Record of Executive Business and Chief Executive's Order

Reg. Reference:SD22A/0028Application Date:02-Feb-2022Submission Type:AdditionalRegistration Date:17-Aug-2022

Information

Correspondence Name and Address: Eoghan Collins Darragh Lynch Architects, Estuary

House, Malahide, co. Dublin

Proposed Development: The provision of 1 new dwelling house, entrance and

all associated site works to the rear of the existing dwelling. Proposed new dwelling to be accessed via

new entrance from Palmers Park.

Location: 6, Boden Villas, Taylors Lane, Ballyboden, Dublin

16

Applicant Name: Ken Keegan **Application Type:** Permission

(COS)

Description of Site and Surroundings

Site Area: stated as 0.041 Hectares on the application.

Site Visit: 8th of March 2022.

Site Description

The subject site is located on Palmer Park, off Taylor's Lane in Ballyboden. The site consists of the rear garden of No. 6 Boden Villas, which is a corner site on Taylor's Lane and Palmer Park and is accessed off Palmer Park. A stream runs through the rear of the site. There are existing mature trees along the eastern and southern boundaries. The site gradually slopes up from north to south.

Proposal

Permission is being sought for the provision of 1 new dwelling house, entrance and all associated site works to the rear of the existing dwelling. Proposed new dwelling to be accessed via new entrance from Palmers Park.

Zoning

The subject site is subject to zoning objective 'RES': 'To protect and/or improve residential amenity' under the South Dublin County Development Plan 2016-2022.

PR/1164/22

Record of Executive Business and Chief Executive's Order

Consultations

Water Services – further information requested.

Irish Water – no objection subject to conditions.

Roads Department – no objection subject to conditions.

Public Realm – refusal recommended.

SEA Sensitivity Screening – no overlap is recorded in the SEA monitoring system.

Submissions/Observations/Representations

None.

Section 11.3.2 Residential Consolidation

(i) Infill Sites

Development on infill sites should meet the following criteria:

- Be guided by the Sustainable Residential Development in Urban Areas Guidelines for Planning Authorities DEHLG, 2009 and the companion Urban Design Manual.
- A site analysis that addresses the scale, siting and layout of new development taking account of the local context should accompany all proposals for infill development. On smaller sites of approximately 0.5 hectares or less a degree of architectural integration with the surrounding built form will be required, through density, features such as roof forms, fenestration patterns and materials and finishes. Larger sites will have more flexibility to define an independent character.
- Significant site features, such as boundary treatments, pillars, gateways and vegetation should be retained, in so far as possible, but not to the detriment of providing an active interface with the street.
- Where the proposed height is greater than that of the surrounding area a transition should be provided (see Section 11.2.7 Building Height).
- Subject to appropriate safeguards to protect residential amenity, reduced open space and car parking standards may be considered for infill development, dwelling sub-division, or where the development is intended for a specific group such as older people or students. Public open space provision will be examined in the context of the quality and quantum of private open space and the proximity of a public park. Courtyard type development for independent living in relation to housing for older people is promoted at appropriate locations. Car parking will be examined in the context of public transport provision and the proximity of services and facilities, such as shops.
- Proposals to demolish a dwelling(s) to facilitate infill development will be considered subject to the preservation of the character of the area and taking account of the structure's contribution to the visual setting or built heritage of the area.

(ii) Corner/Side Garden Sites

Development on corner and/or side garden sites should meet the criteria for infill development in addition to the following criteria:

- The site should be of sufficient size to accommodate an additional dwelling(s) and an appropriate set back should be maintained from adjacent dwellings,
- The dwelling(s) should generally be designed and sited to match the building line and respond to the roof profile of adjoining dwellings,
- The architectural language of the development (including boundary treatments) should respond to the character of adjacent dwellings and create a sense of harmony. Contemporary and innovative proposals that respond to the local context are encouraged, particularly on larger sites which can accommodate multiple dwellings,

PR/1164/22

Record of Executive Business and Chief Executive's Order

- Where proposed buildings project forward of the prevailing building line or height, transitional elements should be incorporated into the design to promote a sense of integration with adjoining buildings, and
- Corner development should provide a dual frontage in order to avoid blank facades and maximise surveillance of the public domain.

OPR Practice Note PN01 Appropriate Assessment Screening for Development Management (March 2021).

Assessment

The main issues for assessment relate to:

- Zoning and Council Policy;
- Previous Reasons for Refusal;
- Residential Amenity;
- Visual Amenity;
- Landscaping;
- Services and Drainage;
- Access and Parking;
- Environmental Impact Assessment; and
- Appropriate Assessment.

Zoning and Council Policy

The proposed development is consistent in principle with zoning objective RES – 'To protect and/or improve residential amenity.' The development of a dwelling is permitted in principle subject to its accordance with the relevant provisions in the Development Plan with specific reference to Section 11.3.2 (i) which relates to Infill Sites and (ii) Corner/Side Garden Sites.

Previous Reasons for Refusal

Permission was previously refused under Reg. Ref. SD20A/0352 for 2 dwellings onsite for 6 reasons relating to in summary:

- 1. Impact on existing residential amenity
- 2. Vehicular access
- 3. Impact on visual and residential amenity
- 4. Appropriate assessment
- 5. Services
- 6. Ecology and biodiversity

It is relevant to assess the current application against these reasons for refusal.

PR/1164/22

Record of Executive Business and Chief Executive's Order

<u>Item 1: Impact on Existing Residential Amenity</u>

The proposed new dwellings, by reason of their excessive height and depth proposed, and the proximity to neighbouring residential properties and their private amenity space, would result in a significant and material loss of light, overshadowing, overlooking and unacceptable sense of enclosure. The proposal would also result in a material loss of existing private rear amenity space and result in a poor quality and quantity of remaining amenity space with a significant lack of usability. Thus, the proposed development would seriously injure the amenity of property in the vicinity and would be contrary to the zoning objective for the area which seeks 'to protect/and or improve residential amenity' and would therefore be contrary to the South Dublin County Council Development Plan 2016 - 2022 and the proper planning and sustainable development of the area.

The subject application involves the construction of 1 no. dwelling, a reduction from the 2 no. previously proposed under Reg. Ref. SD20A/0352. The height of the proposed dwelling is lower than previously proposed and split level, better integrating with the existing slope of the site. The overall height level of the proposed dwelling (two storey element) would be 7.4m. This has reduced from the previously proposed overall height of 9.7m.

The proposed dwelling has been reduced in scale to what was previously proposed. The dwelling would be located approx. 14.2m from the existing dwelling at No. 6 Boden Villas. The closest dwelling to the proposed dwelling would be that located at the rear of the adjoining site at No. 5 Boden Villas. The single storey element of the proposed dwelling would be approx. 3.5m from this existing dwelling. The higher element of the dwelling has been further setback from the western boundary and forward of the existing dwelling. It is therefore considered previous concerns relating to overshadowing and overbearing have been addressed.

The proposed dwelling would have no first floor windows on the western and southern elevations. The closest windows on the northern elevation, facing the dwelling at No. 6, would be to bathrooms and constructed with opaque glass. This would mitigate the potential for overlooking on existing residential development.

