Hi Caitlin,

Having reviewed the applicant's submission and visited the subject site, the proposed setback distance to the surface water pipe is acceptable in principle.

Regards,
Ronan

Subject: SD21B/0490 1 Tara Hill Crescent

Hi Brian, Ronan,

Clarification of AI has been received on SD21B/0490 1 Tara Hill Crescent. The first item related to the setback from the surface water to the west of the site.

Would you please be able to advise if the response is acceptable? I'm aiming to have my report to Colm by Wednesday next week. So any indication before then would be much appreciated.

Thanks,
Caitlin
