PR/0777/22

Record of Executive Business and Chief Executive's Order

Reg. Reference: SD22B/0175 **Application Date:** 26-Apr-2022

Submission Type: New Application **Registration Date:** 26-Apr-2022

Correspondence Name and Address: John Loney Brooklands, Barrettstown Road,
Newbridge, Co. Kildare

Proposed Development: Extend over existing linear cottage to create a two storey house; extend to the front (east) with a two storey residential wing; re-model existing stables and erect small hay and fodder storage shed within an enclosed courtyard; up-grade existing septic tank to a proprietary waste water treatment system and all ancillary site works.

Location: Ballymaice House, Ballymaice, Bohernabreena, D24 TV70

Applicant Name: Joe Costello

Application Type: Permission

(NM)

Description of Site and Surroundings:

Site Area: 6.44 Hectares.

Site Description:

The application site is located in the rural area of Ballymaice near Bohernabreena off the R114. It is situated at the end of a rural lane and consists of a detached bungalow with a pitched roof and various agricultural outbuildings.

The road servicing the site is a narrow one laneway rural road with grass verges. The site itself is bounded by mature trees and indigenous hedgerows and has a road frontage of approximately 238m. It is a relatively uniform square shaped site of approximately 6.44 hectares with a slight gradient.

The site is located in the Dublin Mountains with views of the Bohernabreena Valley and also within close proximity to Tallaght town centre at approximately 3.5km.

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

Proposal:

- Extend over existing linear cottage to create a two-storey house,
- Extend to the front (east) with a two-storey residential wing,
- Re-model existing stables and erect small hay and fodder storage shed within an enclosed courtyard,
- Up-grade existing septic tank to a proprietary wastewater treatment system and all ancillary site works.
- Total area of works 350sqm

Zoning:

The subject site is subject to zoning objective 'HA-DM' - 'To protect and enhance the outstanding natural character and amenity of the Dublin Mountains area'.

Consultations:

Surface Water Drainage – No report received.

Irish Water – No report received.

Environmental Health – No objection subject to conditions.

Roads – Further information required.

Heritage Officer – No report received.

Parks – No objection subject to conditions.

An Taisce – No objection subject to conditions.

SEA Sensitivity Screening:

- Overlap identified with High Amenity Dublin Mountains 2016.

Relevant Policy in South Dublin County Council Development Plan 2016-2022

Section 9.2.0 Landscapes,

Sets out that a Landscape Character Assessment of South Dublin County (2015) has been prepared in conjunction with the review of the County Development Plan. The Landscape Character Assessment of South Dublin County, 2015 is a separate document to be read in parallel with this Plan.

Landscape Character Assessment of South Dublin County (2015).

Heritage, Conservation and Landscapes (HCL) Policy 7 Landscapes.

It is the policy of the Council to preserve and enhance the character of the County's landscapes particularly areas that have been deemed to have a medium to high Landscape Value or medium to high Landscape Sensitivity and to ensure that landscape considerations are an important factor in the management of development.

Housing (H) Policy 27: Rural House & Extension Design

It is policy of the Council to ensure that any new residential development in rural and high amenity areas, including houses and extensions are designed and sited to minimise visual impact on the character and visual setting of the surrounding landscape.

H27 Objective 1:

Ensure that all new rural housing and extensions within areas designated with Zoning Objective 'RU' (to protect and improve Rural Amenity and to provide for the development of Agriculture), Zoning Objective 'HA-DM' (to protect and enhance the outstanding natural character of the Dublin Mountains Area), Zoning Objective 'HA -LV' (to protect and enhance the outstanding

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

character and amenity of the Liffey Valley) and Zoning Objective 'HA-DV' (to protect and enhance the outstanding character and amenity of the Dodder Valley):

Is designed and sited to minimise impact on the landscape including views and prospects of natural beauty or interest or on the amenities of places and features of natural beauty or interest including natural and built heritage features; and

- Will not have a negative impact on the environment including flora, fauna, soil, water (including ground water) and human beings; and*
- Is designed and sited to minimise impact on the site's natural contours and natural drainage features; and*
- Retains and reinstates traditional roadside and field boundaries; and*
- Is designed and sited to circumvent the need for intrusive engineered solutions such as cut and filled platforms, embankments or retaining walls; and*
- Would comply with Code of Practice Wastewater Treatment Systems Serving Single Houses, EPA (2009) or other superseding standards; and*
- Would not create or exacerbate ribbon or haphazard forms of development.*

Section 2.0 Rural Housing

Policy 16 Steep or Varying Topography Sites

It is the policy of the Council to ensure that development on lands with a steep and/or varying topography is designed and sited to minimise impacts on the natural slope of the site.