The applicant has advised that the primary private amenity space for No. 6 would be the area to the north of this dwelling. This would be sufficiently sized to cater for the existing dwelling. However, the CDP states that private open space should be located behind the front building line of the house and be designed to provide for adequate private amenity. The space is located to the side of the existing dwelling, given that this dwelling is accessed from and faces Palmer Park. However, since this site is a corner site, the private amenity space is located forward of the building line of the existing house when facing Taylor's Lane.

PR/1164/22

Record of Executive Business and Chief Executive's Order

The area to the south of the existing dwelling is surfaced and appears to be used for car parking. The Planning Authority therefore has concerns in relation to the quality of private amenity space retained for the existing dwelling. High walls along the northern and eastern boundaries to provide privacy to the northern area of private open space are not desirable as it is a corner site and would negatively impact passive surveillance and visual amenity. More appropriately designed and located private open space should be explored for the existing dwelling. **The applicant should be requested to address this via additional information.**

It is therefore considered that this reason for refusal has not been fully overcome in relation to private amenity space for the existing dwelling. **This should be addressed via additional information.**

Item 2: Vehicular Access

Having regard to the proposed vehicular access for the proposed dwellings including the proposed parking layouts, the ability of vehicles to safely manoeuvre within and access and egress the site safely and the location of a street tree, the proposed development would generate a traffic hazard and would endanger public safety. The proposal would therefore be contrary to the proper planning and sustainable development of the area.

The new proposal involves a single dwelling and therefore the vehicular access and layout has been revised. The Roads Department has reviewed the proposed development and has no objection subject to conditions relating to the design of the entrance. However, the Public Realm Section has reviewed the proposed development and has concerns regarding the proposed removal of a mature street tree along Palmer Park. It is also noted that the tree is outside of the site boundary, within lands in control of SDCC, and therefore requires the approval of SDCC.

Under SDCC's County Development Plan and Tree Management Policy "Living with Trees" 2021-2026 it is policy to retain trees unless the tree is of limited life expectancy or is small enough to be relocated elsewhere. Exceptional circumstances will be considered by the Council on a case-by-case basis. The applicant advises it is preferable to removal this tree (for the vehicular entrance) and provide a replacement along Palmer Park or within the site.

The Public Realm Section and Planning Authority have concerns in relation to the removal of this tree. Insufficient information has been provided to justify the removal of this street tree. The inappropriate removal of a street tree for a new vehicular entrance could set an undesirable precedent for similar development. If the removal of this tree cannot be justified the layout of development should be revised so that this tree is retained. This would involve moving the proposed vehicular entrance northwards or providing a shared entrance with No. 6. The site boundary (red line) would need to be extended to include the relocated vehicular entrance and existing property at No. 6 Boden Villas.

PR/1164/22

Record of Executive Business and Chief Executive's Order

The Roads Department has requested that, if the entrance is to be amended, plans should be provided demonstrating the provision of a visibility splay of 2.0m x 45m in both directions from the entrance. Sightlines should be shown to the near side edge of the road to the right hand side of entrance and to the centreline of the road to the left hand side of the entrance (when exiting).

If the removal of this tree can be sufficiently justified in relation to Council policy, this justification needs to be clearly set out. A letter of consent would be required from SDCC regarding these works. An appropriate replacement tree planted within the public realm would also be sought. This tree should be appropriately located within the public realm and in relation to existing utilities.

It is therefore considered that this reason for refusal has not been fully overcome. **This should be addressed via additional information.**

Item 3: Impact on Visual and Residential Amenity

The proposed dwellings, by reason of the significant change in ground levels and the excessive depth, height and roof profile proposed would represent overdevelopment and fail to integrate and respond to the site and surrounding context, and therefore would detract from the visual amenity and character of the area. Accordingly, the proposed dwellings would have a negative impact on the visual and residential amenity of the area and therefore are considered to be contrary to the provisions of the South Dublin County Development Plan 2016-2022 and the proper planning and sustainable development of the area.

The dwelling has been designed to be spilt level and therefore better integrated into the existing slope of the site. The dwelling would appear two storey from the north and be single storey at the south. The proposed dwelling would have flat roofs across both the single storey and two storey elements. The proposed dwelling would be higher than the existing dwelling at No. 6. However, is well setback from this dwelling. The dwelling would also be well setback from Taylor's Lane and designed to integrate into the site. So, it would not be highly visible when viewed from this street. It is considered that given its design and scale the proposal would not have a significant negative impact on the visual and residential amenity of the area.

It is therefore considered that this reason for refusal has been satisfactorily overcome.

Item 4: Appropriate Assessment

On the basis of the information submitted including the lack of an Appropriate Assessment screening report, the lack of information in relation to surface water and the proximity of the site to the stream to the south of the site and its hydrological connections to protected sites, the Planning Authority is not satisfied that the proposed development either individually or in combination with other plans or projects would not adversely affect the integrity of the European sites in view of their conservation objectives. The proposal would therefore be contrary to Policy

PR/1164/22

Record of Executive Business and Chief Executive's Order

HCL12 of the South Dublin County Development Plan (2016-2022) which seeks to protect the Natura 2000 network and the proper planning and sustainable development of the area.

A Screening for Appropriate Assessment prepared by JBA Consulting has been submitted with the application. This report concludes that a stage 2 Appropriate Assessment is not required. The Planning Authority notes that the subject site is not located within nor within close proximity to a European site. The proposed development is located within an established area and comprises of a dwelling.

Having regard to:

- the scale and domestic nature of the development,
- the location of the development in a serviced urban area, and
- the consequent absence of a pathway to the European site,

it is considered that the proposed development would not be likely to have a significant effect individually, or in-combination with other plans and projects, on the Natura 2000 network and appropriate assessment is not therefore required.

It is therefore considered that this reason for refusal has been satisfactorily overcome.

Item 5: Services

Having regard to the lack of information submitted in relation to surface water, water and foul drainage, the Planning Authority is not satisfied, on the basis of the information submitted, that the proposed development would not be prejudicial to public health and therefore is not in the interests of the proper planning and sustainable development of the area.

Information regarding proposed surface water, water supply and foul water drainage has been submitted. Water Services and Irish Water have raised the setback of the proposed dwelling from the existing surface water sewer and watermain to the east of the site. The applicant should be requested to **submit additional information confirming sufficient setback distances can be achieved from these pipes.** It is therefore considered that this reason for refusal has not been fully overcome. However, it is noted that no objections have been raised in relation to the proposed service provision for the proposed development.

<u>Item 6: Ecology and Biodiversity</u>

Having regard to the lack of information submitted in relation to ecology and biodiversity and the potential for the site and surrounding area to support wildlife, the Planning Authority is not satisfied, on the basis of the information submitted, that the proposed development would not be prejudicial to biodiversity. The proposed dwelling would also be located within 10m of an existing watercourse. The proposal is therefore considered to be contrary to policy G3 objective 2 and policy HCL15 of the South Dublin County Development Plan (2016-2022) which seeks to protect watercourses and biodiversity, and the proper planning and sustainable development of the area.

PR/1164/22

Record of Executive Business and Chief Executive's Order

An Ecological Impact Assessment prepared by JBA Consulting has been submitted with the application. The mitigation measures outlined in this assessment should be conditioned in the event of a grant of permission. The layout has been revised so that the proposed dwelling would be located approx. 11.2 to 11.8 m from the Whitechurch stream. The retention of vegetation along the watercourse is welcomed. The applicant states there would be no alterations proposed to the stream.

