Site Handover	Once all the main construction works are completed and the site is ready to be handed back to the client.
Tree Review and Certification	Once all works are complete.

Tree Protection Detail
Protective fence line to protect work exclusion zone around trees being retained.

The tree protection fencing is to be erected enclosing the root protection area and the protective fencing of the tree and its root zone are positioned outside and not inside the protective fencing. The protective fencing is to be erected in accordance with the approved plans and drawings for the development.

When the protective fencing is erected, it will need to be 2m high and constructed in accordance with figure 2 of BS 5837:2012 (see detail on drawing & appendix 1) using vertical and horizontal scaffold bars or similar with concrete or masonry posts. The protective fencing is to be erected in accordance with the approved plans and drawings for the development.

Signs are to be attached to these fences warning people that this is a protective area and that the fencing must be maintained in good condition in accordance with the approved plans and drawings for the development.

Once the protective fence line is erected, then the main construction works can commence on site.
