PR/1217/22

Record of Executive Business and Chief Executive's Order

Reg. Reference: SD22B/0354 **Application Date:** 03-Aug-2022

Submission Type: New Application **Registration Date:** 03-Aug-2022

Correspondence Name and Address: Edward Fitzgerald Selby Architect 122, Butterfield Avenue, Rathfarnham, Dublin 14

Proposed Development: Two storey extension and single storey side extension to existing dwelling, comprising of 160sq.m to ground floor and 137sq.m to the first floor, accommodating additional bedrooms and living accommodation and granny flat; Finishes to be painted sand and cement render to walls and natural slate tiles to the roof.

Location: The Lugg, Saggart, Co. Dublin

Applicant Name: Elaine & Benji O'Reilly

Application Type: Permission

(NM)

Description of Site and Surroundings:

Site Area

Stated as 0.01898 Hectares.

Site Description

The application site is located in a predominately rural area in the Lugg, within close proximity to the Lugg Forest. The property is a detached, single storey dwelling with a pitched roof with an intersecting hip. The area is characterised by agricultural buildings and one-off houses.

Proposal:

The development will consist of:

- Two storey extension and single storey side extension to existing dwelling, comprising of 160sq.m to ground floor and 137sq.m to the first floor, accommodating additional bedrooms and living accommodation and granny flat.
- Finishes to be painted sand and cement render to walls and natural slate tiles to the roof.
- Total area of works 297sqm

Comhairle Chontae Atha Cliath Theas

PR/1217/22

Record of Executive Business and Chief Executive's Order

Zoning:

The site is subject to zoning objective 'HA-DM' - 'To protect and enhance the outstanding natural character of the Dublin Mountains Area.'

Consultations:

Irish Water - No report received at the time of writing.

Water Services – No report received at the time of writing.

Parks – No comment.

Heritage Officer – No report received at the time of writing.

Environmental Health Officer – Additional Information.

SEA Sensitivity Screening

Overlaps with Dublin Mountains High Amenity Layer.

Abuts Section 22 Landfills Layer.

Submissions/Observations /Representations

Cllr Shirely O'Hara supports the application and references Section 25.3 and 25.4 of CDP to be amended which suggests the applicant qualifies to develop residential accommodation at the site location.

The representation has been noted and reflected in this report.

Relevant Policy in South Dublin County Council Development Plan 2022 - 2028

Chapter 4 Green Infrastructure

Section 4.1 Methodology

GI1 Objective 4: To require development to incorporate GI as an integral part of the design and layout concept for all development in the County including but not restricted to residential, commercial and mixed use through the explicit identification of GI as part of a landscape plan, identifying environmental assets and including proposals which protect, manage and enhance GI resources providing links to local and countywide GI networks.

Section 4.2.1 Biodiversity

GI2 Objective 4: To integrate GI, and include areas to be managed for biodiversity, as an essential component of all new developments in accordance with the requirements set out in Chapter 12: Implementation and Monitoring and the policies and objectives of this chapter.

Section 4.2.2 Sustainable Water Management

Policy GI3: Sustainable Water Management

Protect and enhance the natural, historical, amenity and biodiversity value of the County's watercourses. Require the long-term management and protection of these watercourses as significant elements of the County's and Region's Green Infrastructure Network and liaise with relevant Prescribed Bodies where appropriate. Accommodate flood waters as far as possible during extreme flooding events and enhance biodiversity and amenity through the designation of riparian corridors and the application of appropriate restrictions to development within these corridors.

GI3 Objective 3: To promote and protect native riparian vegetation along all watercourses and ensure that a minimum 10m vegetated riparian buffer from the top of the riverbank is maintained / reinstated along all watercourses within any development site.

GI4 Objective 1: To limit surface water run-off from new developments through the use of Sustainable Drainage Systems (SuDS) using surface water and nature-based solutions and ensure that SuDS is integrated into all new development in the County and designed in accordance with

Comhairle Chontae Atha Cliath Theas

PR/1217/22

Record of Executive Business and Chief Executive's Order

South Dublin County Council's Sustainable Drainage Explanatory Design and Evaluation Guide, 2022.

Chapter 6

Section 6.8.2 Residential Extensions

Policy H14: Support the extension of existing dwellings subject to the protection of residential and visual amenities.