A preliminary bat roost survey has been undertaken. However, no bat activity survey has been undertaken. The JBA ecologist states that the site has been valued as being of high local ecological importance for bats. A bat activity survey should be undertaken within the appropriate season. Any recommended measures from this should be incorporated into the proposed development. **This should be requested via additional information.**

It is therefore not considered that this reason for refusal has been fully overcome. **Additional** information should be provided in relation to bat activity.

Residential Amenity

Existing residential amenity

Existing residential properties are located to the north and east of the site, Boden Villas along Taylor's Lane, to the east of the site in Kingston Court and to the south along Palmer Park. The applicant has provided a site layout plan which shows the proposed dwelling in relation to the existing properties in the area. It is noted that there are significant level differences in the site with the site sloping upwards from north to south.

The site of the proposed dwelling comprises of the existing rear garden for No. 6 Boden Villas. The proposed dwelling would be approx. 14.2 m from this existing dwelling. The height of the proposed dwelling would be higher than existing. The remaining garden area for No. 6 after development would be to the north of the dwelling. The applicant should be requested to address the quality of private amenity space retained for the existing dwelling **via additional information.**

No. 5 Boden Villas adjoins the site to the west. No. 5 has previously been extended to the rear with outbuildings. On review of the planning history of this site, the detached structure to the rear of the dwelling at No. 5 is also noted as a dwelling. As noted previously the higher element of the proposed dwelling has been located further away from this western boundary.

The proposed dwelling would be approx. 20.4m from No. 17 Palmer Park to the south. The proposed dwelling is therefore considered to be sufficiently setback from residential development to the south of the site.

PR/1164/22

Record of Executive Business and Chief Executive's Order

Standard of proposed accommodation

The proposed dwelling would be approx. 113.0sq.m in size with a private amenity space of approx. 162.5sq.m. The dwelling and private amenity would meet the minimum space standards for houses, as per Table 11.20 of the CDP. It is noted that the site slopes upwards which raises the question of the usability of the rear amenity space. However, this can be addressed via landscaping as a condition in the event of a grant of permission.

The private amenity space appears to be calculated to include up to the stream. However, it is noted that the trees and vegetation along this stream would be retained. It is considered that there is sufficient space in this instance to cater for a buffer along the stream and an area of private amenity space for the dwelling. In the event of a grant of permission the Planning Authority will consider including a condition requiring permission for any development falling within Classes 1 or 3 of Schedule 2, Part 1 of the Planning and Development Regulations 2001 (as amended).

The proposed dwelling would include 3 no. bedrooms, which would all meet the minimum floorspace requirements of the CDP. Regarding storage, the minimum requirement for a two-storey dwelling of this size of 5sq.m. Sufficient storage space in line with these requirements would be provided.

Visual Amenity

Section 11.3.2 of the County Development Plan sets out a number of design criteria in relation to infill and corner/side garden sites. On smaller sites of approximately 0.5 hectares or less a degree of architectural integration with the surrounding built form will be required, through density, features such as roof forms, fenestration patterns and materials and finishes.

The proposed dwelling would be one to two storeys, split level. It would be of a contemporary design compared to the existing dwelling. The materials and finishes would be selected render and brick finishes. The use of these materials is considered to be acceptable. The existing residential development in the immediate area is quite varied with a mix of dwelling designs, forms and styles. As such, a proposed contemporary design is acceptable in this instance.

Existing mature vegetation along the boundaries is to be retained, save for border planting along the eastern boundary. This would assist in screening the proposed dwelling. However, it is noted that the development is of a quality design.

PR/1164/22

Record of Executive Business and Chief Executive's Order

Landscaping

The Public Realm Section has reviewed the proposed development and recommend refusal: *Proposed Removal for Street Tree (Identified as No. 5)*

As per South Dublin County Council's Tree Management Policy SDCC's "Living with Trees" 2021-2026

_	~ .	C 10	.		
	Section	6.181	Driveways	and nev	v entrances

Policy: The Council will not normally support either the removal of a tree or cutting of a tree's roots for the construction of vehicle crossovers and / or alterations to residential driveway access, unless the tree is of limited life expectancy or is small enough to be relocated elsewhere. Exceptional circumstances will be considered by the Council on a case-by-case basis.

☐ Section 4.3 Reasons for tree pruning and felling

Policy: The Council will wherever possible try to avoid removing a tree or undertaking unnecessary pruning works where there is no good arboriculture reason. It has a duty to manage the tree population for the benefit of the wider community and in accordance with good arboriculture practices

The Council will undertake tree works to fulfil its legal obligations to ensure the safety of the public and properties. Tree works will be undertaken:

- Where an inspection has identified visible decay, fungal brackets indicating possible root and trunk decay or any other defect that would lead to the tree failing.
- A tree is dead or visibly in decline.
- To abate an actionable nuisance, where branches are touching buildings, e.g., physical contact with walls, windows and gutters.
- Where road signs, traffic signals, streetlights, and sightlines for vehicles and pedestrians are obscured.
- Evidence has been provided that the tree is a contributing factor in causing structural damage that cannot be reasonably addressed by an alternative solution and proactive tree management has had no mitigating effect.

As per the above, the Public Realm objects to the proposed removal of the street No. 5 as identified on the submitted Tree Impacts Plan, this tree which is outside the red line boundary and located in the grass margin is a public tree therefore the responsibility for its maintenance and/or proposed removal lies with the Public Realm Section of SDCC. This tree should be retained and protected during the course of any proposed development works with suitable tree protection fencing and included on the relevant Tree Protection Plan. As the applicant has proposed the removal of this SDCC Tree then the Public Realm Section would recommend the REFUSAL of this proposed planning application.

PR/1164/22

Record of Executive Business and Chief Executive's Order

Protection of Existing Trees

To ensure the protection of the existing trees in the adjacent grass margin suitable tree protection fencing must be erected prior to all construction operations occurring on site. This tree protection fencing must be in accordance with BS 5837:2012.

Trees are an intrinsically valuable part of the environment, particularly in an urban setting. They provide environmental, social, economic, health, amenity and functional benefits. Street trees assist in maintaining and enhancing biodiversity in the urban environment and provide habitat for a wide range of bird and animal life. They also assist in providing wildlife corridors for migratory species. In addition, the retention of existing street trees and planting of new trees can assist in moderating the effects of climate change. Therefore, every effort should be made to retain and protect existing trees and hedgerows from the potential negative impacts of development.

Landscape Plan

A landscape scheme shall be provided which helps to integrate the development into the local landscape and through suitable planting provides visual screening, mitigation of negative visual effects and which improves local biodiversity and green infrastructure links.

Riparian Zone/Set back

The applicant is advised that the Parks Section has concerns in relation to the impact of the proposed development on biodiversity, in particular, the set back from the river and its impact of existing vegetation. In this context the applicant is requested to submit the following:

☐ A re-designed site layout plan with minimum of 10m from the bank of the watercourse
located along the southern boundary of the proposed development in accordance with Chapter
8: Green Infrastructure G3 Objective 2 of the South Dublin County Development Plan 2016-
2022.

The Public Realm Section has assessed the proposed development in accordance with the policies and objectives of the County Development Plan 2016-2022 and with best practice guidelines and recommends the following:

In the first instance the Public Realm would recommend REFUSAL of this proposed development due to is impact and proposed removal of the existing mature street tree in the adjoining grass margin.