Section 2.5.0 Rural Housing

Policy 27 Rural House & Extension Design

It is the policy of the Council to ensure that any new residential development in rural and high amenity areas, including houses and extensions are designed and sited to minimise visual impact on the character and visual setting of the surrounding landscape.

Assessment

The main issues for consideration are:

- Zoning and Council policy,
- Assessment of Application Type as an Extension, Replacement or New Dwelling
- Site Notices
- Residential and Visual Amenity,
- Drainage,
- Parks,
- Environmental Health Officer,
- Roads,
- An Taisce
- Screening for Appropriate Assessment,
- Screening for Environmental Impact Assessment.

Zoning and Council Policy

The site is zoned objective 'HA-DM' - 'To protect and enhance the outstanding natural character of the Dublin Mountains Area'. A development consisting of a residential extension, remodelling existing and erecting new agricultural outbuildings and the upgrading of a wastewater treatment system is open for consideration subject to its accordance with the relevant provisions of the South Dublin County Development Plan 2016-2022 for residential development in rural areas but is not permitted above 350m contour (subject site below 350m) with specific reference to Section 2.5.0 Rural Housing which relates to Rural House & Extension Design, Section 2.4.1 which relates to

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

Residential Extensions and also the Councils House Extension Design Guide (2010). The site is not above the 350m contour.

Policy H27 relates to rural houses and extensions to same to minimise visual impact on the character and visual setting of the surrounding landscape. More specifically Policy H27 Objective 1 states:

Ensure that all new rural housing and extensions within areas designated with Zoning Objective 'RU' (to protect and improve Rural Amenity and to provide for the development of Agriculture), Zoning Objective 'HA-DM' (to protect and enhance the outstanding natural character of the Dublin Mountains Area), Zoning Objective 'HA-LV' (to protect and enhance the outstanding character and amenity of the Liffey Valley) and Zoning Objective 'HA-DV' (to protect and enhance the outstanding character and amenity of the Dodder Valley):

- *Is designed and sited to minimise impact on the landscape including views and prospects of natural beauty or interest or on the amenities of places and features of natural beauty or interest including natural and built heritage features; and*

The application site is surrounded by natural indigenous hedgerows and mature trees that provide coverage for the proposed development.

- *Will not have a negative impact on the environment including flora, fauna, soil, water (including ground water) and human beings; and*

The proposed development requires the removal of indigenous hedgerows and mature trees and as such **will have a negative impact on the environment.**

- *Is designed and sited to minimise impact on the site's natural contours and natural drainage features; and*

The proposed development is located on a relatively flat area with the runoff potentially from Southwest to North East and therefore complies with this criterion.

- *Retains and reinstates traditional roadside and field boundaries; and*

The drawings submitted show the removal of certain mature trees etc. which was not noted on the application and as such cannot be assessed as part of the application. In any event there are **concerns with this removal.**

- *Is designed and sited to circumvent the need for intrusive engineered solutions such as cut and filled platforms, embankments or retaining walls; and*

Given the slight gradient of the site, it would not appear that the proposed development would require any substantial intrusive engineered solutions and would comply with this criterion.

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

- *Would comply with Code of Practice Wastewater Treatment Systems Serving Single Houses, EPA (2009) or other superseding standards; and*

A report was submitted as part of the application pertaining to the treatment of wastewater which will be assessed as part of this report.

- *Would not create or exacerbate ribbon or haphazard forms of development.*

The proposed development **would not exacerbate ribbon or haphazard forms of development as it is located at the site of an existing residential unit.**

Nature of the development - Extension, Replacement or New Dwelling

Extension

The proposed works are described as an extension to the existing 144sqm linear cottage dwelling. Whilst the existing dwelling is sizable, the cover letter attached with the application suggests that the building will be completely rebuilt on the same site as the existing. The cover letter states:

The property has been neglected and it is the intention to rebuild in the same positions as is there at the moment.