H14 Objective 1: To favourably consider proposals to extend existing dwellings subject to the protection of residential and visual amenities and compliance with the standards set out in Chapter 13 Implementation and Monitoring and the guidance set out in the South Dublin County Council House Extension Design Guide, 2010 (or any superseding guidelines).

6.8.3 Family Flats

Policy H15: Family Flats

Support family flat development subject to the protection of residential and visual amenities.

H15 Objective 1:

To favourably consider a family flat development where the Council is satisfied that there is a valid need for semi-independent accommodation for an immediate family member or members subject to the criteria outlined in Chapter 12: Implementation and Monitoring.

6.9.3 Rural Housing in HA – Dublin Mountains Zone

Policy H19: Rural Housing in HA – Dublin Mountains Zone

New or replacement dwellings within areas designated Zoning Objective 'HA-DM' (to protect and enhance the outstanding natural character of the Dublin Mountains Area) will only be considered in exceptional circumstances.

H19 Objective 1:

To consider new or replacement dwellings within areas designated with Zoning Objective 'HA-Dublin Mountains' (to protect and enhance the outstanding natural character of the Dublin Mountains Area) in the following exceptional circumstances where all of the criteria below are met:

- The applicant is a native of the area; and*
- The applicant can demonstrate a genuine need for housing in that particular area; and*
- The development is related directly to the area's amenity potential or to its use for agriculture, mountain or hill farming; and*
- The development would not prejudice the environmental capacity of the area, and that it would be in keeping with the character of the mountain area.*

Comhairle Chontae Atha Cliath Theas

PR/1217/22

Record of Executive Business and Chief Executive's Order

These criteria are in accordance with the Sustainable Rural Housing Guidelines (2005), having regard to the outstanding character of the area and the need to preserve the environmental and landscape quality of this area.

The above criteria to be considered alongside the need to sustain and renew established rural communities and to ensure the viability of amenity, including local schools and the need to accommodate genuine rural housing needs where they arise.

6.9.5 Replacement Rural Dwellings

Policy H21: Replacement Dwellings in Rural and High Amenity Areas Consider applications for replacement dwellings in rural and high amenity areas where there is a genuine need for refurbishment and / or replacement.

H21 Objective 1:

To favourably consider applications for replacement dwellings within areas designated with Zoning Objective 'RU' (to protect and improve Rural Amenity and to provide for the development of Agriculture), Zoning Objective 'HA – Dublin Mountains' (to protect and enhance the outstanding natural character of the Dublin Mountains Area), Zoning Objective 'HA – Liffey Valley' (to protect and enhance the outstanding character and amenity of the Liffey Valley) and Zoning Objective 'HA – Dodder Valley' (to protect and enhance the outstanding character and amenity of the Dodder Valley) where the Planning Authority is satisfied that all of the following are met:

- There is a genuine need for replacement or refurbishment of the structure; and*
- The roof, internal walls and external walls of the structure on site are substantially intact; and*
- The structure on site is a habitable dwelling and its use as a habitable dwelling has not been abandoned (for a period that exceeds 5 years); and*
- The structure on site is of limited value in terms of built heritage, character and visual amenity; and*
- The replacement dwelling would largely occupy the same footprint, scale and location of the dwelling to be replaced, save in exceptional circumstances where the Planning Authority agrees a more favourable position in the context of the development management criteria outlined under*

Chapter 12: Implementation and Monitoring.

6.9.6 Rural Dwelling Occupancy

Policy H22: Occupancy Condition

Conditions attached to the grants of permission for housing in Rural (RU), Dublin Mountain (HA-DM), Liffey Valley (HA-LV) and Dodder Valley (HA-DV) areas will include the stipulation that the house must be first occupied as a place of permanent residence by the applicant and / or by members of his / her immediate family, for a minimum period of seven years or such other longer period of time as is considered appropriate.

Comhairle Chontae Atha Cliath Theas

PR/1217/22

Record of Executive Business and Chief Executive's Order

6.9.7 Rural Housing and Extension Design

Policy H23: Rural Housing and Extension Design

Ensure that any new residential development in rural and high amenity areas, including houses and extensions are designed and sited to minimise visual impact on the character and visual setting of the surrounding landscape.

