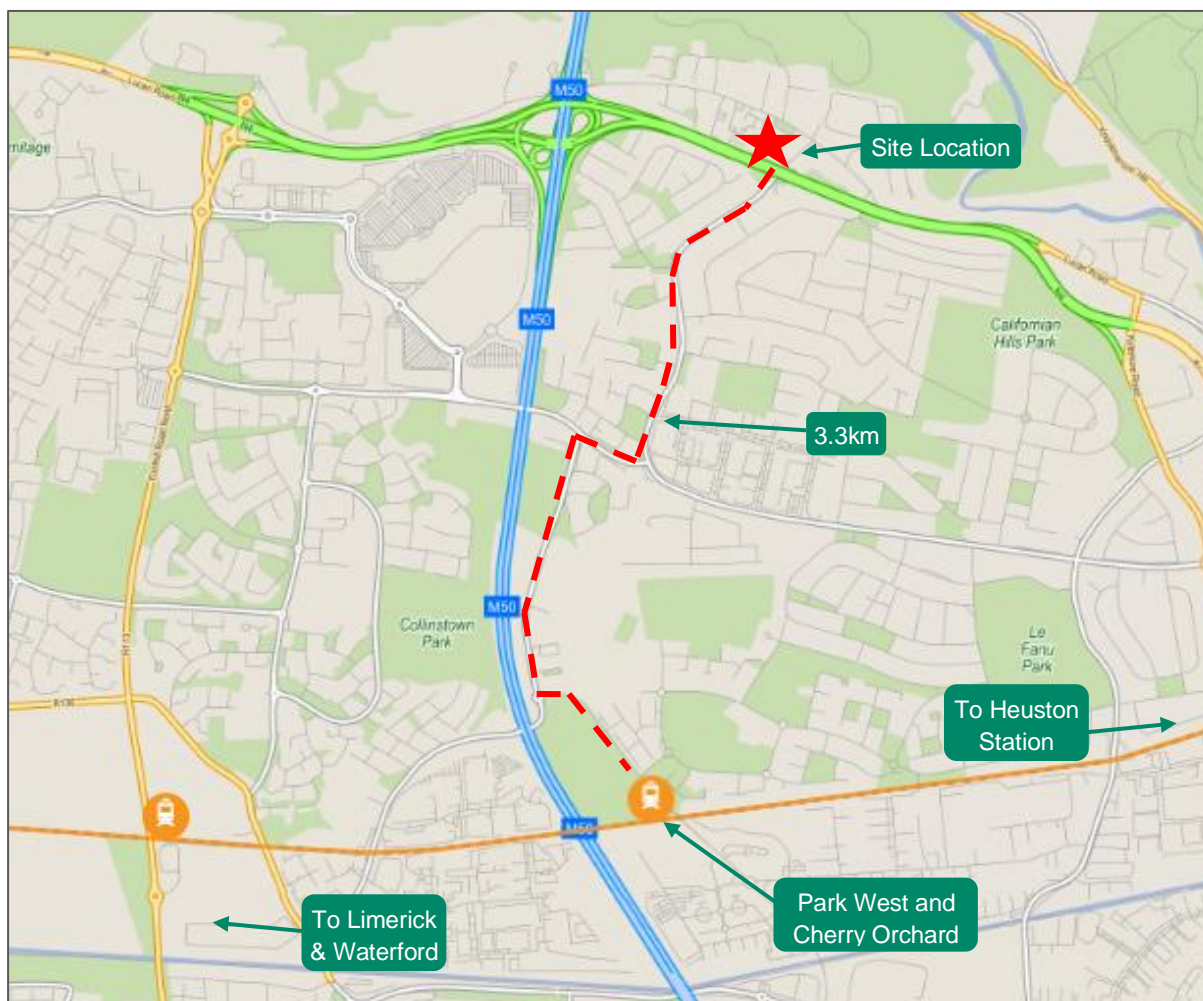

Figure 3.7 – Park West and Cherry Orchard (Source: journeyplanner.transportforireland.ie)

3.8 Public Transport – Light Rail

There is no light rail within walking distance of the site with the nearest Luas stop being Kylemore on the Luas Red Line approximately 4.5km from the site however, the Luas Red Line running from Saggart/Tallaght to Connolly/The Point is accessible at Heuston Station which can be reached via Dublin Bus route 25a and 25b in 12min from the proposed development.

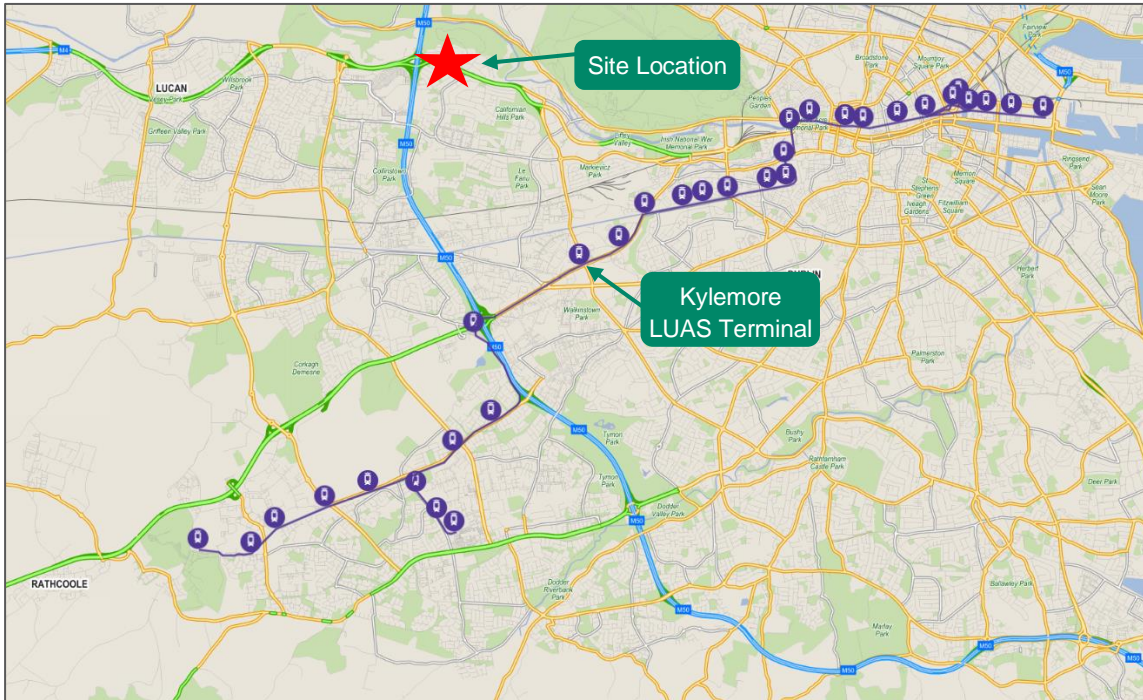

Figure 3.8 – Luas Red Line Route (Source: www.journeyplanner.transportforireland)