PR/1164/22

Record of Executive Business and Chief Executive's Order

However, if it is proposed to request ADDITIONAL INFORMATION or GRANT PERMISSION then the following conditions should apply;

1. Arboricultural Impact of the Proposed Development

The proposed removal of the street tree (Identified as Tree No. 5 on submitted tree related drawings) is not acceptable to the Public Realm Section; and would contravene policy G2 Objective 9, G4 Objective 5, G2 Objective 13, G6 Objective 1, HCL15 Objective 3 and other GI policies and objectives in the CDP. Response should include a revised/alternative layout which does not require the removal of this street. ADDITIONAL INFORMATION/CONDITION REASON: To ensure that the trees on site are adequately protected, to safeguard the character and appearance of the area, in accordance with policies G2 Objective 9, G4 Objective 5, G2 Objective 13, G6 Objective 1, HCL15 Objective 3 of the CDP 2016-2022.

2. Landscape Plan

The site shall be landscaped in accordance with a comprehensive scheme of landscaping which includes boundary planting; details of which shall be submitted to the Planning Authority. In addition to the Landscape Plan, the applicant should provide a fully detailed landscape plan with full works specification. The landscape proposals to be prepared by a suitably qualified landscape architect.

The planting plan should provide the following information:

- Location of species types, schedule of plants noting species, planting sizes and proposed numbers/densities where appropriate
- *Implementation timetables*

CONDITION

REASON: In the interests of visual amenity and integrating the development into the landscape in accordance with relevant policies in the CPD 2016-2022.

3. Protection of Existing Trees

To ensure the protection of trees to be retained with the site the applicant shall implement all the recommendations pertaining to tree retention, tree protection and tree works, as detailed in the submitted Arboricultural Report and Tree Protection Plan prepared by The Tree File. The arborist shall carry out a post construction tree survey and assessment on the condition of the retained trees. A completion certificate is to be signed off by the arborist when all permitted development works are completed and in line with the recommendations of the tree report. The certificate shall be submitted to the planning authority for written agreement upon completion of the works.

CONDITION

REASON: To ensure and give practical effect to the retention, protection and sustainability of trees during and after construction of the permitted development in accordance with relevant policies in the CPD 2016-2022.

PR/1164/22

Record of Executive Business and Chief Executive's Order

4. Tree Bond

A maximum of two weeks from the date of Commencement Notice within the meaning of Part II of the Building Control Regulations 1997 and prior to the commencement of any works on site, a Bond or bank draft to the value of €7,500 shall be lodged with the Planning Authority as a security for the protection of the existing street tree in the grassed margin along the northern boundary of the site during the course of the development works.

The release of the bond will be considered a minimum 12 months after the completion of all site works, at the discretion of the Landscape/Public Realm Section. This will involve assessment of whether the tree specified for retention have been preserved in their prior condition and have suffered no damage and the developer has complied with the requirements of the Planning Authority in relation to tree protection.

REASON: In the interest of the proper planning and sustainable development of the area, street-tree protection, and the maintenance of the county's green infrastructure in accordance with relevant policies in the CPD 2016-2022.

5. Post construction Tree Report

To ensure the protection of the trees to be retained in the adjacent grass margin, the developer shall implement all the recommendations pertaining to tree retention as outlined within the submitted tree report. The developer shall retain the services of its arboricultural consultant throughout the life of the site development works to ensure the protection of all trees listed for retention. The arborist shall carry out a post construction tree survey/assessment on the condition of the retained trees. A completion certificate is to be signed off by the arborist when all works are completed and in line with the submitted original landscape drawings

6. Riparian Zone/Set back

The applicant is advised that the Parks Section has concerns in relation to the impact of the proposed development on biodiversity, in particular, the set back from the river and loss of hedgerow. In this context the applicant is requested to submit the following: A re-designed site layout plan with minimum of 10m from the bank of the watercourse located along the southern boundary of the proposed development in accordance with Chapter 8: Green Infrastructure G3 Objective 2 of the South Dublin County Development Plan 2016-2022.

REASONS: In the interests of amenity, ecology and sustainable development in accordance with relevant policies in the CPD 2016-2022.

The report from Public Realm is noted. It is considered that the concerns regarding the removal of the mature street tree can be addressed via **additional information**, given that the development is acceptable in principle.

PR/1164/22

Record of Executive Business and Chief Executive's Order

The proposed dwelling would be setback over 10 m from the existing watercourse. The existing trees along this stream would be retained. The other items from this report i.e., landscape plan can be addressed via conditions.

Services and Drainage

Water Services has reviewed the proposed development and requests further information in relation to surface water:

The proposed development is too close to an existing surface water sewer at approximately 3m (5m setback distance is required as a minimum) from the outside diameter of a 750mm surface water sewer east of site. The applicant is required to submit a drawing in plan and cross-sectional views showing the distance between the proposed extensions and the existing 750mm surface water sewer. The drawings shall also show the invert levels of the existing 750 surface water sewer and any adjacent proposed building foundations. A minimum clear setback distance of 5m is required between all building foundations and a surface water sewer this size. The distance measurement of proposed development to existing 750mm surface water sewer shall be carried out in the presence of a South Dublin County Council Official.

Irish Water has reviewed the proposed development and has no objection subject to the following conditions:

1 Water

- 1.1 South Dublin County Council records show that there is an existing 150mm watermain to the east of the site. The applicant is required to submit a drawing in plan and cross-sectional views showing the distance between the proposed extensions and the existing 150mm foul water sewer. The drawings shall also show the invert levels of the existing 150 watermain and any adjacent proposed building foundations. A minimum clear setback distance of 3m is required between all building foundations and a watermain this size according to Irish Water Standard Details for Water Infrastructure.
- 1.2 Obtain a letter of confirmation of feasibility from Irish Water and submit same to the planning authority.
- Where the applicant proposes to connect to a public water/wastewater network operated by Irish Water, the applicant must sign a connection agreement with Irish Water prior to the commencement of the development and adhere to the standards and conditions set out in that agreement.

REASON: In the interest of public health and to ensure adequate water facilities.

2 Foul

- Where the applicant proposes to connect to a public water/wastewater network operated by Irish Water, the applicant must sign a connection agreement with Irish Water prior to the commencement of the development and adhere to the standards and conditions set out in that agreement.

PR/1164/22

Record of Executive Business and Chief Executive's Order

REASON: In the interest of public health and to ensure adequate waste water facilities.

It is recommended that the applicant addresses these concerns by way of additional information.

Access and Parking

The Roads Department has reviewed the proposed development and has no objection subject to conditions:

A Mature tree which is adjacent to proposed vehicular entrance is to be removed subject to approval from SDCC Parks Department.

There is no information given on the heights of the boundary wall and pillars at the vehicular entrance.

No Roads objections subject to the following conditions:

- 1. The vehicular access points shall be limited to a width of 3.5 meters.
- 2. The boundary walls at vehicle access points shall be limited to a maximum height of 0.9m, and any boundary pillars shall be limited to a maximum height of 1.2m, in order to improve forward visibility for vehicles.
- 3. Footpath and kerb shall be dished and widened, and the dropped crossing shall be constructed to the satisfaction of South Dublin County Council and at the applicant's expense. The footpath and kerb shall be dished and widened to the full width of the proposed widened driveway entrance.
- 4. Applicant to submit details of discussions with Parks in resolving Tree conflict with access point.
- 5. Any gates shall open inwards and not out over the public domain.
- 6. All vehicles parked in the driveways must exit the site in a forward direction. No vehicles to reverse onto the public roadway at any time.

