

The design process has taken into consideration the SDCC Green Infrastructure Framework (GIF). The proposed development enhances the links between the GI corridors and Stepping Stones as shown in the plan with the addition of canopy coverage, linear native hedgerow and grassland habitat. This is occurring in an area where the GIF shows that the canopy coverage is lower than the SDCC average. This will improve biodiversity and provide a green corridor to the surrounding area.

In summary, the proposed development contributes to SDCC GI with:

- Total native trees: 15No.
- Total area of native enhanced grassland: 1075m<sup>2</sup>.
- Total length of native hedgerow: 582 m.