This would indicate the application is for a new build/replacement rather than an extension of the existing property as has been applied for. The existing building is also derelict on inspection and would be required to be rebuilt.

The proposed development will potentially triple the size of the building. A further storey is intended at 1st floor level, effectively doubling the area to 288sqm on the existing footprint with a further approximately 240sqm over two floors attached at the north end of the existing dwelling. This will result in a total of approximately 384sqm of additional residential space rendering the original dwelling as subservient to the new dwelling. Having regard to the above, **it is considered that the proposal is a new/replacement dwelling rather than an extension.**

Replacement Dwelling

If the proposal is to be assessed as a replacement dwelling it must meet the criteria as set out under 2.5.6 Replacement Rural Dwellings: HOUSING (H) Policy 25 Replacement Dwellings in Rural and High Amenity Areas. The following criteria apply:

*There is a **genuine need for replacement or refurbishment of the structure;***

The applicant has bought this recently in order to renovate and upgrade the property, outbuildings, and the site in general. It is noted that the property appears to be in quite poor condition/dilapidated and would be required to be rebuilt. Therefore, proposal complies with this criterion.

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

The roof, internal walls, and external walls of the structure on site are substantially intact;

The structure appears to be substantially intact, but access was not possible to the cottage and as such confirmation should be sought.

The structure on site is a habitable dwelling and its use as a habitable dwelling has not been abandoned (for a period that exceeds 5 years);

It would appear that the dwelling has been abandoned for a period that exceeds 5 years, but confirmation should be sought. **It may be that this criterion is not met.**

The structure on site is of limited value in terms of built heritage, character, and visual amenity; and

The existing dwelling is a linear pebble dashed bungalow style dwelling with a pitched roof and would not appear to have any significant heritage or architectural value. Proposal complies with this criterion.

The replacement dwelling would largely occupy the same footprint, scale, and location of the dwelling to be replaced, save in exceptional circumstances where the Planning Authority agrees a more favourable position in the context of the development management criteria outlined in Chapter 11 Implementation.

The **proposed development is significantly larger than the existing property** in terms of size and scale and would not comply with this criterion.

Having regard to the above, it is considered that the proposed development does not meet all the criteria and should be assessed as a new dwelling.

New Dwelling

Policy H23 Objective 1 Rural housing in HA- Dublin Mountains states the following:

To consider new or replacement dwellings within areas designated with Zoning Objective 'HA-Dublin Mountains' (to protect and enhance the outstanding natural character of the Dublin Mountains Area) where all of the following criteria are met:

*The applicant is a native of the area; **and***

This property appears to have been bought by the applicant recently and no additional information has been provided that would confirm that the applicant is native to the area. Evidence of the applicant's eligibility should be requested.

*The applicant can demonstrate a genuine need for housing in that particular area; **and***

The applicant has not submitted any documentation to satisfy the above requirement and as such, evidence should be requested.

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

*The development is related directly to the area's amenity potential or to its use for agriculture, mountain, or hill farming; **and***

The applicant has not submitted any documentation to satisfy the above requirement, but the application does include the building of new agricultural out buildings, a revised entrance to allow for a tractor and trailer which would indicate the intention to fulfil this requirement.

*The development would not prejudice the environmental capacity of the area, **and***
Complies with this criterion as no objection from EHO.

That it would be in keeping with the character of the mountain area.

The area can be characterised by dwellings of varying architectural design and scale. The mature hedgerow and trees provide coverage in the site context but overall, the developments overbearing nature would not be considered proper planning or sustainable development and **does not comply with this criterion.**

Having regard to the above, the applicant has provided no information to satisfy these requirements and therefore **further information** is required.

Site Notices

The planning Authority has noted that the description of the development on the site notice does not correlate with the submitted drawings.

It should be noted that the applicant has listed several items requiring planning permission on the drawings submitted which were omitted from the development description and as such cannot be considered in this assessment such as:

- Alterations to the vehicular access and laneway
- Removal of mature trees and hedgerow
- A new well
- Demolition of existing buildings

Having regard to the above, the applicant is required to readvertise the application with a revised site notice and newspaper advertisement with the entirety of the proposal included required for assessment. This should be requested as **further information**.