This report is noted and should be conditioned as such in the event of a grant of permission. If the vehicular entrance has to be amended in relation to the street tree via additional information, this information should be provided along with sightlines.

Screening for Environmental Impact Assessment

Having regard to the modest nature of the proposed development, and the distance of the site from nearby sensitive receptors, there is no likelihood of significant effects on the environment arising from the proposed development. The need for environmental impact assessment can, therefore, be excluded at preliminary examination and a screening determination is not required.

PR/1164/22

Record of Executive Business and Chief Executive's Order

Screening for Appropriate Assessment

Appropriate Assessment screening addressed previously in this report. This confirms that no stage 2 Appropriate Assessment is required.

Conclusion

Having regard to the:

- provisions of the South Dublin County Development Plan 2016-2022,
- previous reasons for refusal under Reg. Ref. SD20A/0352,
- the established character of the area, and
- the nature and scale of the proposed development,

it is considered that **Additional Information** is required, to ensure the proposed development would be in compliance with Council policy, would not seriously injure the amenities of the area or of property in the vicinity and would, therefore, be in accordance with the proper planning and sustainable development of the area.

Recommendation

Request Additional Information.

Additional Information

Additional Information was requested on the 29th of March 2022 Additional Information was received on the 17th of August 2022 (not deemed significant).

Additional Information Consultations

Water Services – recommend refusal.

Irish Water – recommend refusal.

Roads Department – no objection subject to conditions.

Public Realm – no objection subject to conditions.

South Dublin County Development Plan 2022-2028

Since the additional information request was issued, the South Dublin County Development Plan 2022-2028 has come into effect, as of the 3rd of August 2022. The additional information submitted will be assessed under this Plan.

The following policies and objectives are considered relevant to the proposed development:

Policy GI1: Overarching Policy GI2: Biodiversity

Policy GI3: Sustainable Water Management Policy GI4: Sustainable Drainage Systems

Policy QDP2: Overarching - Successful and Sustainable Neighbourhoods

Policy QDP3: Neighbourhood Context

Policy QDP7: High Quality Design – Development General

PR/1164/22

Record of Executive Business and Chief Executive's Order

Policy QDP7: High Quality Design – Street Frontage

Policy QDP7: High Quality Design – Adaptability and Inclusivity

Policy QDP8: High Quality Design – Building Height and Density Guide (BHDG)

Policy QDP9: High Quality Design - Building Height and Density

Policy QDP11: Materials, Colours and Textures

Policy H7: Residential Design and Layout

Policy H8: Public Open Space

Policy H9: Private and Semi-Private Open Space Policy H10: Internal Residential Accommodation

Policy H11: Privacy and Security

H11 Objective 3:

To ensure that private open spaces, where it consists of gardens, are enclosed within perimeter blocks behind the building line and that they are subdivided by suitably robust boundary treatments of a sufficient height and composition to provide adequate privacy and security. In limited circumstances, some discretion may be provided for where the configuration of the space can provide for private and secure space, to a high quality, elsewhere on the site than behind the building line.

H11 Objective 4:

To ensure that opposing balconies and windows at above ground floor level have an adequate separation distance, design or positioning to safeguard privacy without compromising internal residential amenity.

Policy H12: Steep or Varying Topography Sites

Policy H13: Residential Consolidation

Promote and support residential consolidation and sustainable intensification at appropriate locations, to support ongoing viability of social and physical infrastructure and services and meet the future housing needs of the County.

H13 Objective 3:

To favourably consider proposals for the development of corner or wide garden sites within the curtilage of existing houses in established residential areas, subject to appropriate safeguards and standards identified in Chapter 12: Implementation and Monitoring.

H13 Objective 5:

To ensure that new development in established areas does not unduly impact on the amenities or character of an area.

Policy SM7: Car Parking and EV Charging

PR/1164/22

Record of Executive Business and Chief Executive's Order

Policy COS5: Parks and Public Open Space – Overarching COS5 Objective 7:

To require at the sole discretion of the Planning Authority a pro rata contribution in lieu of provision of public open space where, due to the small size, configuration or location of a particular development or on sites with less than three units it is not possible to provide functional public open space on site.

Policy E3: Energy Performance in Existing and New Buildings

Policy IE2: Water Supply and Wastewater Policy IE3: Surface Water and Groundwater

12.3.1 Appropriate Assessment

12.3.2 Ecological Protection

12.3.3 Environmental Impact Assessment

12.4.2 Green Infrastructure and Development Management

12.5.1 Universal Design

12.5.2 Design Considerations and Statements

12.5.3 Density and Building Heights

12.5.4 Public Realm: (At the Site Level)

12.6.7 Residential Standards

12.6.8 Residential Consolidation

Infill Sites

Corner / Side Garden Sites

Development on corner and / or side garden sites should be innovative in design appropriate to its context and should meet the following criteria:

- In line with the provisions of Section 6.8 Residential Consolidation in Urban Areas the site should be of sufficient size to accommodate an additional dwelling(s) and an appropriate set back should be maintained from adjacent dwellings ensuring no adverse impacts occur on the residential amenity of adjoining dwellings;
- Corner development should provide a dual frontage in order to avoid blank facades and maximise passive surveillance of the public domain;
- The dwelling(s) should generally be designed and sited to match the front building line and respond to the roof profile of adjoining dwellings where possible.
- Proposals for buildings which project forward or behind the prevailing front building line, should incorporate transitional elements into the design to promote a sense of integration with adjoining buildings;
- The architectural language of the development (including boundary treatments) should generally respond to the character of adjacent dwellings and create a sense of harmony.

PR/1164/22

Record of Executive Business and Chief Executive's Order

Contemporary and innovative proposals that respond to the local context are encouraged, particularly on larger sites which can accommodate multiple dwellings;

- A relaxation in the quantum of private open space may be considered on a case by- case basis whereby a reduction of up to a maximum of 10% is allowed, where a development proposal meets all other relevant standards and can demonstrate how the proposed open space provision is of a high standard, for example, an advantageous orientation, shape and functionality;
- Any provision of open space to the side of dwellings will only be considered as part of the overall private open space provision where it is useable, good quality space. Narrow strips of open space to side of dwellings shall not be considered as private amenity space.

12.6.10 Public Open Space

12.7.1 Bicycle Parking / Storage Standards

12.7.4 Car Parking Standards

12.10.1 Energy Performance in New Buildings

12.11.1 Water Management

12.11.3 Waste Management

12.11.4 Environmental Hazard Management

The key policies and objectives relevant to the proposed development are assessed as follows: *Green Infrastructure*

The subject site is located along a Secondary GI Corridor. as identified on Figure 4.4: Green Infrastructure Strategy Map of the 2022-2028 CDP.

Under section 12.4.2, the CDP states that all planning applications shall demonstrate how they contribute to the protection or enhancement of Green Infrastructure in the County through the provision of green infrastructure elements as part of the application submission, The development should, at a minimum, protect any existing GI assets and enhance same.