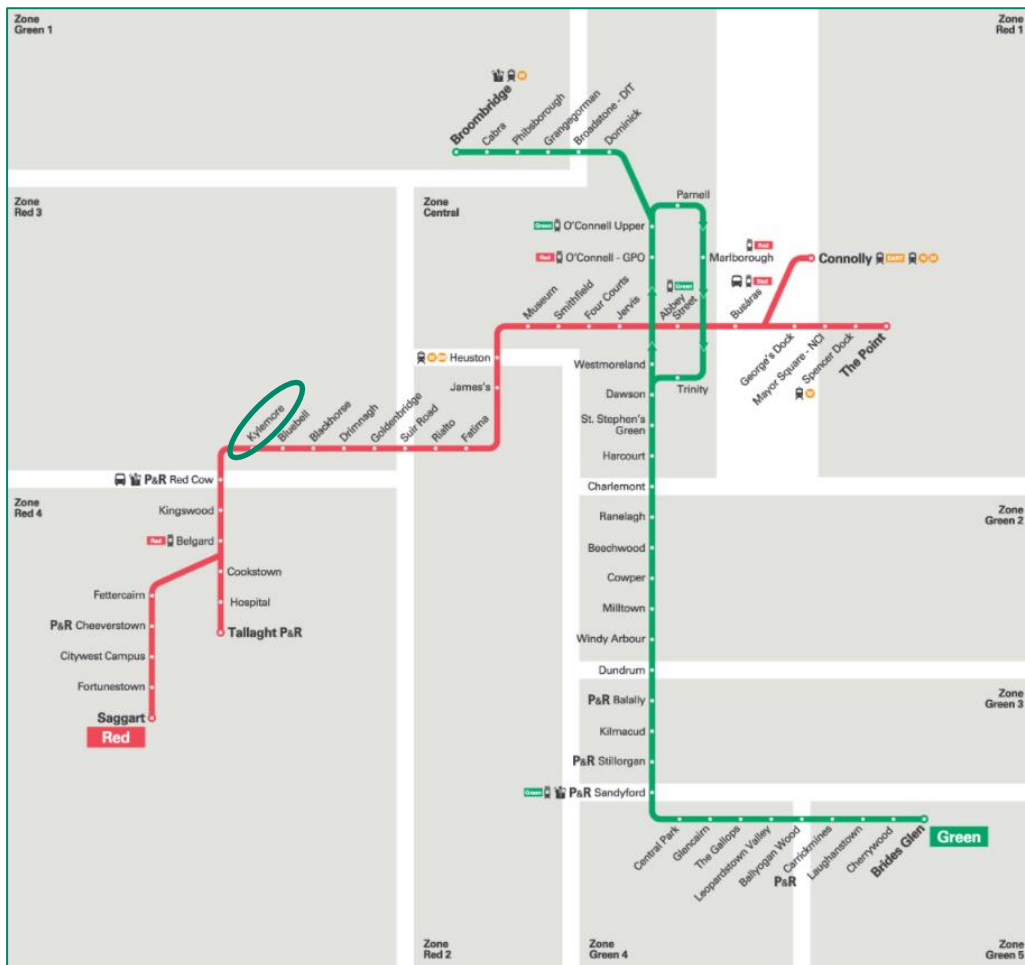

Figure 3.9 – Luas Stops and Zones (Source: Luas.ie)

3.9 Go Car Hire

There are a variety of GoCar hire stations located within a 2.5km walking distance of the site. GoCar members can book cars online or via the app for durations as little as an hour. Then unlock the car with their phone or a GoCard; the keys are in the car, with fuel, insurance and city parking all included. The benefits of such car sharing services include:

- The reduction of cars on the road and therefore traffic congestion, noise and air pollution;
- Frees up land traditionally used for private parking spaces, but which may not be tested;
- Increases use of public transport, walking and cycling as the need for car ownership is reduced; and
- Car sharing allows those who cannot afford a car the opportunity to drive, encouraging social inclusivity.

There are a 5 No. Go Car bases situated within a 2.5km walking of the site, with the closest facility available on the Lucan Road, approximately 0.25 km from the subject site, as illustrated in Figure 3.10 and Table 3.2.

Table 3.2 – GoCar Locations within 2.5km of the site

Ref No.	Go Base	Vehicle Class	Approx. Distance from the Development
1	Lucan Road, Palmerstown	GoCity	0.25 km
2	Kennelsfort Road Upper	GoCity	0.35 km
3	Manor Road, Palmerstown	GoCity	0.75 km
4	Tesco, Liffey Valley Retail Park	GoCity, GoCargo	2.5 km
5	Liffey Valley Retail Park	GoCity, GoCargo	2.4 km

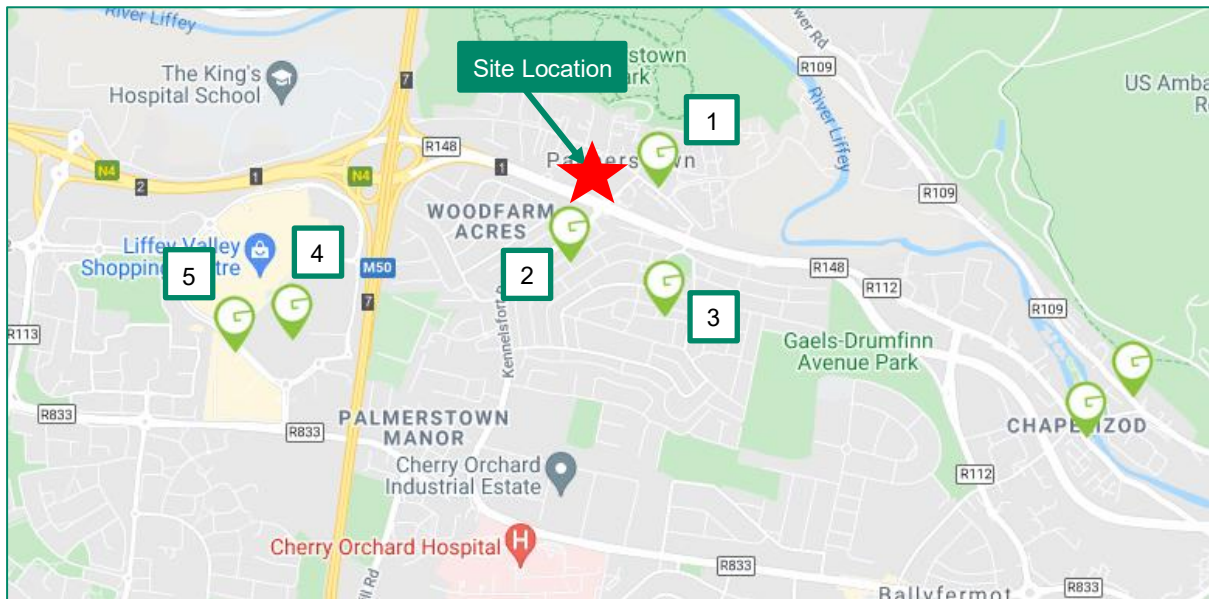

Figure 3.10 – Go Base Locations (Source: gocar.ie)

3.10 Emerging Transport Developments

3.10.1 Cycle Network Proposals

In the vicinity of the subject site, it is planned to upgrade the Old Lucan Road north of the site as Figure 3.11 below shows the proposed cycle network upgrades as part of the Cycle Network Plan for the Greater Dublin Area.