Residential and Visual Amenity

Extending over existing linear cottage to create a two-storey house and extending to the front (east) with a two-storey residential wing

Residential

The existing dwelling is a single storey bungalow on a large site with a pitched gable roof. This proposal calls of a doubling of the size of the existing dwelling by adding a 2nd storey.

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

Approximately 240sqm of additional residential space will be added over two floors attached to the northwest of the existing dwelling. The area of the site is adequate to accommodate the size of development whilst leaving an appropriate amount of private outside amenity space. The access to the site is off a narrow single lane rural road and although treatments to widen the access to the site were included on the plans, it was not included in the application description or site notices as discussed above and **further information** is required.

Having regard to the above the proposed development would not adversely impact residential amenity.

Visual

The proposed residential development of this site is considered **overbearing in the context of the area**. The ridge height of the proposed two storey element replacing the existing will be 7.6m whereas the ridge height of the new part of the dwelling abutting the existing is 8.575m. Whilst the mature trees provide some coverage to the site and the relatively low positioning and slight gradient of the site offer some concealment, two storey dwellings are uncommon in the immediate vicinity and the excessive height and scale of the dwelling and extensive roof profile, which would be visually obtrusive; at variance with the Development Plan criteria on rural housing and; would further interfere with the upland rural setting and character of the landscape including protected views of natural beauty. Some materials used to include the standing seam zinc roofing would not be acceptable either in the site context. Overall, **the proposed development would seriously injure the visual amenity of the area**. However **further information should be sought on this issue**.

Re-model existing stables and erect small hay and fodder storage shed within an enclosed courtyard

The applicant has indicated that four existing outbuildings including an existing garage, a hayshed, and two separate low roof shed buildings are to be demolished. It is intended that one of the low roofed shed buildings is to be rebuilt as five loose boxes (stables) and a tack room in a similar location to the existing on the site. The loose boxes building will have a ridge height of 5.05m on the eastern elevation dropping to 4.65m on the western elevation due to the slope of the site which will require some cutting with an overall area of approximately 88sqm. It shall have a plastered finish with a pitched corrugated green roof.

A new hayshed will also be built to the north of the site with a ridge height of 5.775m on the northern elevation and 5.5m on the southern elevation, again requiring a small cut due to the slope of the site with an overall area of 105sqm. It will also have a plastered finish with a barrel style corrugated green roof.

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

Having regard to the above, the proposed buildings are in line with the agricultural uses proposed for the site. They will require some cutting but would not require any substantial intrusive engineered solution and would not seriously injure the visual or residential amenity of the area.

Drainage

Water Services

No report received. Standard conditions will apply.

Irish Water

No report received. Standard conditions will apply.

Parks

The following was received from the Public Realm Section:

In general terms the Public Realm Section has no objections in principle to the proposed development, but wish to make the following comments:

Landscape Plan

Ideally a landscape scheme shall be provided as part of the development proposals which helps to integrate the development into the local landscape and through suitable boundary planting provides visual screening, mitigation of negative visual effects and which improves local biodiversity and green infrastructure links. The Landscape Plan should be prepared by a suitably qualified landscape consultant/designer. The landscape Plan shall include details of hard and soft landscaping, in addition the applicant is requested to submit a fully detailed Planting Plan for the development.

SUDS

There is a lack of SuDS (Sustainable Drainage Systems) shown for the proposed development. Natural SUDS features shall be incorporated into the proposed drainage system. The SUDS shall be an integrated multi-disciplinary approach which locally addresses water quality, water quantity, and provides for amenity and biodiversity enhancement which meets the objectives of South Dublin County Council Development Plan 2016-2022.

The Public Realm Section has assessed the proposed development in accordance with the policies and objectives of the County Development Plan 2016-2022 and with best practice guidelines and recommends the following:

Conditions

1. Landscape Plan

Prior to the commencement of Development, a landscape plan and associated planting plan shall be submitted to the Planning Authority. The Landscape Plan shall include details of hard and soft landscaping. The Landscape Plan shall be implemented in full, within the first planting season following completion of the development. The Landscape Plan to include a detailed Planting Plan

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

and Planting Schedule stating species/varieties, indicative quantities, sizes, rootball presentation and spacings. Planting mixes should contain pollinator-friendly native species (in accordance with the All-Ireland Pollinator Plan 2015-2020).