H23 Objective 1:

Ensure that all new rural housing and extensions within areas designated within Zoning Objectives Rural (RU), Dublin Mountain (HA-DM), Liffey Valley (HA-LV) and Dodder Valley (HA-DV);

- Is designed and sited to minimise impact on the landscape including views and prospects of natural beauty or interest or on the amenities of places and features of natural beauty or interest including natural and built heritage features; and*
- Will not have a negative impact on the environment including flora, fauna, soil, water (including ground water) and human beings; and*
- Is designed and sited to minimise impact on the site's natural contours and natural drainage features; and*
- Retains and reinstates (where in exceptional circumstance retention cannot be achieved) traditional roadside and field boundaries; and*
- Is designed and sited to circumvent the need for intrusive engineered solutions such as cut and filled platforms, embankments or retaining walls; and*
- Would comply with the EPA's Code of Practice for Domestic Wastewater Treatment Systems (Population Equivalent less than 10) 2021 except where planning permission was granted prior to 7th June 2021 in which case the EPAs Code of Practice Wastewater Treatment Systems Serving Single Houses 2009 applies; and*
- Would not create or exacerbate ribbon or haphazard forms of development.*

Record of Executive Business and Chief Executive's Order

Family Flats

- *The applicant shall be required to demonstrate that there is a genuine need for the family flat;*
- *The overall area of a family flat should not generally exceed 50% of the floor area of the existing dwelling house;*
- *The main entrance to the existing house shall be retained and the family flat shall be directly accessible from the front door of the main dwelling via an internal access door, and the design criteria for dwelling extensions will be applied;*
- *Any external doors permitted (to provide access to private / shared open space or for escape from fire) shall be limited to the side or rear of the house;*
- *Conditions may be attached to any grant of permission that the family flat cannot be sold, conveyed or leased separately from the main residence, and that when the need for the family flat no longer exists the dwelling must be returned to a single dwelling unit.*

Section 13.5.8 Residential Consolidation

Extensions

The design of residential extensions should have regard to the permitted pattern of development in the immediate area alongside the South Dublin County Council House Extension Guide (2010) or any superseding standards.

The design of residential extensions should accord with the South Dublin County Council House Extension Guide (2010) or any superseding standards.

Comhairle Chontae Atha Cliath Theas

PR/1217/22

Record of Executive Business and Chief Executive's Order

Assessment

The main issues for assessment are

- Zoning and Council policy,
- Residential and Visual amenity
- Drainage
- Parks
- Heritage
- EHO
- Green Infrastructure
- Appropriate Assessment
- Environmental Impact Assessment

Zoning

A development consisting of a part single storey, part two storey extension is 'Open for Consideration' under zoning objective 'HA-DM' – 'To protect and enhance the outstanding natural character of the Dublin Mountains Area.,' and as such would potentially be allowable subject to the relevant provisions in the County Development Plan **2022-2028**.

Council Policy

The proposed development consists of retaining approximately 117sqm of the existing 160sqm dwelling (demolishing 43sqm) and building a further 190sqm including a first-floor extension over the existing dwelling, a linear extension to the east of the existing dwelling and a family flat to the west of the existing dwelling.

Given the size and scale of the development, this can be considered a replacement dwelling and as such should conform to Policy H21 Objective 1:

Policy H21 Objective 1

- There is a genuine need for replacement or refurbishment of the structure; and

The applicant has confirmed that the property is currently used as the family home, and they have outgrown the current configuration and size of the current dwelling. The applicant has also confirmed that they require a family flat in order to home the applicant's father.

- The roof, internal walls and external walls of the structure on site are substantially intact; and

The applicant has confirmed that they are living at this address currently and the internal and external walls of the structure are intact.

- The structure on site is a habitable dwelling and its use as a habitable dwelling has not been abandoned (for a period that exceeds 5 years); and

As confirmed, the property has not been abandoned and is the current family home of the applicant.

Comhairle Chontae Atha Cliath Theas

PR/1217/22

Record of Executive Business and Chief Executive's Order

- The structure on site is of limited value in terms of built heritage, character and visual amenity; and

The property is a single storey, concrete rendered bungalow with no apparent built heritage or architectural heritage value.

- The replacement dwelling would largely occupy the same footprint, scale and location of the dwelling to be replaced, save in exceptional circumstances where the Planning Authority agrees a more favourable position in the context of the development management criteria outlined under Chapter 12: Implementation and Monitoring.