Surface water attenuation is proposed via an underground gravel filled attenuation area, and SUDS measures including a part green roof and permeable paving. The submitted drainage report states that a soakaway could not fit on the site due to the required setback distances. The existing trees and vegetation along the rear (south) of the site and boundary (east) are to be retained. This includes the vegetation along the watercourse to the south. This is to be welcomed.

Given the above, the proposed development is considered to comply with Policy Objectives GI1 Objective 4, GI14 Objective 1, GI12 Objective 4 and Section 12.4.2 of the CDP 2022-2028.

PR/1164/22

Record of Executive Business and Chief Executive's Order

Public Open Space

While a contribution in lieu of public open space provision can be considered at the Planning Authority's discretion, under COS5 Objective 7 of the CDP, in this instance in consideration of the minimal quantum that would be owed and to the adequate provision of open space on site to meet the needs of the residents as well as the strip of public open space bounding the site and green across the road, a contribution will not be sought.

Private Open Space

Private open space is assessed under the following section of this report in relation to H11 Objective 3.

Assessment

Item 1 Requested

The Planning Authority has concerns regarding the quality of private amenity space retained for the existing dwelling at No. 6 Boden Villas. The applicant is requested to consider more appropriately designed and located private open space for the existing dwelling. The South Dublin County Development Plan 2016-2022 states that private open space should be located behind the front building line of the house and be designed to provide for adequate private amenity. The area of private amenity space identified for the existing dwelling is located to its side, given that this dwelling is accessed from and faces Palmer Park. However, since this site is a corner site, the private amenity space is located forward of the building line of the existing house when facing Taylor's Lane. The area to the south of the existing dwelling is surfaced and appears to be used for car parking. Changes to the walls along the northern and eastern boundaries to make them higher will not be acceptable.

Applicant's Response:

The applicant states that when Palmer Park was constructed, a new entrance for No. 6 was constructed off this road. The walls at the corner of Taylor's Lane and Palmers Park were increased in height to provide private open space for No. 6. This space is considered to provide adequate quality private open space for the existing dwelling.

In order to further improve the quality of this space it is proposed to erect a timber garden fence from the north east corner of No. 6 to the high section of wall on Palmer Park. This will provide additional screening.

Assessment:

The proposed development would remove the availability of the southern private amenity space for the existing dwelling. The area of private amenity space that would remain for the use of the existing dwelling is located to the north, on the corner of the site.

The location of the remaining private amenity space for the existing dwelling is not desirable, being on the corner of the site. However, it is noted that because the pedestrian and vehicular

PR/1164/22

Record of Executive Business and Chief Executive's Order

access has been moved to the eastern 'side' of the site, the site has an irregular layout, compared to similar sites in the area.

It is also noted under the 2022-2028 CDP H11 Objective 3 states:

To ensure that private open spaces, where it consists of gardens, are enclosed within perimeter blocks behind the building line and that they are subdivided by suitably robust boundary treatments of a sufficient height and composition to provide adequate privacy and security. In limited circumstances, some discretion may be provided for where the configuration of the space can provide for private and secure space, to a high quality, elsewhere on the site than behind the building line.

This remaining private amenity space would be a consolidated area approx. 110sq.m in size. Adequate screening is provided. It is therefore considered that in this instance, and given H11 Objective 3, the remaining private amenity space for the existing dwelling is acceptable.

This item has therefore been satisfactorily addressed.

Item 2 Requested

The Public Realm Section and the Planning Authority have concerns in relation to the removal of a street tree to provide for the new vehicular entrance. Insufficient information has been provided to justify the removal of this street tree. The inappropriate removal of a street tree for a new vehicular entrance could set an undesirable precedent for similar development. If the removal of this tree cannot be justified the layout of development should be revised so that this tree is retained. This would involve moving the proposed vehicular entrance northwards or providing a shared entrance with No. 6. The site boundary (red line) would need to be extended to include the relocated vehicular entrance and existing property at No. 6 Boden Villas. If the removal of this tree can be sufficiently justified in relation to Council policy, this justification needs to be clearly set out. A letter of consent would be required from SDCC regarding these works. An appropriate replacement tree planted within the public realm would also be sought. This tree should be appropriately located within the public realm and in relation to existing utilities.

Applicant's Response:

The applicant has moved the proposed vehicular access northward to ensure that the street tree can be retained.

Assessment:

The street tree is to be retained so this item has been satisfactorily addressed. Public Realm have reviewed the information submitted and have no objection subject to conditions. Public Realm recommend conditions including relating to the landscape plan, protection of existing trees, tree

PR/1164/22

Record of Executive Business and Chief Executive's Order

bond, post-construction tree report, and riparian zone/set back. These are noted and should be attached as appropriate to a grant of permission. The riparian zone/setback has been addressed and a condition restricting exempted development in the form of extension(s) to the proposed house (particularly to the south) should be included. This is to allow for sufficient space for private amenity and a riparian zone.

It is therefore considered that this item has been satisfactorily addressed subject to conditions.

Item 3 Requested

If the proposed vehicular entrance is to be amended the applicant is requested to provide accurate plans demonstrating the provision of a visibility splay of 2.0m x 45m in both directions from the entrance. Sightlines should be shown to the near side edge of the road to the right hand side of entrance and to the centreline of the road to the left hand side of the entrance (when exiting).

Additional information should also be provided addressing the following:

- (a) The vehicular access points limited to a width of 3.5 meters.
- (b) The boundary walls at vehicle access points limited to a maximum height of 0.9m, and any boundary pillars limited to a maximum height of 1.2m, in order to improve forward visibility for vehicles.
- (c) Footpath and kerb dished and widened, and the dropped crossing constructed to the satisfaction of South Dublin County Council and at the applicant's expense. The footpath and kerb dished and widened to the full width of the proposed widened driveway entrance.

 (d) Any gates shall open inwards and not out over the public domain.

Applicant's Response:

The applicant has submitted revised drawings for the revised vehicular access.

Assessment:

The Roads Department have reviewed the revised access and have no objection subject to conditions. This includes regarding the dishing of the footpath and kerb, gates to open inwards and that all vehicles must exit the site in a forward direction. The condition requiring vehicles to exit the site in a forward direction is considered to be unenforceable and should not be attached. The other conditions should be included in a grant of permission.

It is therefore considered that this item has been satisfactorily addressed subject to conditions.

Item 4 Requested

The applicant is requested to undertake and submit a bat survey(s) for bat activity carried out across the entire site and immediately adjoining sites to assess roosting and feeding/foraging activities and assessing potential impact on these species arising from the proposed development. The survey shall be undertaken by a qualified and experienced bat surveyor

PR/1164/22

Record of Executive Business and Chief Executive's Order

carrying professional indemnity insurance during the correct time of the year and under the weather conditions appropriate for a survey of such species. The recommended measures from this survey(s) should be addressed in the proposed development.

Applicant's Response:

The applicant has submitted a revised Ecological Impact Assessment prepared by JBA Consulting, dated in August 2022. The bat section of this report has been updated to include detail of a desk study, a preliminary bat roost survey and a static activity survey.

The preliminary bat roost survey was conducted during the ecological walkover of the site in November 2021. An absence of potential bat roosting features was recorded. A static bat detector was installed onsite with recording documented from the 29th of June to the 4th of July. The results suggest that bats only commute through the site on occasion.