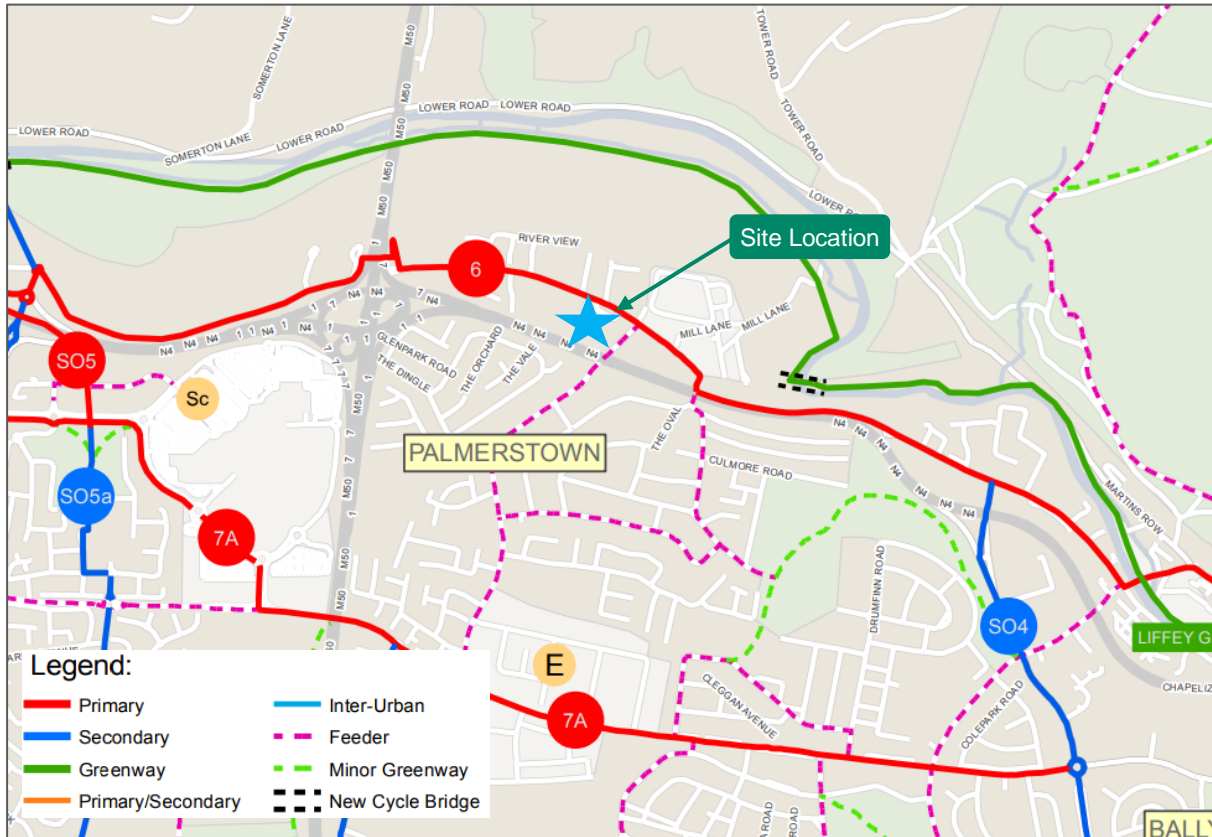

Figure 3.11 – Proposed Cycle Network Upgrades (Source: www.nationaltransport.ie)

3.10.2 Bus Network Proposals – BusConnects

The National Transport Authority (NTA) has put forward proposals to upgrade a number of core bus corridors from the Dublin environs to the city centre under the title ‘BusConnects’. The aim of this project is to:

- *‘Make bus journeys faster, predictable and reliable*
- *New bus stops and better facilities*
- *More efficient network, connecting more places and carrying more passengers*
- *Updated ticketing systems and implementing a cashless payment system with a simpler fare structure*
- *Improving the cycling network and making it safer’*

The development site is situated along ‘Route No. 6 – Lucan to City Centre’, Figure 3.12 and Figure 3.13 below shows the proposed route in relation to the development and the preliminary proposed upgrades to the road network, respectively. It should be noted, the BusConnects proposals have yet to be finalised.

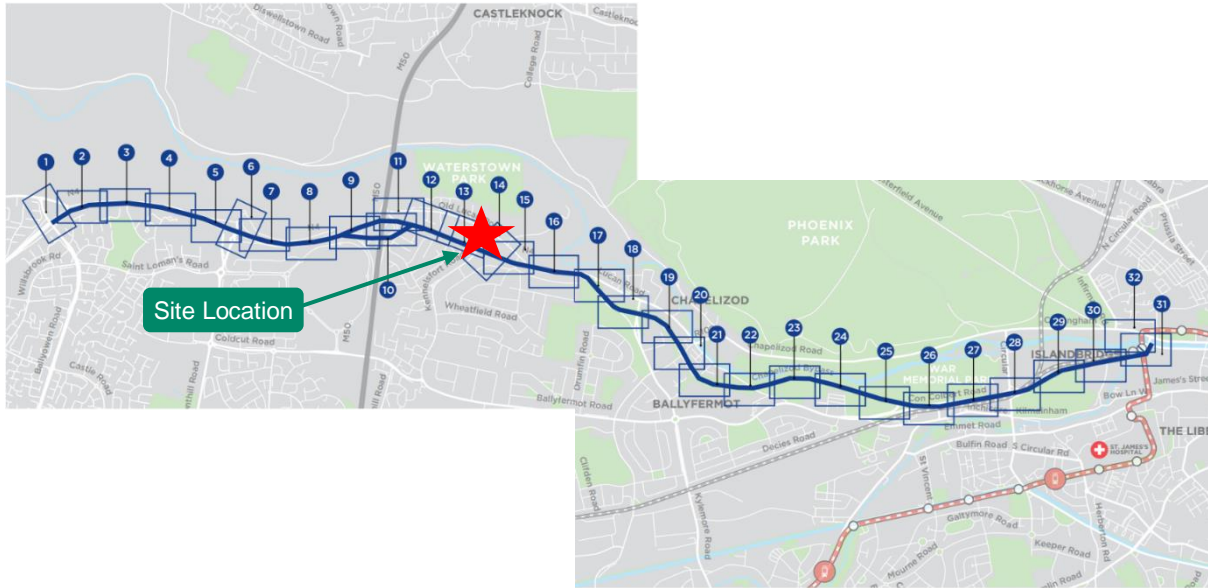

Figure 3.12 – Site Location in Relation to Bus Connects Proposal (Source: 6. Lucan to City Centre - Index Map, Bus Connects.ie)

Figure 3.13 – Bus Connects Proposal (Source: 6. Lucan to City Centre – Map 14, Bus Connects.ie)

Figure 3.14 and Table 3.3 below indicates the proposed bus service peak hour frequencies in the vicinity of the subject site, after the BusConnects network redesign. The subject site is ideally located to benefit from the enhanced accessibility levels delivered by the BusConnects proposals. It can be seen that the Palmerstown area will be served by a range of bus services operating with as little as a 4-8 minute peak hour frequency weekdays (8 minutes Saturday & Sunday), thereby making bus travel an attractive mode choice for journeys to/from the subject site.