2. Sustainable Drainage System (SuDS)

The applicant has not proposed any SuDS (Sustainable Drainage Systems) features for the proposed development. The applicant shall submit a drawing in plan and cross-sectional views clearly showing proposed Sustainable Drainage Systems (SuDS) features for the development. Sample SuDS devices include green roofs, water butts, tree pits, rain gardens, filter strips and permeable paving amongst others. The applicant is referred to the recently published SDCC SuDS Design Guide for further information and guidance.

REASON: To prevent the increased risk of flooding and to improve and protect water quality, in accordance with policies under Section 8.4.0 Sustainable Urban Drainage Systems of the CDP 2016-22 in particular G5 Objective 1.

Conclusion

The Public Realm Section have no objection to the proposed development subject to the above conditions. These shall be requested as further information.

Environmental Health

The following was received from the Environmental Health Officer:

The above development is acceptable to this office subject to the following conditions:

Noise

1. To control, limit and prevent the generation of Environmental Noise Pollution from occurring the Environmental Health Department of South Dublin County Council, hereby informs you that:

The use of machinery, plant, or equipment (which includes pneumatic drills, generators, and the movement on and off the site of construction vehicles) is NOT PERMITTED outside the following hours

- Before 07.00 hours on weekdays, Monday to Friday
- Before 09.00 hours on Saturdays.
- After 19.00 hours on weekdays, Monday to Friday.
- After 13.00 hours on Saturdays.
- Not permitted at any time on Sundays, Bank Holidays or Public Holidays.

Reason: In the interest of public health by the prevention of unacceptable levels of noise pollution which could interfere with normal sleep and rest patterns and/or when people could reasonably expect a level of quietness, the proper planning and sustainable development of the area and to

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

uphold the Council's amenity policies set out in the South Dublin County Council Development Plan.

Air Quality

2. During the demolition and construction phases of the development, Best Practicable Means shall be employed to minimise air blown dust being emitted from the site. This shall include covering skips and slack-heaps, netting of scaffolding, daily washing down of pavements or other public areas, and any other precautions necessary to prevent dust nuisances.

Reason: To contain dust arising from demolition and construction in the interests of public health and to prevent nuisance being caused to occupiers of buildings in the vicinity.

Wastewater Treatment

3 The proposed wastewater treatment systems shall be located, installed, and operated in accordance with the details submitted to the Planning Authority on 26/04/2022 and in accordance with the requirements of the Code of Practice on Wastewater Treatment and Disposal Systems serving Single Houses issued by Environmental Protection Agency 2009.

Reason: In the interest of public health.

4 A maintenance contract for the lifetime of the treatment system shall be entered into with the suppliers of the wastewater treatment system or with an appropriate maintenance firm. Documentary evidence of an on-going maintenance agreement shall be submitted to the Planning Authority within 4 weeks of the installation of the wastewater treatment system.

Reason: In the interest of public health in order to ensure adequate drainage provision.

5 Within three months of the first occupation of the house, the developer shall submit a report from a suitably qualified person with professional indemnity insurance certifying that the wastewater treatment system has been installed and commissioned in accordance with the approved details and is working in a satisfactory manner, and that the polishing filter and/or percolation area is constructed in accordance with the requirements of the Code of Practice on Wastewater Treatment and Disposal Systems serving Single Houses issued by Environmental Protection Agency 2009.

Reason: In the interest of public health in order to ensure adequate drainage provision.

6. The existing septic tank must be fully decommissioned and removed from use.

Reason: In the interest of public health

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

Conclusion

The report from the Environmental Health Officer is noted and could be dealt with by way of **conditions**.

Roads

The following was received from the Roads Department:

Roads recommend that additional information be requested from the applicant:

1. The applicant is requested to submit a revised layout of not less than 1:100 scale, showing accurate visibility splay with a 2 metre set back, at a 1.05 metre height from ground level and 160 metres sight lines in both directions from the entrance. Sightlines should be to the near side edge of the road to the right-hand side of entrance and to the centreline of the road to the left-hand side of the entrance (when exiting).

Conclusion

The application submitted did not reference the change to the entrance etc. as has been noted in the report and as such cannot be reviewed as part of this application. Notwithstanding this, it would be unacceptable to South Dublin County Council planning department to remove this much hedgerow and indigenous vegetation that would be required to satisfy the requirements of the Roads Department.