The proposed development occupies a large footprint of the existing dwelling but notwithstanding this, is substantially larger overall and as such, the applicant **does not fully conform with Policy H21 Objective 1 and Additional Information should be sought to address this.**

Policy H23 Objective 1

Furthermore, the application is required to conform with **Policy H23 Objective 1:**

Ensure that all new rural housing and extensions within areas designated within Zoning Objectives Rural (RU), Dublin Mountain (HA-DM), Liffey Valley (HA-LV) and Dodder Valley (HA-DV);

- Is designed and sited to minimise impact on the landscape including views and prospects of natural beauty or interest or on the amenities of places and features of natural beauty or interest including natural and built heritage features;

The proposed development requires a first-floor extension over an extended existing ground floor dwelling and the site gradient is such that this **would increase the impact on the landscape.** The existing ridge height is approximately 5.3m whereas the revised ridge height of the two-storey element would be approximately 8m. The applicant should provide revised drawings reducing the height, scale and massing of the proposed development, as **Additional Information.**

- Will not have a negative impact on the environment including flora, fauna, soil, water (including ground water) and human beings; and

The proposed development is substantial in the site context and the applicant should provide a revised landscape plan including replanting schedule by way of **Additional Information.**

- Is designed and sited to minimise impact on the site's natural contours and natural drainage features; and

The development mostly follows the line of the existing development with minor infilling required and is therefore **acceptable.**

- Retains and reinstates (where in exceptional circumstance retention cannot be achieved) traditional roadside and field boundaries; and

Comhairle Chontae Atha Cliath Theas

PR/1217/22

Record of Executive Business and Chief Executive's Order

There appears to be no requirement for a change in the boundary treatment, but this should be confirmed by way of **Additional Information**.

- Is designed and sited to circumvent the need for intrusive engineered solutions such as cut and filled platforms, embankments or retaining walls; and

There appears to be some filling required to facilitate the family flat to the west of the existing development but overall, this is considered **acceptable**.

- Would comply with the EPA's Code of Practice for Domestic Wastewater Treatment Systems (Population Equivalent less than 10) 2021 except where planning permission was granted prior to 7th June 2021 in which case the EPAs Code of Practice Wastewater Treatment Systems Serving Single Houses 2009 applies; and

No details of the proposed wastewater treatment facilities were included as part of the application and therefore, should be requested as **Additional Information**.

- Would not create or exacerbate ribbon or haphazard forms of development.

The proposed development is on an existing residential site.

Family Flats

- The applicant shall be required to demonstrate that there is a genuine need for the family flat;
The applicant has submitted a cover letter indicating that his father is incapable of independent living and as such, **a family flat is required**.

- The overall area of a family flat should not generally exceed 50% of the floor area of the existing dwelling house;

The family flat as submitted is less than 50% of the existing dwelling and is therefore **acceptable**.

- The main entrance to the existing house shall be retained and the family flat shall be directly accessible from the front door of the main dwelling via an internal access door, and the design criteria for dwelling extensions will be applied;

There is no direct internal door to the family flat from the existing dwelling and **Additional Information** should be sought indicating an internal access door to the main dwelling.

- Any external doors permitted (to provide access to private / shared open space or for escape from fire) shall be limited to the side or rear of the house;

The main access to the family flat is to the front of the property and this should be moved to the side or rear which should be demonstrated through **Additional Information**.

- Conditions may be attached to any grant of permission that the family flat cannot be sold, conveyed or leased separately from the main residence, and that when the need for the family flat no longer exists the dwelling must be returned to a single dwelling unit.

Comhairle Chontae Atha Cliath Theas

PR/1217/22

Record of Executive Business and Chief Executive's Order

This **condition** shall be attached in the event of a grant of permission.

Overall, Additional Information is required to address the issues relating to Policy H21 Objective 1, Policy H23 Objective 1 and Family Flats requirements as per the South Dublin County Development Plan 2022-2028.

Residential and Visual Amenity

Residential

The boundary of the application site abuts zoning area RU but is fully in zoning area HA-DM and therefore, this application shall be assessed accordingly. The property is located at the end of substandard single lane rural road close to the Lugg Forest which would not be an appropriate location for a new residential dwelling but is considered an acceptable location for an extension of an existing dwelling in this instance.

The proposed development requires a first-floor extension above a slightly extended ground floor footprint of the existing dwelling. This would not lead to any overshadowing or overlooking of the residential unit to the northeast which is approximately 32m from the proposed dwelling which is an acceptable distance. Notwithstanding this, the ridge height of the proposed first floor element would be approximately 8m which is not acceptable in the high amenity area and a revised design should be sought by way of **Additional Information**.