Table 3.3 – Bus Service Frequency

Service	Route	Weekday Peak Hour Frequency	Saturday Peak Hour Frequency	Sunday Peak Hour Frequency
C-Spine	Lucan - City Centre - Ringsend	4-8 mins	8 mins	8 mins

80	Liffey Valley - City Centre - Ballinteer	10-15 mins	15 mins	20 mins

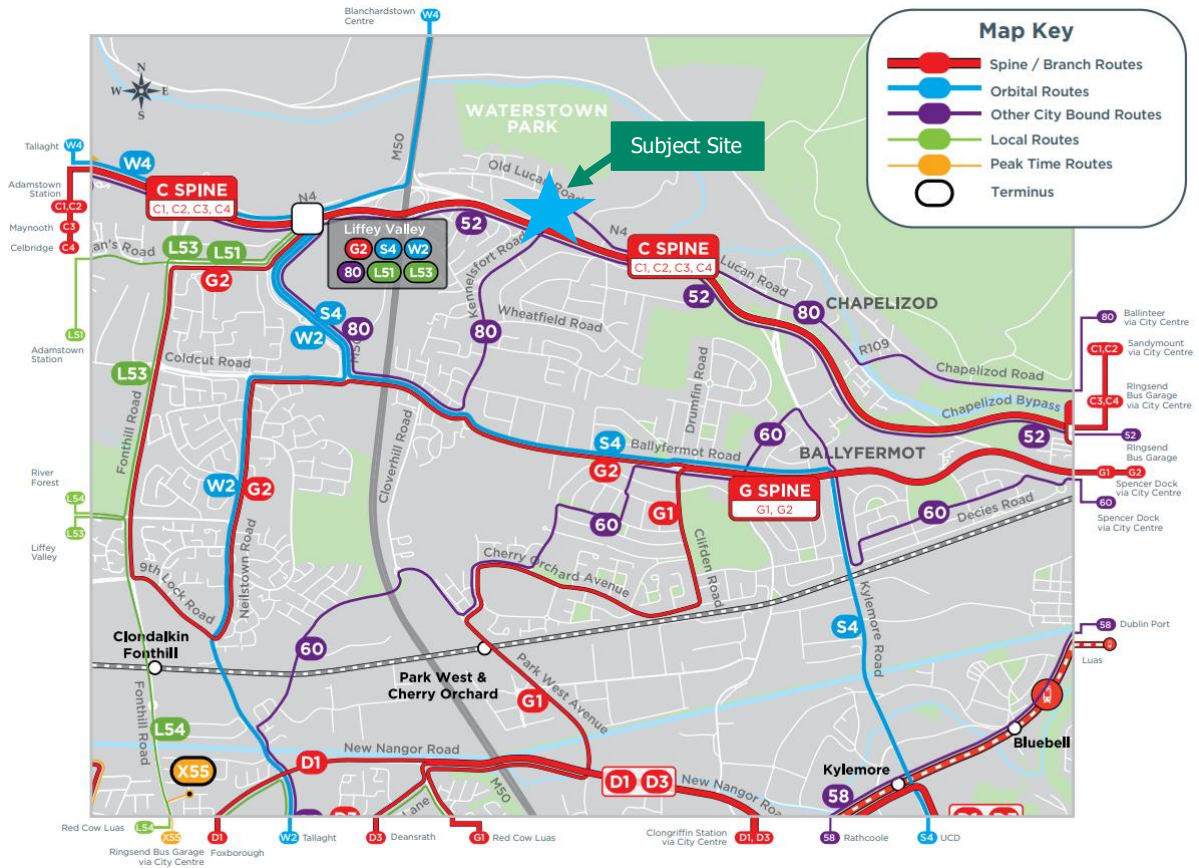

Figure 3.14 – Proposed Ballyfermot Area BusConnects Map (Source: www.busconnects.ie)

Under the Bus Connects proposals, the subject site is ideally located to benefit from the enhanced accessibility levels delivered by Bus Connects scheme as the Chapelizod Bypass (C-Spine) will offer a service every 4 to 8 minutes.

3.10.3 Local Road Proposals

South Dublin County Development Plan 2016 – 2022, has outlined long-term road network proposals which will be phased ‘according to need’ and ‘may be brought forward for construction at an earlier date, subject to funding being available’. In the general vicinity of the subject site there are junction proposals identified for the Kennelsfort Road Lower/Chapelzod Bypass junction (refer to Figure 3.15 below).

According to the Development Plan, the function of these upgrades will be:

‘Provision of grade separated junction to enhance the efficiency of the junction, particularly for buses on the N4/Lucan Road QBC and ensure safe crossing facilities are provided for all users’.

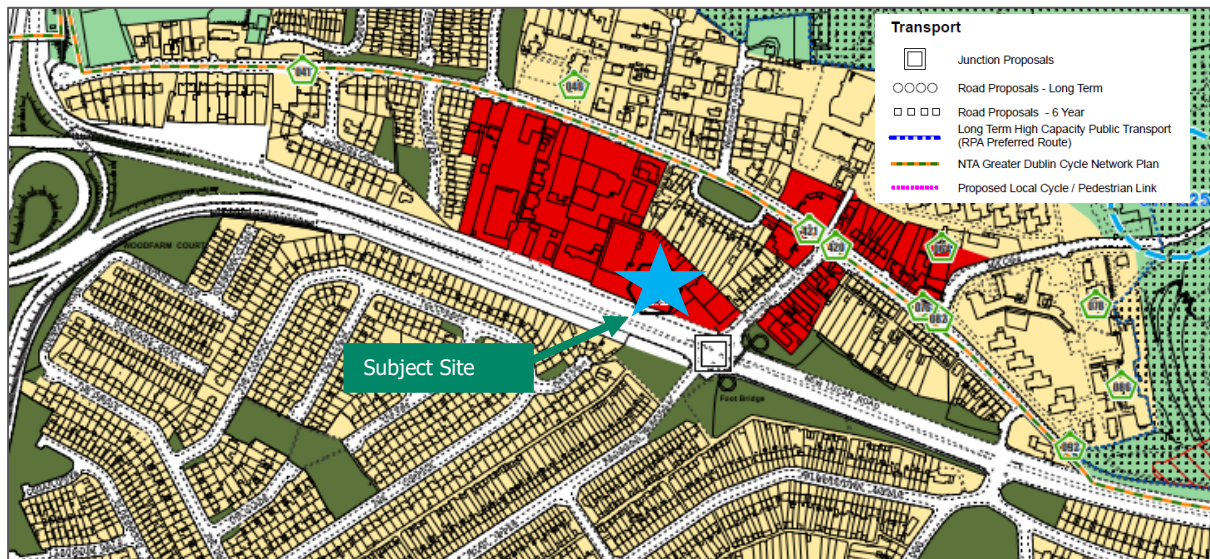

Figure 3.15 – SDCC Infrastructure Objectives in vicinity of subject site (Extract of Map 8 SDCC Development Plan)

South Dublin County Development Plan Draft (2022-2028) has outlined long term road objectives concerning the Kennelsfort Road and the R148 upgrade of existing junction. This will include ‘Support the provision of a grade separated junction, to be initiated during the first two years of the 2022 to 2028 County Development Plan, to enhance the efficiency of the junction, particularly for buses on the N4/Lucan Road QBC, to ensure safe crossing facilities are provided for all users and to reconnect the Heritage Village of Palmerstown with the newer residential areas of the community.’

3.10.4 Timescales

The implementation of the above cycle, public transport and road infrastructure schemes by the local authority will be subject to further design, public consultation, approval, and importantly availability of funding and resources.

4. Characteristics of Proposals

4.1 General

This Section outlines the traffic and transport elements of the proposed development and demonstrates that the scheme is consistent with the main MMP objective, to provide effective transport measures, initiatives and incentives to support and encourage sustainable travel for all commuting and travel to that development and to encourage a shift from single occupancy private car use.

