

Important Safety Notice: Damage to gas pipelines can result in serious injury or death. Gas network information is provided as a general guide. The exact location and depth of medium or high pressure gas pipelines are not shown. It is the responsibility of the contractor to identify and mark gas pipelines before any excavation work. Digging trial holes along the route of the pipe, in consultation with the gas network provider, is recommended. Service pipes are not generally shown but their presence should always be anticipated.

High pressure transmission pipelines are shown in red. If a transmission pipeline is identified within 10m of any intended excavations then work must not proceed before GNI has been consulted. The true location and depth of a transmission pipeline must be verified on site by a representative of GNI. Contact can be made through 1800 427747.

All work in the vicinity of the gas network must be completed in accordance with the current edition of the Health and Safety Authority publication, 'Code of Practice For Avoiding Danger From Underground Services' which is available from the Health and Safety Authority (0818 285 369) or can be downloaded at www.hsa.ie.

Legal Notice: Gas Networks Ireland (GNI) and its affiliates, accept no responsibility for the accuracy of any information contained in this document including that concerning any information originating from any other source. The information is provided for information only. The information should not be relied on for accurate distance or depth of cover measurements.

No liability shall be accepted for any loss or damage, including, without limitation, direct, indirect or consequential loss, arising out of or in connection with the use or re-use of the information.
