Article 11 No: 2480

Re: Article 11 Declaration

Dear Mrs Loughlin

The Agency has reviewed your Article 11 Request, which was received on the 7 January 2020, and, based on the information provided, advises as follows:

The Agency has determined that a Certificate of Registration is required under Class 2 of Part II of the Third Schedule of the Waste Management (Facility Permit & Registration) Regulations 2007, as amended. This determination is contingent on the following conditions of the class being met:

- The maximum amount of waste stored at any one time not exceeding 1,000 tonnes;
- receiving the local authority's approval.

I trust this advice assists.

Yours faithfully

Environmental Licensing Programme
Office of Environmental Sustainability