4.2 Permitted SHD Development (Ref. ABP-307092-20)

The subject site was granted planning permission by An Bord Pleanála in September 2020 and is now under construction. The planning consent consisted of the demolition of all existing structures on site and the construction of a residential development of 250 no. 'build to rent' apartments:

4.3 Proposed Amendment to Permitted SHD Development

The proposed alterations are the result of consultation between the applicant and their legal advisors following legal complaints made by the management company of the adjoining business park. It has since transpired that the established right of way via the business park could potentially be restricted to use only by occupants of Block E, and this is now subject of a legal case with the adjoining landowners.

In light of this to ensure the completion of the development, whilst taking account of the management company concerns, it is now proposed to limit this access to pedestrian/cyclist access only for Block E residents/visitors. This alteration therefore proposes that all vehicular movements, including refuse vehicles, will now be solely accommodated via the vehicular priority junction access off the Kennelsfort Road Lower which is the main access to/from the site and to be taken in charge. It is proposed to provide a turning head within the site such that refuse vehicles and other such vehicles can also then utilise the main access to/from the site on Kennelsfort Road Lower. Minor alterations to the configuration of the previously permitted access at Kennelsfort Road Lower are also proposed. This has been the subject of pre-planning consultation with South Dublin County Council prior to lodgement of this S.146B application

4.4 Pedestrian and Cyclist Permeability

The subject site will be highly accessible to pedestrians and cyclists from the adjacent Kennelsfort Road Lower. The proposed development achieves filtered permeability, primarily for walking and cycling at the site access location on Kennelsfort Road Lower, as illustrated in Figure 4.1.

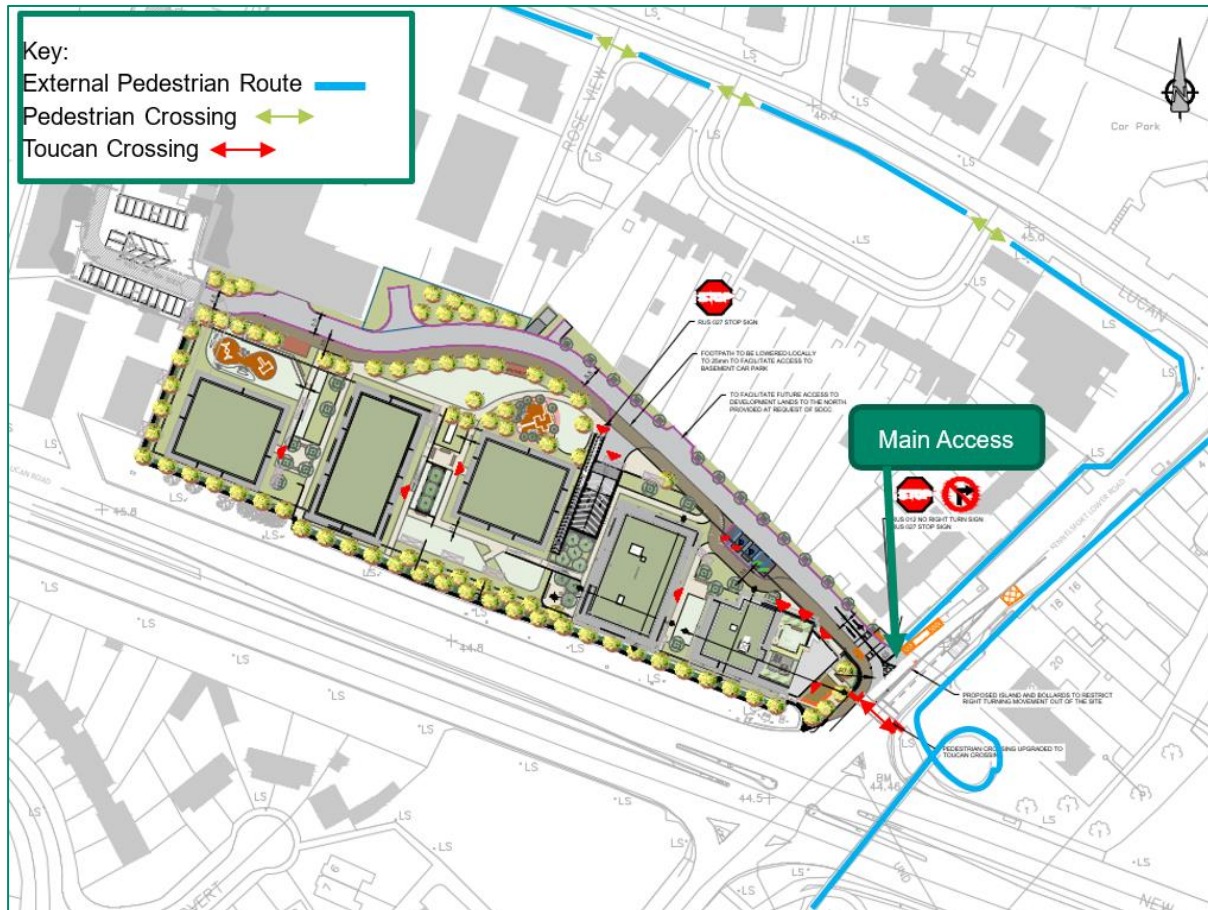

Figure 4.1 – Pedestrian and Cycle Access Locations (AECOM Drawing: PAM-ACM-XX-00-DR-CE-01-0001)

4.4.1 Internal Site

Pedestrians are given priority within the internal site layout to ensure desire lines within the site are accommodated providing a good level of service and ensures the risk of vehicle/pedestrian conflict with vehicles is minimised.

The internal pedestrian routes within the site were derived from the location of the apartment blocks, and associated facilities. This has led to the creation of pedestrian routes that lead to/from and around the development and ties into the existing pedestrian facilities along Kennelsfort Road Lower. Figure 4.1 indicates the pedestrian routes within and around the subject site.

Figure 4.1 also indicates the routes that cyclists can take around the site. In addition to the routes indicated, cyclists can also make use of the pedestrian paths indicated, should they choose to walk their bicycles along them.

4.4.2 Kennelsfort Road Lower Access

To further enhance pedestrian and cyclist accessibility to the site from Kennelsfort Road Lower, the R148 and the surrounding area, the existing pedestrian crossing on Kennelsfort Road Lower adjacent to the site access will be upgraded to a Toucan Crossing as this is being delivered as per the permitted scheme.

The provision of this Toucan Crossing will provide a safe transition to enable cyclists to travel between the site and the existing cycle facilities along the R148.

It should also be noted that the café element of the subject development will attract a local walk-in catchment from both the subject development and the surrounding local area. The provision of these enhanced pedestrian and cycle facilities at the Kennelsfort Road Lower site access will facilitate this new pedestrian travel desire line into the site.

4.5 Parking Strategy

There has been no change to the parking strategy, refer to the parent application for details.

5. Existing Travel Patterns

5.1 Overview

In order to gain an understanding of the existing travel behaviours of the future residents of the development, reference has been made to the National Household Travel Survey and the 2016 Census Data. This data will provide an understanding of the travel patterns of the existing residents in the area and help inform the future travel patterns of perspective residents.

5.2 National Household Travel Survey

AECOM has made use of the National Transport Authority's (NTA) National Household Travel Survey (NHTS) 2017. The National Household Travel Survey is a nationally representative study of Ireland's travel habits. The survey comprised of a survey administered to 5,906 households with a 3-day travel diary to be completed by each person in the house over the age of 4, a total of 10,289 diaries were completed. These travel diaries accounted for 62,307 trips and detailed factors, such as:

- Distance travelled;
- Duration of journeys;
- Mode of Transport;
- Reason for the journey;
- The day of travel;
- Time of outward journey;
- Number of people taking the trip; and
- Demographic profiles.