An Taisce

The following was submitted by An Taisce:

We have examined the file, visited the site and wish to state that this application should be assessed with regard to impact on the amenity of the area and the relevant provisions of the South Dublin County Council Development Plan.

It is a pity that four of the trees adjoining the extension have to be removed. Perhaps the extension might not need to be so large. The standing seem zinc roof will be somewhat out of keeping in this area.

Conclusion

The above is noted and has been reflected in the report.

Appropriate Assessment

The subject site is not located within nor within close proximity to a European site. The proposed development is located within a rural area and comprises of a two storey extensions new hay shed and stables and wastewater treatment facility.

Having regard to:

- the domestic nature of the development,
- the location of the development, and

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

- the consequent absence of a pathway to the European site, it is considered that the proposed development would not be likely to have a significant effect individually, or in-combination with other plans and projects, on the Natura 2000 network and appropriate assessment is not therefore required.

Environmental Impact Assessment

Having regard to the modest nature of the proposed development, and the distance of the site from nearby sensitive receptors, there is no real likelihood of significant effects on the environment arising from the proposed development and the development seeking retention. The need for environmental impact assessment can, therefore, be excluded at preliminary examination and a screening determination is not required.

Other Considerations

Development Contributions

Residential Extension: 350 sq.m.

Assessable area: 350 sqm

SEA Monitoring

Building Use Type Proposed: Residential extension.

Floor Area: 350 sq.m

Land Type: Brownfield

Site Area: 6.44 Hectares.

Conclusion

Having regard to the Development Plan policies and the design and scale of the proposed extension, the Planning Authority considers that the proposed development constitutes an excessive extension in size and scale of the existing dwelling and is contrary to the Development Plan provisions and as such set an undesirable precedent for similar type of development.

This is considered to be a new dwelling and not a replacement dwelling and further consideration would require compliance with the Rural Housing Policy for the HA-DM zone outlined in Housing Policy 23 of the Development Plan. The following further information is required:

- Evidence to confirm compliance with Policy H23 Objective 1 Rural housing in HA- Dublin Mountains:
- Readvertise the application including a new site notice outlining the full extent of the application including reference to the following:
 - Alterations to the vehicular access and laneway
 - Removal of mature trees and hedgerow

Comhairle Chontae Atha Cliath Theas

PR/0777/22

Record of Executive Business and Chief Executive's Order

- A new well
- Demolition of existing buildings
- Landscape plan
- Sustainable Drainage Systems (SuDS) features

Recommendation

I recommend that **ADDITIONAL INFORMATION** be requested from the applicant with regard to the following:

1. The applicant is required to readvertise the application including a new site notice outlining the full extent of the application including reference to the following:
 - Alterations to the vehicular access and laneway
 - Removal of mature trees and hedgerow
 - A new well
 - Demolition of existing buildings
2. The applicant is requested to submit a landscape plan and associated planting plan to the Planning Authority. The Landscape Plan shall include details of hard and soft landscaping. The Landscape Plan shall be implemented in full, within the first planting season following completion of the development. The Landscape Plan to include a detailed Planting Plan and Planting Schedule stating species/varieties, indicative quantities, sizes, rootball presentation and spacings. Planting mixes should contain pollinator-friendly native species (in accordance with the All-Ireland Pollinator Plan 2015-2020).
3. The applicant is requested to submit a drawing in plan and cross-sectional views clearly showing proposed Sustainable Drainage Systems (SuDS) features for the development. Sample SuDS devices include green roofs, water butts, tree pits, rain gardens, filter strips and permeable paving amongst others. The applicant is referred to the recently published SDCC SuDS Design Guide for further information and guidance.
4. As the application is for a new build dwelling house, the applicant is required to submit evidence to confirm the following as per Policy H23 Objective 1 Rural housing in HA-Dublin Mountains:
 - The applicant is a native of the area; and
 - The applicant can demonstrate a genuine need for housing in that particular area; and
 - The development is related directly to the area's amenity potential or to its use for agriculture, mountain or hill farming; and
 - The development would not prejudice the environmental capacity of the area, and
 - That it would be in keeping with the character of the mountain area.