This report states that the site has been valued as being of high local ecological importance for bats. Mitigation is proposed including in relation to site lighting during construction and operation.

Assessment:

The revised EcIA report is noted. A condition should be attached requiring the mitigation measures from the EcIA to be implemented. This includes restrictions on lighting so that a dark corridor is maintained at all times along the southern part/boundary of the site.

It is therefore considered that this item has been satisfactorily addressed subject to conditions.

Item 5 Requested

The proposed development is too close to an existing surface water sewer at approximately 3m (5m setback distance is required as a minimum) from the outside diameter of a 750mm surface water sewer east of site. The applicant is requested to submit a drawing in plan and cross-sectional views showing the distance between the proposed dwelling and the existing 750mm surface water sewer. The drawings should also show the invert levels of the existing 750 surface water sewer and any adjacent proposed building foundations. A minimum clear setback distance of 5m is required between all building foundations and a surface water sewer this size. The distance measurement of proposed development to existing 750mm surface water sewer shall be carried out in the presence of a South Dublin County Council Official.

Applicant's Response:

The applicant has submitted drawings showing a 5m setback from the existing surface water sewer. The building has been slightly rotated so that no part of the foundation is within 5m of this sewer.

PR/1164/22

Record of Executive Business and Chief Executive's Order

Assessment:

Water Services have reviewed the information submitted and raise concerns in relation to whether a 5m setback from the surface water sewer is provided. The submitted Site Drainage Plan states a scale of 1:100, however, this does not appear to apply to the site plan drawing on this sheet (but applies to cross section).

The site plan drawing appears to be at a scale of 1:150. This is supported by the other submitted drawings and relevant dimensions. This confirms that the proposed house and foundation would be setback 5m from the surface water sewer.

The report from Water Services is noted. However, it is considered sufficient information has been submitted to confirm that the required setback would be achieved.

It is therefore considered that this item has been satisfactorily addressed.

Item 6 Requested

- (a) South Dublin County Council records show that there is an existing 150mm watermain to the east of the site. The applicant is requested to submit a drawing in plan and cross-sectional views showing the distance between the proposed dwelling and the existing 150mm foul water sewer. The drawings should also show the invert levels of the existing 150 watermain and any adjacent proposed building foundations. A minimum clear setback distance of 3m is required between all building foundations and a watermain this size according to Irish Water Standard Details for Water Infrastructure.
- (b) The applicant is requested to obtain a letter of confirmation of feasibility for water and wastewater connections from Irish Water and submit same to the Planning Authority.

Applicant's Response:

The applicant has submitted drawings showing that the proposed house is setback over 3m from the existing watermain.

Assessment:

Irish Water have raised similar concerns to Water Services in relation to the scale of the Site Drainage Plan and whether the required setback distance has been achieved. The Planning Authority considers that the information submitted, when using the correct scale, shows that the proposed house and foundation would be setback over 3m from the watermain. It is therefore considered that this item has been satisfactorily addressed.

PR/1164/22

Conclusion

Having regard to the:

- provisions of the South Dublin County Development Plan 2022-2028,
- the established character of the area, and
- the nature and scale of the proposed development,

it is considered that, subject to compliance with the conditions set out below, the proposed development would be in compliance with Council policy, would not seriously injure the amenities of the area or of property in the vicinity and would, therefore, be in accordance with the proper planning and sustainable development of the area.

Recommendation

I recommend that a decision be made pursuant to the Planning & Development Act 2000, as amended, for the reasons set out in the First Schedule hereto, to Grant Permission for the said development in accordance with the said plans and particulars, subject to the condition(s) specified in the Second Schedule hereto, the reasons for the imposition of the said condition(s) being as set out in the said Second Schedule.

PR/1164/22

Record of Executive Business and Chief Executive's Order

FIRST SCHEDULE

It is considered that the proposed development accords with the policies and objectives of South Dublin County Council, as set out in the South Dublin County Council Development Plan 2022 - 2028 and subject to the conditions set out hereunder in the Second Schedule is hereby in accordance with the proper planning and sustainable development of the area.

SECOND SCHEDULE

Conditions and Reasons

1. Development to be in accordance with submitted plans and details.

The development shall be carried out and completed in its entirety in accordance with the plans, particulars and specifications lodged with the application, and as amended by Further Information received on the 17th of August 2022, save as may be required by the other conditions attached hereto.

REASON: To ensure that the development shall be in accordance with the permission, and that effective control be maintained.

2. Irish Water Connection Agreement.

Prior to the commencement of development the applicant or developer shall enter into water and/or wastewater connection agreement(s) with Irish Water.

REASON: In the interest of public health and to ensure adequate water/wastewater facilities.

3. Landscape Plan

The site shall be landscaped in accordance with a comprehensive scheme of landscaping which includes boundary planting; details of which shall be submitted to the Planning Authority. In addition to the Landscape Plan, the applicant should provide a fully detailed landscape plan with full works specification. The landscape proposals to be prepared by a suitably qualified landscape architect.

The planting plan should provide the following information:

- Location of species types, schedule of plants noting species, planting sizes and proposed numbers/densities where appropriate
- Implementation timetables

REASON: In the interests of visual amenity and integrating the development into the landscape in accordance with relevant policies in the CDP 2022-2028.

4. Protection of Existing Trees

To ensure the protection of trees to be retained with the site and in the adjacent grass margin, the applicant/developer shall implement all the recommendations pertaining to tree retention, tree protection and tree works, as detailed in the submitted Arboricultural Report and Tree Protection Plan prepared by The Tree File. The applicant/developer shall retain the services of an arboricultural consultant throughout the life of the site

PR/1164/22

Record of Executive Business and Chief Executive's Order

development works to ensure the protection of all trees listed for retention. The arborist shall carry out a post construction tree survey and assessment on the condition of the retained trees. A completion certificate is to be signed off by the arborist when all permitted development works are completed and in line with the recommendations of the tree report. The certificate shall be submitted to the planning authority for written agreement upon completion of the works.

REASON: To ensure and give practical effect to the retention, protection and sustainability of trees during and after construction of the permitted development in accordance with relevant policies in the CDP 2022-2028

5. Tree Bond

A maximum of two weeks from the date of Commencement Notice within the meaning of Part II of the Building Control Regulations 1997 and prior to the commencement of any works on site, a Bond or bank draft to the value of €7,500 shall be lodged with the Planning Authority as a security for the protection of the existing street tree in the grassed margin along the northern boundary of the site during the course of the development works.

The release of the bond will be considered a minimum 12 months after the completion of all site works, at the discretion of the Landscape/Public Realm Section. This will involve assessment of whether the tree specified for retention have been preserved in their prior condition and have suffered no damage and the developer has complied with the requirements of the Planning Authority in relation to tree protection.

REASON: In the interest of the proper planning and sustainable development of the area, street-tree protection, and the maintenance of the county's green infrastructure in accordance with relevant policies in the CDP 2022-2028.

6. Ecological Impact Assessment

The mitigation measures from the submitted Ecological Impact Assessment prepared by JBA Consulting, dated 15th of August 2022, shall be implemented in full. REASON: To ensure the protection of biodiversity.