5.2.1 Greater Dublin Area (GDA)

To determine the trip pattern of the Greater Dublin Area, reference has been made to chapter 7 of the NHTS which details the travel behaviours of those surveyed in the region, Figure 5.1 illustrates the site location in relation to the GDA as indicated in the NHTS. The GDA includes the Local Authorities (Dun Laoghaire Rathdown, Fingal, South Dublin and Dublin City) along with the Counties of Kildare Meath and Wicklow.

From the NHTS the findings based on the modes of travel are shown in Figure 5.2 below.

Figure 5.1 – Site Location in the Context of the GDA

Figure 5.2 – Modes of Transport for the Greater Dublin Area (Source: NHTS 2017)

From the NHTS it was found that the predominant mode of transport in the GDA was travelling by car (63%) followed by walking (20%), bus (9%), cycle (5%), DART / train / LUAS (2%) and finally truck / van (1%). Based on these results from the 2017 NHTS, it shows that sustainable forms of transport only account for a total of 36% of the travel behaviours of residents in the Greater Dublin Area. Given the extent of the survey, which includes the commuter towns of Meath, Kildare and Wicklow, the data could be skewed when compared to the location of the permitted development which is just outside the Dublin City Centre Region.

5.3 2016 Census Data

AECOM has made use of the Central Statistics Office (CSO) SAPMAP tool to analyse the findings of the 2016 Census. Residential settlements that are located within close proximity to the subject site have been analysed to determine existing commuter trends for the area. This analysis has been used to identify initial baseline travel characteristics for the subject Palmerstown site.

The following 14 different geographical catchment areas (Figure 5.3) have been identified and examined:

- Area 1 – Small Area Ref: Sa2017_267109005 – Liffey Valley and Palmerstown Village
- Area 2 – Small Area Ref: Sa2017_267109018 – Woodfarm
- Area 3 – Small Area Ref: Sa2017_267109017 – Woodfarm
- Area 4 – Small Area Ref: Sa2017_267109014 – Woodfarm
- Area 5 – Small Area Ref: Sa2017_267108013 – Woodfarm
- Area 6 – Small Area Ref: Sa2017_267108003 – Redcowfarm
- Area 7 – Small Area Ref: Sa2017_267108004 – Redcowfarm
- Area 8 – Small Area Ref: Sa2017_267108005 – Redcowfarm
- Area 9 – Small Area Ref: Sa2017_267108008 – Redcowfarm
- Area 10 – Small Area Ref: Sa2017_267108007 – Redcowfarm
- Area 11 – Small Area Ref: Sa2017_267108013 – Redcowfarm
- Area 12 – Small Area Ref: Sa2017_267108014 – Redcowfarm
- Area 13 – Small Area Ref: Sa2017_267108016 – Redcowfarm
- Area 14 – Small Area Ref: Sa2017_267108006 – Redcowfarm

These areas have been selected as they display similar characteristics to the subject site in terms of their location, accessibility characteristics, type of accommodation and type of resident.

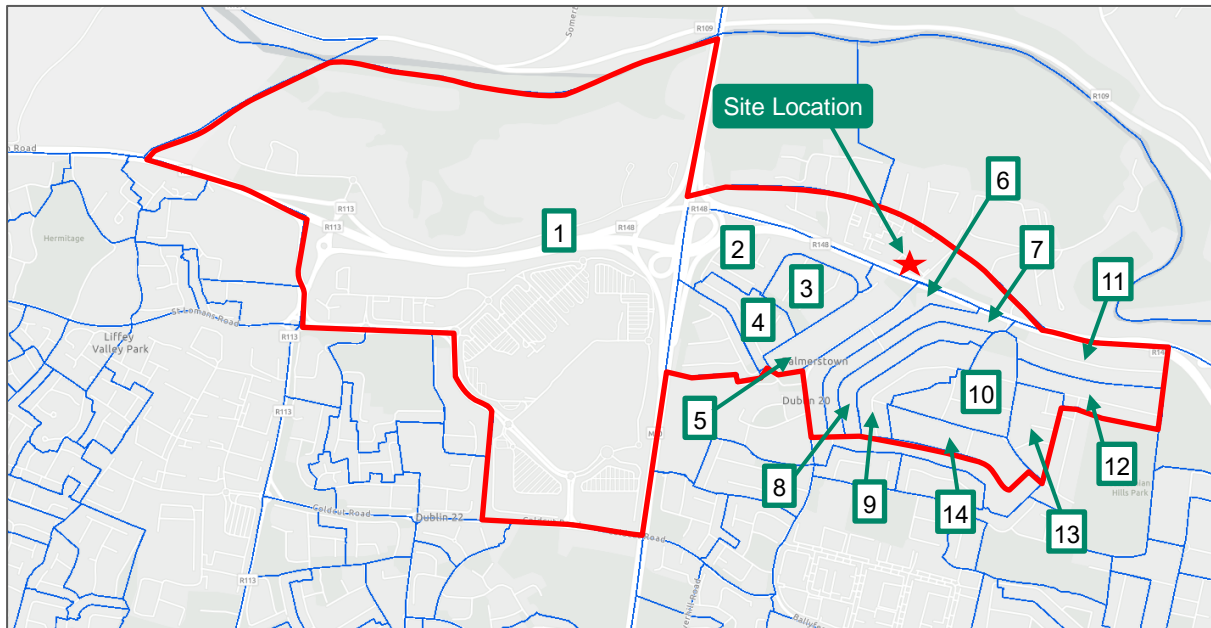

Figure 5.3 – Extent of Small Area Boundaries (Source: Census.cso.ie)

In order to anticipate the predominate mode of travel for residents of the subject development when travelling to work / college, AECOM has reviewed the CSO data for residents living in each of the above 14 catchment areas. The principal mode of travel used by residents in each catchment area is summarised in Figure 5.4 below for Walking, Cycling, Bus, Motorcycle, Car Driver, and Car Passenger.