The amenity space is predominately located to the east (side) of the site rather than to the rear but given the size and relatively secluded nature of the application site this is considered **acceptable**.

The existing dwelling is a 5 bedroomed home, and the proposed development is for a 6 bedroomed dwelling with a separate family flat. The family flat requires **Additional Information** in order to comply with the requirements of the CDP.

The linear extension to the east measures approximately 112sqm. This is considered to be a poor quality design response, in the context of the existing dwelling and the applicant should revise the proposed development to provide a reduced footprint, and this should be sought by way of **Additional Information**.

Overall, the proposed development would be injurious to the visual amenities of the area, considering the high amenity zoning and therefore should be revised.

Visual

The material for the proposed exterior walls is cement render with a natural slate roof which is considered appropriate. The fenestration is also considered **acceptable**.

Comhairle Chontae Atha Cliath Theas

PR/1217/22

Record of Executive Business and Chief Executive's Order

The linear extension to the east of the main dwelling is positioned at an angle, thus not in keeping with the established building line. It is noted that due to the angled positioning of the extension, the roof is predominately fully hip pitched but there is a small flat roofed area between the main dwelling and the extension which would be visually jarring. The applicant should consider following the existing building line and establishing a roof similar to the proposed family flat and this should be sought by way of **additional information**.

The overall design of the development is not considered acceptable and should be revised by way of **Additional Information**.

Drainage

No report was received from Water Services. Irish Water maps indicate that the proposed development would not be located within an unacceptable distance of any existing Irish Water infrastructure. Given the nature and scale of the development, **Additional Information** should be sought regarding SuDS and the treatment of wastewater.

Parks

The Parks department had no comment on the proposed development. Notwithstanding this, it is considered appropriate that **Additional Information** is sought regarding the boundary treatments, any trees and hedgerow that are likely to be removed, a replanting schedule with indigenous species and a landscape plan.

Heritage

No report was received from the Heritage Officer at the time of writing. It is deemed appropriate that **Additional Information** as outlined throughout the report is sufficient.

EHO

The Environmental Health Officer requires **Additional Information**, and the following report was received:

Development Summary: The development proposes the demolition of an existing structure and the building of a new residential structure on this site. Effectively providing two separate domestic residences. The site is currently served by an old septic tank. No information was provided with this application indicating that the existing septic tank sewage treatment system had been examined for its suitability for this development. There are a number of neighbouring properties adjacent all of which presumably are on well supply for water.

Comhairle Chontae Atha Cliath Theas

PR/1217/22

Record of Executive Business and Chief Executive's Order

Decision:

Additional Information is required to properly assess this plan. Specifically:

2. A comprehensive map showing well locations and separation distances re. same. Detail in the form of a written report must also be provided indicating what (if any) sewage treatment provision was made for the new domestic residence proposed and if a new sewage treatment system has been considered.

It is considered appropriate that the **Additional Information** as sought by the EHO is requested from the applicant.

Green Infrastructure

The subject application provides for a substantial increase in the footprint of the subject house on a site in the High Amenity Dublin Mountain area. The site is located within a Primary GI Link 5 Camac River Corridor as identified in the Green Infrastructure Strategy Map (Figure 4.4 and fully detailed in Appendix 4 of the South Dublin County Development Plan 2022-2028).

Given the size, scale and nature of the proposed development, a full GI assessment for the proposed development is required.

Screening for Appropriate Assessment

The subject site is not located within nor within close proximity to a European site. The proposed development is located within the High Amenity Dublin Mountain area and comprises of a part ground floor, part first floor extension and family flat.

Having regard to:

- the small scale and domestic nature of the development,
- the location of the development in a serviced urban area, and
- the consequent absence of a pathway to the European site,

it is considered that the proposed development would not be likely to have a significant effect individually, or in-combination with other plans and projects, on the Natura 2000 network and appropriate assessment is not therefore required.

Environmental Impact Assessment (EIAR)

Having regard to the modest nature of the development, and the distance of the site from nearby sensitive receptors, there is no real likelihood of significant effects on the environment arising from the proposed development. The need for environmental impact assessment can, therefore, be excluded at preliminary examination and a screening determination is not required.

