To Whom it may concern,

Ellie May has been attending The Irish Centre for Assessment Rehabilitation & Ergonomics (ICARE) from May 2016 to date.

She has Down's syndrome & Post Surgical Spinal Injury. Initially she was mobile only in a wheelchair, but with extensive rehabilitation & Medical intervention she is now able to walk with Assistance X 2people. She still requires her wheelchair & Walker to move around by herself.

Her parents are endeavouring to adjust her family home to "future proof" it so to speak for her needs as both she & they age. This would involve 2 downstairs bedrooms & bathrooms, a wheelchair accessible bedroom & a Wet Room for Ellie if the future need arises along with a room for rehabilitation to allow for the day to day exercise regime that is necessary to her future continued independent living. Also should the need arise for live in nursing care for Ellie.

They are hoping to complete this work while they are still young enough for both the disruption that building incurs & to allow the changes to become the "normal" routine before they become necessary. In this way they will be minimally disruptive to the family when the need arises.

If you have any further questions or concerns regarding Ellie's care please do not hesitate to contact me.

Best Regards,

Deirdre Cahill MISCP MCPOHE MCPP MCPPP