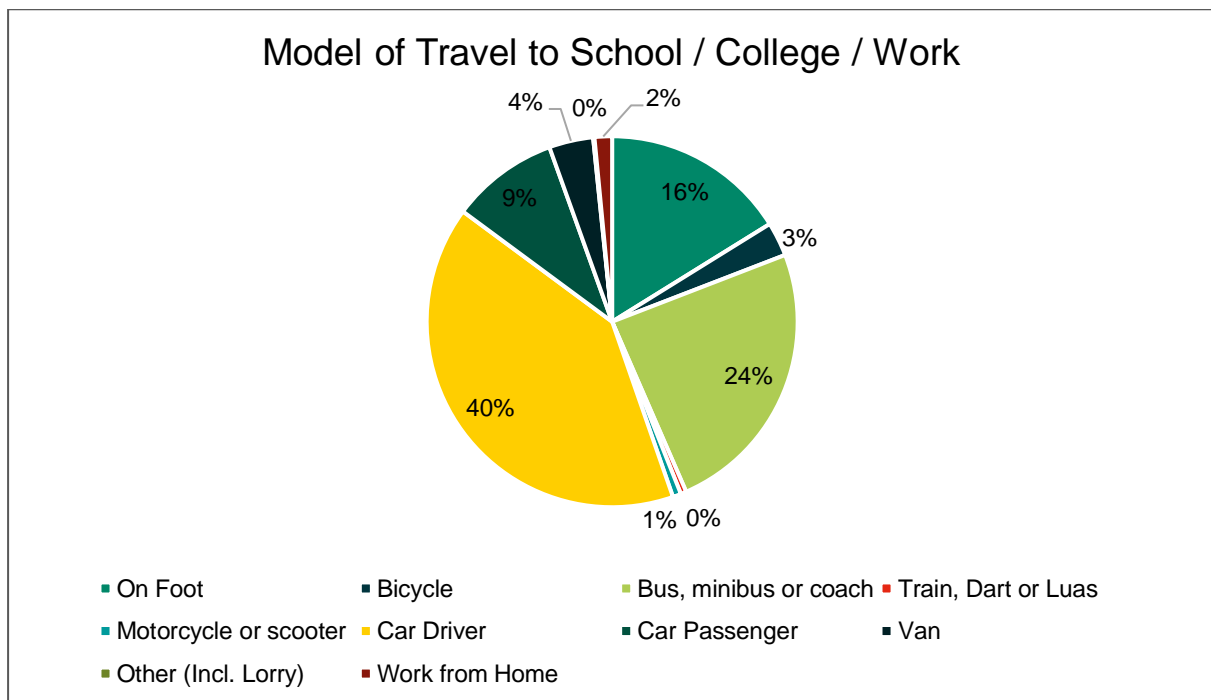

Figure 5.4 – Modes of Transport based on Small Area Population

From the CSO SAP Maps it was found that the predominant mode of transport in the Palmerstown region was travelling by car (40%) followed by bus (24%), On Foot (16%), car passenger (9%), Van (4%), bicycle (3%), work from home (2%) and motorcycle / scooter (1%). Based on these results from the CSO SAP Maps, it shows that sustainable forms of transport accounts for a total of 43% of the travel behaviours of residents in the Palmerstown Area.

5.4 Comparison of the NHTS Vs the Census 2016

Based on both the results of the NHTS and the Census 2016, Table 5.1 summarises the various modes of transport for the Palmerstown region.

Table 5.1 – Mode of Travel Comparison

Mode of Transport	NHTS (%)	Census 2016 (%)
Walking	20	16
Bicycle	5	3
Bus	9	24
DART / Train / LUAS	2	0
Car Driver	63	40
Car Passenger	N/A	9
Motorcycle / Scooter	N/A	1
Van	1	4
Work From Home	N/A	2

From the comparison it can be seen that there is an increase in bus usage from 9% to 24% and a decrease in the car usage from the NHTS, from 63% to 40% based on the Census 2016.

6. Targets

On the basis of the results in Section 5 above, AECOM has proposed indicative Modal Split targets of the permitted scheme following the first year and first 5 years of opening.

6.1 Palmerstown Proposed Modal Trips

At this preliminary stage the aim of the MMP would be to reduce the level of single occupancy car trips from the subject site and encourage travel by sustainable modes. Accordingly the key target of this MMP Framework will be to reduce single occupancy car use from the subject site from approximately 40% to 26% up to the development opening year +5.

6.2 Palmerstown Proposed Targets

Due to the nature of the site being a new development, baseline travel surveys cannot be undertaken. In order to determine interim Modal Split targets we have made reference to the 2016 Census data. The interim Modal Split Targets that we have outlined will be for the first year after the development has been occupied. A baseline travel survey will then be undertaken to determine if the initial targets are representative. This baseline travel survey data will then provide a better understanding of what can be achieved at the subject site and accordingly form the basis for setting targets for future revisions of the MMP.

Mode	Census 2016	1 Year Target	5 Year Target	Target Rationale
Walking	16 %	17 %	20 %	A higher target for walking is proposed to be in line with the National Household survey results.
Cycling	3 %	4 %	6 %	A higher target for cycling is proposed to be in line with the National Household survey results.
Bus / Train	24 %	25 %	30 %	Due to the sites proximity to the bus connects route it is anticipated that a number of perspective residents would choose this mode of transport.
Car (Driver)	40 %	37 %	26 %	Given the proximity of the development along the bus connects route with a high level of service per day it would be anticipated that with the measures outlined in the plan there could be a greater incentive for perspective residents to rely on sustainable forms of transport as opposed to private vehicle trips.
Car (Passenger)	9 %	9 %	10 %	Only a marginal increase would be anticipated as the number of car drivers would decrease for sustainable forms of transport
Other	8%	8 %	8 %	It would be anticipated that these mode of travel will remain the same

7. Mobility Management Measures

7.1 Approach

The key to the development of an appropriate Mobility Management Strategy is the employment of the well-documented 'Carrot and Stick' approach:

- The 'Carrot' incorporates improvements in alternative modes of travel, effectively opening up transport options for commuters.
- The 'Stick' measures include car parking restraint and other physical measures.

Both elements of this approach are required to achieve a successful result. At this stage, these are suggestions to the Mobility Management Coordinator.

7.2 Mobility Management Coordinator (MMC)

It is intended that the management of Palmerstown will appoint a Mobility Management Coordinator (MMC) who will promote all aspects of the MMP for the complex. The MCC will be responsible for implementing and managing the MMP process. The role of the MMC will be as follows:

- To play a senior role in coordinating the Palmerstown Mobility Management/Travel Plan.
- Setting up, coordinating and attending Steering Groups, Working Groups etc.
- Conducting a resident travel survey and analysis, leading to a development of a travel action plan.
- Implementation of the travel plan, with calendared events over three years.
- Designing and implementing effective marketing and awareness-raising campaigns to promote the travel action plan to both residents, staff and visitors alike.
- Coordinating the necessary data collection to monitor the success of the plans - implementation, reviewing and updating as necessary.
- Acting as the main point of contact for stakeholders, both within and outside the organisation

The MMC will oversee the following MMP measures:

- Develop a marketing & communications plan (this could include keeping residents up to date on progress, developments and achievements made in relation to travel).
- Hold Green / Active Commuters coffee mornings.
- Include travel information in residents welcome packs and online in an easily accessible location on the developments website.
- Provide incentives for active commuters
- Brand the complex's Travel Plan
- Provision of information on the different bus ticket types available.

7.3 Mobility Management Plan & Associated Action Plan

A non-exhaustive list of actions proposed to change the mode share and achieve the national targets outlined within Section 2 of this report is given below. Other actions may arise when the management company is known and as the Action Plan implementation progresses. It is proposed that the management company should set up an Action Plan Working Group, run by the MMC to assist with the implementation and running of the initiatives.

7.3.1 Welcome Package

As part of the mobility management plan for the development, the MMC will oversee/prepare a welcome pack to residents which details the following (this is a non-exhaustive list):

- Bus services and timetables.
- Train timetables.

- Walking/cycling routes to points of interest around Palmerstown with approximate walking/cycling time.
- Location and approximate walking time to bike hire stations.
- Location and approximate walking time to Car Club stations.

7.4 Mobility Management Information Point

It is proposed to provide a travel / mobility management information point. The MMC appointed by the Palmerstown Management will organise the Mobility Management Information Point. This information point will dispense travel information to both residents and staff at the development in relation to walking, cycling and public transport.

7.5 Website

Information regarding public transport accessibility will be provided via the journey planner website.