7. Permission Required for Class 1 & 3 Exemptions.

Notwithstanding the exempted development provisions of the Planning and Development Regulations, 2001 as amended, and any statutory provision replacing or amending them, no development falling within Class 1 or Class 3 of Schedule 2, Part 1 of those Regulations and any statutory provision replacing or amending them shall take place within the curtilage of the proposed development without a prior grant of planning permission.

REASON: In order to ensure that a reasonable amount of rear garden space is retained for the benefit of the occupants of the dwelling, compliance with Development Plan policy, and in order to protect the residential amenity of the area.

PR/1164/22

Record of Executive Business and Chief Executive's Order

8. Roads

- (a) Footpath and kerb shall be dished and widened, and the dropped crossing shall be constructed to the satisfaction of South Dublin County Council and at the applicant's expense. The footpath and kerb shall be dished and widened to the full width of the proposed widened driveway entrance.
- (b) Any gates shall open inwards and not out over the public domain.

REASON: In the interests of pedestrian and traffic safety.

9. Minimise Air Blown Dust.

During the construction and or demolition phase of the development, Best Practicable Means shall be employed to minimise air blown dust being emitted from the site. This shall include covering skips and slack-heaps, netting of scaffolding, daily washing down of pavements or other public areas, and any other precautions necessary to prevent dust nuisances. The applicant/developer shall comply with British Standard B.S. 5228 Noise Control on Construction and Open sites and British Standard B.S. 6187 Code of Practice for demolition.

REASON: In the interest of public health and to uphold the Council's policies set out in the South Dublin County Council Development Plan.

10. Construction Noise and Hours.

To control, limit and prevent the generation of unacceptable levels of Environmental Noise Pollution from occurring during construction activity, no Equipment or Machinery (to include pneumatic drills, on-site construction vehicles, generators, etc.) that could give rise to unacceptable levels of noise pollution as set out generally for evening and night-time in S.I. No. 140/2006 - Environmental Noise Regulations 2006 shall be operated on the site before 7.00 hours on weekdays and 9.00 hours on Saturdays nor after 19.00 hours on weekdays and 13.00 hours on Saturdays, nor at any time on Sundays, Bank Holidays or Public Holidays.

Any construction work outside these hours that could give rise to unacceptable levels of noise pollution shall only be permitted following a written request to the Planning Authority and the subsequent receipt of the written consent of the Planning Authority, having regard to the reasonable justification and circumstances and a commitment to minimise as far as practicable any unacceptable noise outside the hours stated above. In this respect, the applicant or developer shall also comply with BS 5228:2009 Noise and Vibration Control on Construction and Open Sites, and have regard to the World Health Organisation (WHO) – Guidelines for Community Noise (1999).

The applicant or developer shall also endeavour to engage in local consultation in respect of any noise sensitive location within 30 metres of the development as approved prior to construction activity commencing on site. Such noise sensitive locations should be provided with the following:

- Schedule of works to include approximate timeframes
- Name and contact details of contractor responsible for managing noise complaints
- Hours of operation- including any scheduled times for the use of equipment likely to be

PR/1164/22

Record of Executive Business and Chief Executive's Order

the source of significant noise.

REASON: In the interest of public health by the prevention of unacceptable levels of noise pollution which could interfere with normal sleep and rest patterns and/or when people could reasonably expect a level of quietness, the proper planning and sustainable development of the area and to uphold the Council's amenity policies set out in the South Dublin County Council Development Plan.

11. Financial Contribution.

The developer shall pay to the Planning Authority a financial contribution of €12,288.02 (Twelve thousand two hundred and eighty eight euros and two cents), in respect of public infrastructure and facilities benefiting development within the area of the Planning Authority, that is provided, or intended to be provided by or on behalf of the authority, in accordance with the terms of the Development Contribution Scheme 2021 - 2025, made under Section 48 of the Planning and Development Acts 2000-2011 (as amended). The contributions under the Scheme shall be payable prior to commencement of development or as otherwise agreed in writing by the Council. Contributions due in respect of permission for retention will become payable immediately on issue of the final grant of permission. Contributions shall be payable at the index adjusted rate pertaining to the year in which implementation of the planning permission is commenced.

REASON: The provision of such facilities will facilitate the proposed development. It is considered reasonable that the payment of a contribution be required, in respect of public infrastructure and facilities benefiting development in the area of the Planning Authority and that is provided, or that is intended will be provided, by or on behalf of the Local Authority.

NOTE RE: CONDITION - Please note that with effect from 1st January 2014, Irish Water is now the statutory body responsible for water services. Further details/clarification can be obtained from Irish Water at Tel. 01 6021000 or by emailing customerservice@water.ie.

12. House Number.

The number of the house shall be 6A, and this number shall be placed on the completed house prior to its occupation in a manner so as to be clearly legible from the public road. In the event that this number already exists no development shall take place under this permission until the applicant, owner or developer has lodged with the Planning Authority;

- (a) a street name and dwelling/unit number plan to resolve any possible conflict and,
- (b) this has been acknowledged as acceptable in writing by the Planning Authority. Following receipt of an acknowledgement of acceptability, the agreed number / name shall be placed on the completed house prior to occupation in a manner so as to be clearly legible from the public road.

The applicant is advised that the development number or name should

- (i) avoid any duplication within the county;
- (ii) reflect the local and historical context of the approved development;

PR/1164/22

Record of Executive Business and Chief Executive's Order

- (iii) comply with Development Plan policy, the guidelines on naming and numbering of the Department of the Environment, Heritage and Local Government,
- (iv) have regard to the Guidelines issued by the Place Names Commission (An Coimisiún Logainmneacha) and;
- (v) preferably make exclusive use of the Irish language.

The applicant, owner or developer is advised to consult with Naming and Numbering section of the Planning Authority in advance of lodging the required plan.

REASON: In the interests of the proper planning and sustainable development of the area and compliance with the Council's Development Plan.

13. Services & Drainage

- (a) Prior to the commencement of development the applicant/developer shall submit to the Planning Authority a revised Site Drainage Plan drawing showing the scale and dimensions of the setback distances of the house from the existing watermain and surface water sewer to the east of the site.
- (a) The water supply and drainage infrastructure, shall comply with the requirements of Irish Water.
- (b) There shall be complete separation of the foul and surface water drainage systems, both in respect of installation and use. All new precast surface water manholes shall have a minimum thickness surround of 150mm Concrete Class B.

REASON: In the interests of public health, the proper planning and sustainable development of the area and in order to ensure adequate water supply and drainage provision.

NOTE: The applicant is advised that under the provisions of Section 34 (13) of the Planning and Development Act 2000 (as amended) a person shall not be entitled solely by reason of a permission to carry out any development.

NOTE: The applicant or developer should ensure that all necessary measures shall be taken by the contractor to prevent the spillage or deposit of clay, rubble or other debris on adjoining roads during the course of the works and to ensure that any such instances arising are remedied immediately.

PR/1164/22

Record of Executive Business and Chief Executive's Order

NOTE: A Roads Opening Licence must be obtained from South Dublin County Council prior to the commencement of any works in the public domain in order to comply with the Roads Act 1993, Section 13, paragraph 10. Under this Act, non-compliance constitutes an offence.

NOTE: Notwithstanding any grant of planning permission; if an applicant requires permission to access local authority land (e.g. public footpaths, public open space or roadways) in order to access utilities, or for any other reason; please apply via https://maproadroadworkslicensing.ie/MRL/ for a licence from the Local Authority to carry out those works.