Comhairle Chontae Atha Cliath Theas

Record of Executive Business and Chief Executive's Order

Development Contributions

Planning Reference Number	SD22B/0354
Summary of permission granted & relevant notes:	Part ground floor, part first floor extension and family flat. Total area of works 297sqm.
Are any exemptions applicable?	No
If yes, please specify:	
Is development commercial or residential?	Residential
Standard rate applicable to development:	104.49
% Reduction to rate, if applicable (0% if N/A)	0
Rate applicable	€104.49
Area of Development (m2)	297
Amount of Floor area, if any, exempt (m2)	0
Total area to which development contribution applies (m2)	297
Total development contribution due	€31,033.53

Conclusion

Having regard to the provisions of the South Dublin County Council Development Plan and the overall design and scale of the development proposed it is considered that, additional information is required from the applicant to address the issues highlighted in this report.

Comhairle Chontae Atha Cliath Theas

PR/1217/22

Record of Executive Business and Chief Executive's Order

Recommendation

I recommend that **ADDITIONAL INFORMATION** be requested from the applicant with regard to the following:

1. The applicant does not comply with Policy H23, Objective 1 of the South Dublin County Development Plan 2022-2028 and should submit the following:
 - The proposed development is not designed and sited to minimise the impact on the landscape including the views and prospects of natural beauty or interest or on the amenities of places and features of natural beauty or interest including natural and built heritage features. The applicant should provide revised drawings including floor plans, site plans, elevations and cross sections reducing the height of the two storey element of the proposed development in order to preserve the visual amenities of HA-DM area.
 - The proposed development may have a negative impact on the environment including flora, fauna, soil, water (including ground water) and human beings. The applicant should provide a revised landscape plan including replanting schedule and a full Green Infrastructure assessment including any mitigating measures to address the potential negative impact on the environment.
 - The applicant should confirm that the proposed development 'retains and reinstates (where in exceptional circumstance retention cannot be achieved) traditional roadside and field boundaries'. The applicant should submit the intended boundary treatments that are required as part of the proposed development.
 - The applicant is required to 'comply with the EPA's Code of Practice for Domestic Wastewater Treatment Systems (Population Equivalent less than 10) 2021 except where planning permission was granted prior to 7th June 2021 in which case the EPA's Code of Practice Wastewater Treatment Systems Serving Single Houses 2009 applies'. The applicant should submit a comprehensive map showing well locations and separation distances re. same. Detail in the form of a written report must also be provided indicating what (if any) sewage treatment provision was made for the new domestic residence proposed and if a new sewage treatment system has been considered.
2. The proposed development does not comply with the South Dublin County Development Plan requirements regarding family flats and the applicant should submit the following:
 - The main entrance to the existing house shall be retained and the family flat shall be directly accessible from the front door of the main dwelling via an internal access door, and the design criteria for dwelling extensions will be applied;
There is no direct internal door to the family flat from the existing dwelling and the applicant should provide revised drawings including floor plans indicating an internal access door to the main dwelling.
 - Any external doors permitted (to provide access to private / shared open space or for

Comhairle Chontae Atha Cliath Theas

PR/1217/22

Record of Executive Business and Chief Executive's Order

escape from fire) shall be limited to the side or rear of the house;

The main access to the family flat is to the front of the property and this should be moved to the side or rear and the applicant should submit revised drawings including floor plans, site plans and elevations confirming this.

3. The proposed development is located in 'HA-DM' - 'To protect and enhance the outstanding natural character of the Dublin Mountains Area' and as such all development should align with this zoning objective. The proposed ground floor extension to the east is not considered acceptable and should incorporate the following alterations;
 - Reduced building footprint;
 - Omission of the angled relationship to the host property;
 - Redesign of the roof to omit the visually jarring flat roofed transition between the two storey and single storey elements of the proposed development. (It is noted that this design change may require amendments to bedroom 5)

The applicant should submit revised drawings including site plans, floor plans, elevations and cross sections demonstrating these amendments to the development

4. The applicant should submit a drawing in plan and cross sectional views clearly showing proposed Sustainable Drainage Systems (SuDS) features for the development, for the written agreement of the Planning Authority. The applicant should include SuDS (Sustainable urban Drainage Systems) features for the proposed development such as but not limited to the following:
 - Rain Gardens , Planter boxes with overflow connection to the public surface water sewer.
 - Permeable Paving
 - Grasscrete
 - Green Roofs,
 - Rain gardens
 - Swales
 - Permeable Paving
 - Grasscrete
 - Channel Rills
 - Planter Boxes water butts
 - Other such SuDS

The applicant should reference the SDCC Sustainable Drainage Explanatory Design & Evaluation Guide prior to submission.