7.6 Walking

The key to pedestrian accessibility is short, convenient and safe links. Walking is the most widely used form of transport; nearly all journeys involve some walking, therefore better pedestrian facilities can have a wide impact. As a main method of travel, a distance of up to 4 km is considered reasonable for walking; however, these distances are only indicative, but can help to define target groups. Furthermore, walking may be combined with car sharing or use of public transport for distances of 2.5km or more. The following measures can be incorporated into the MMP scheme:

Action	Responsibility	Timeline
Information on walking distances, journey times and optimal routes as well as information provided at the Mobility Management Information Point upon request. It is intended that this will give residents and staff a better perception of walking as mode of travel.	MMC	Prior to Occupation of the site
Promote the health benefits of walking.	MMC	Prior to Occupation of the site
Promote walking through organised walking events/lunchtime walks.	MMC	1-3 months
Participate in the annual Marchathon walking challenge in March.	MMC	3-6 months
Leave umbrellas at reception to use on wet days for travel between buildings on the development.	MMC	Immediately
Display and promote accessibility maps showing how long it would take to walk to/from the development.	MMC	Prior to Occupation of the site
Display time to walk posters showing time to travel on foot to nearby and popular destinations.	MMC	Prior to Occupation of the site
Improve 'natural surveillance' on site (e.g. improving lighting)	Developer	Immediately (as part of scheme proposals)
Consider mapping a Sli na Slainte or other walking route	MMC	Prior to Occupation of the site
Awareness campaigns.	MMC	1-3 months

7.7 Public Transport – Bus Use

The following measures will encourage further use of the bus:

Action	Responsibility	Timeline
Provide up-to-date public transport information including timetables and bus company contact information resident transport notice boards, similar to what is provided within the reception area of the complex.	MMC	Prior to Occupation of the site
Publicise the national door-to-door multi modal journey planner on www.transportireland.ie .	MMC	Prior to Occupation of the site

7.8 Car Sharing

Car sharing is when two or more people, usually who are heading to the same destination, travel together by car for all or part of a journey. Car-sharing is a good means of reducing single-occupancy car use.

A central database system may be the most effective means of implementing a car-sharing scheme but a basic scheme using notice boards may be adopted in the first instance.

It would be proposed to maximise the potential of these services by implementing the following measures:

Action	Responsibility	Timeline
Set up a private car sharing scheme on www.carsharing.ie	MMC	1-3 months
Allocate car sharing parking bays in a priority location.	MMC	Immediately (as part of scheme proposals)
Develop a car sharing policy.	MMC	Prior to Occupation of the site
Promote private car sharing scheme to staff/residents (e.g. at a transport roadshow event - this could be as part of the welcoming weeks).	MMC	1-3 months
Hold coffee mornings/a launch event for potential car sharers to find out what is involved & see a demo of the site & to meet others who they might car share with.	MMC	1-3 months
Raffle the use of a parking space near entrances/reception for one car sharing group every month or something that will appeal to residents.	MMC	1-3 months

8. Monitoring

To ensure the success of a MMP, the identification of an appropriate management structure is critical to its effective implementation. The MMC will therefore be responsible for managing and overseeing the implementation of the MMP.

Periodic monitoring will assess whether the stated targets for a reduction in travel are met. This will play an important role in reviewing and re-setting resident targets by ensuring that on-going observation takes place. It is recommended that annual reviews are undertaken to review travel patterns, and whether the measures are supporting modal shift from private car to more sustainable modes.

9. Summary and Conclusion

9.1 Summary

This Mobility Management Plan (MMP), has been prepared by AECOM in support of alterations to a planning application for a permitted residential area scheme at Palmerstown, Kennelsfort Road, Dublin. This MMP forms a part of the amended planning application documentation prepared for the development.

Based upon the information and analysis presented within this MMP, the assessment demonstrates how prospective residents of the permitted built to rent development can be encouraged to use sustainable means of transport to and from the subject site. The Mobility Management plan details the predicted modal split for users of the development and has established these splits are achievable given proximity of the development to the university, and the extent of pedestrian, cycling and public transport facilities in the area.

9.2 Conclusion

Based upon the information and analysis presented within this MMP the following subsections demonstrate how the scheme has been considered from a mobility management point of view to integrate within the existing network and to minimise potential impacts of vehicular traffic upon the local road network.

9.2.1 Existing Accessibility

The site is ideally situated to benefit from bus transport connections which result in the site benefiting from good accessibility levels for this sustainable mode of travel.

9.2.2 Mobility Management Measures

A Mobility Management Plan has been submitted within this report. The Plan presents the key measures and policies to be undertaken by the Applicant in order to reduce the reliance on private vehicular modes of transport for future residents.

9.3 Overall Conclusion

AECOM has compiled this MMP with consideration of the aims and objectives of national policies and guidelines. It forms the basis for discussions between the Applicant and South Dublin County Council. Whilst this document has been submitted as part of the alterations to the parent application for the proposed development on lands at Palmerstown Retail Park, the Plan is applicable for the 250 No. apartments within the immediate vicinity of the site.

Given that the site improves the accessibility via walking, cycling and public transport, the permitted development is well placed to promote sustainable travel from the onset.

To ensure the success of a MMP, the identification of an appropriate management structure is critical to its effective implementation. The MMC will therefore be responsible for managing and overseeing the implementation of the MMP.

Upon completion of the development, when the scheme is occupied it is recommended that an updated Mobility Management Plan is undertaken in unison with travel surveys for residents of the development which will inform travel targets for site users.

Rothair ar Thraenacha Comaitéara agus DART Bicycles on Commuter and DART Trains

Tá cead rothair a thabhairt ar sheirbhísí Comaitéara agus DART idir 10:00 agus 15:30 agus tar éis 19:00 ó Luan go Aoine agus i gcaitheamh an lae Dé Sathairn agus Dé Domhnaigh.

Má tá rothar agat ar thraein Comaitéara nó DART, tabhair aird ar na nithe seo a leanas le do thoil:

- Ba chóir do chustaiméirí éirí dá rothar istigh sa stáisiún agus ar ardáin.
- Ba chóir do chustaiméirí leas a bhaint as na rampaí agus ardaitheoirí inrochtaineachta i stáisiúin seachas dul an staighre.
- Ba chóir do chustaiméirí fanacht in aice a rothair ar bord na traenach.
- Ní beidh cead ag leanbh nach mbeidh duine fásta leis rothar a thabhairt ar bord.
- Níl cead rothair leictreacha a thabhairt ar thraenacha.
- Níl cead rothair a mbeadh leantáin i bhfostú dóibh ar thraenacha.
- * Beidh srianta i bhfeidhm ar ócáidí a mbeadh imeachtaí speisialta ar siúl.

Bicycles are allowed on Commuter and DART services between 10:00 and 15:30 and after 19:00 Monday to Friday and all day Saturday and Sunday.

If you are travelling with your bicycle on Commuter or DART trains please note the following:

- Customers should dismount from bicycles when they are in the stations and on the platforms.
- Customers should use accessibility ramps and lifts rather than stairs within stations.
- Customers should stay with their bicycles onboard trains.
- Unaccompanied children cannot bring bicycles onto trains.
- No motorised bicycles are allowed on trains.
- No bicycles with attached trailers are allowed on trains.
- * Restrictions will apply on occasions of special events.

**Baile Átha Cliath - Corcaigh - Seirbhís iomlán chuig/ó Stáisiún Idirmheánacha
Luan go Domhnaigh (gan saoire phoiblí san áireamh)
Bailí ó 21.03.2021 go bhfógrófar a mhalairt**

**Dublin – Cork - Full service to/from Intermediate Stations
Monday to Sunday (excluding public holidays)
Valid from 21.03.2021 until further notice**
