Re: An Arboricultural Assessment of the Site Area at Liffey Valley – Ref. SD21A/0184

I refer to your request to visit this site at Liffey Valley and to assess the extent of tree/hedgerows present within the site as referred to in the request for Additional information (section 4) from South Dublin County Council.

I inspected the site area at Toyota Liffey Valley and the proposed development layout drawings forwarded to me as requested and I am pleased to submit the following comments:

There are no trees or hedgerows of any significance within or adjoining this backfilled quarry site. A few poor quality whitebeam and thorn trees are growing in rocky ground and are of no amenity or landscape value to the area. Its basically sterile ground – see photographs attached below:

If you require further information, please do not hesitate to contact us, and we will do our best to be of assistance.

Yours sincerely,

For Doirin Tree Care Co Ltd

Noel Lane
