PR/1373/22

Record of Executive Business and Chief Executive's Order

Reg. Reference:	SD22B/0236	Application Date:	26-May-2022
Submission Type:	Additional Information	Registration Date:	07-Oct-2022
Correspondence Name and Address:		Anthony and Helen Kelly An Dairdubh, 32, Lyons Road, Newcastle, Co. Dublin, D22 H589	
Proposed Development:		Extension to rear/side of existing dwelling comprising of kitchen, dining, living room. Utility room and entrance hall including all associated siteworks.	
Location:		An Dairdubh, 32, Ly Dublin, D22 H589	ons Road, Newcastle, Co.
Applicant Name:		Anthony and Helen H	Kelly
Application Type:		Permission	

(EW)

Site Area: Given as 0.76 Ha.

Description of Site and Surroundings:

<u>Site Description</u>: The site is located on Lyons Road, 100m east of the junction with the L6001 (Athgoe), and about 0.5km south-west of Newcastle Village. The site contains a semi-detached bungalow with front, back and side garden.

Proposal:

• Extension to rear/side of existing dwelling comprising of kitchen, dining, living room. Utility room and entrance hall including all associated siteworks.

Zoning:

The subject site is subject to zoning objective 'RU' - 'To protect and improve rural amenity and to provide for the development of agriculture'.

Submissions/Observations /Representations

None received.

Relevant Planning History

SD18A/0434 – Granted Permission for the relocation & installation of a new wastewater treatment system with polished filtered percolation area; decommissioning of existing septic tank and all associated works.

Conditions

1. Maintenance of Waste Water Treatment System.

A maintenance contract for the treatment system shall be entered into with the suppliers of the wastewater treatment system or with an appropriate maintenance firm, and such contract shall remain in place in perpetuity or until such treatment system is no longer required. In this regard, no development shall take place under this permission until the applicant, owner or developer has lodged with the Planning Authority:

(i) Documentary evidence of an agreement in perpetuity to maintain for the lifetime of the treatment system (i.e. for so long as it is required and in use) with the suppliers of the wastewater treatment system or with an appropriate alternative maintenance firm, along with;
(ii) A copy of the maintenance contract, written confirmation that this agreement accords with the requirements of the Council's Waste Enforcement and Licensing Section;
(iii) Evidence that (i) and (ii) above has been acknowledged in writing as acceptable by the Planning Authority.

<u>PR/1373/22</u>

Record of Executive Business and Chief Executive's Order

In addition, documentary evidence of maintenance reports shall be retained for presentation to the Council's Waste Enforcement and Licensing Section when requested. REASON: In the interest of public health and in order to ensure adequate drainage provision.

2. Wastewater Treatment System.

The Wastewater Treatment System shall be located as per site layout plan and installed in accordance with the relevant Irish Agrément Certificate, or The Environmental Protection Agency's Code of Practice: Wastewater Treatment Systems for Single Houses. REASON: In the interest of public health and in order to ensure adequate drainage provision.

3. Public Health.

(a) The pressurised percolation area is to include a pressurised filter of 75sqm in size.

(b) Only grey and foul water from the dwelling and garage are to enter the waste water treatment system. All stormwater is to be diverted to separate soak pits.

(c) The location and installation of the Wastewater treatment system and polishing filter must comply with the EPA code of practice 2009 and all manufacturer's specifications.

(d) The proposed polishing filter percolation area and packaged system must comply with all relevant set back distances as per the EPA Code of Practice: Wastewater Treatment and Disposal Systems Serving Single Houses (p.e ≤ 10) 2009, to include:

- (i) 3 metres from the site boundary
- (ii) 4 metres from any roads
- (iii) 10 metres from the percolation area for any dwelling
- (iv) 7 meters from the existing septic tank on-site.

(e) The system must be tested to ensure an even distribution across the percolation bed and to ensure a suitable pressure can be achieved through each flushing port before being covered. (f) The installation must be supervised by a suitably qualified person/contractor and a completion report must be prepared to include photographic evidence of the completion of works, for submission to the Planning Authority.

(g) The system must be de-sludged annually or in accordance with the manufacturer's instructions and serviced at least once a year by a suitably qualified person. REASON: In the interest of Public Health.

Relevant Enforcement History

None recorded for subject site

PR/1373/22

Record of Executive Business and Chief Executive's Order

Pre-Planning Consultation

The application site was the subject of Pre-Planning consultation (SDCC Ref. PP070/18) for an extension to side, incorporating single-storey hallway & 2-storey dormer extension, and modifications to wastewater & percolation units.

The applicant was advised at that stage to contact the Water Services Section in relation to the proposed new wastewater and percolation units, prior to the lodgement of an application. The site had not been the subject of an application for an extension of the existing dwelling to date.

Relevant Policy in South Dublin County Development Plan 2016-2022

Section 2.4.1 Residential Extensions

Policy H18 Residential Extensions

It is the policy of the Council to support the extension of existing dwellings subject to the protection of residential and visual amenities.

Policy H18 Objective 2:

To favourably consider proposals to extend existing dwellings subject to the protection of residential and visual amenities and compliance with the standards set out in Chapter 11 Implementation and the guidance set out in the South Dublin County Council House Extension Design Guide, 2010 (or any superseding guidelines).

Policy H27 Rural House and Extension Design

• It is policy of the Council to ensure that any new residential development in rural and high amenity areas, including houses and extensions are designed and sited to minimise visual impact on the character and visual setting of the surrounding landscape.

H27 Objective 1:

Ensure that all new rural housing and extensions within areas designated with Zoning Objective 'RU' (to protect and improve Rural Amenity and to provide for the development of Agriculture), Zoning Objective 'HA–DM' (to protect and enhance the outstanding natural character of the Dublin Mountains Area), Zoning Objective 'HA–LV' (to protect and enhance the outstanding character and amenity of the Liffey Valley) and Zoning Objective 'HA–DV' (to protect and enhance the outstanding character and amenity of the Dodder Valley):

- Is designed and sited to minimise impact on the landscape including views and prospects of natural beauty or interest or on the amenities of places and features of natural beauty or interest including natural and built heritage features; and
- Will not have a negative impact on the environment including flora, fauna, soil, water (including ground water) and human beings; and
- Is designed and sited to minimise impact on the site's natural contours and natural drainage features; and
- Retains and reinstates traditional roadside and field boundaries; and
- Is designed and sited to circumvent the need for intrusive engineered solutions such as cut and filled platforms, embankments or retaining walls; and
- Would comply with Code of Practice Wastewater Treatment Systems Serving Single Houses, EPA (2009) or other superseding standards; and
- Would not create or exacerbate ribbon or haphazard forms of development.

South Dublin County Council House Extension Design Guide, 2010

The House Extension design guide contains the following guidance on house extensions, including in particular side/ rear extensions and dormer windows:

Side extensions:

- Match or complement the style, materials and details of the main house unless there are good architectural reasons for doing otherwise. Where the style and materials do not seamlessly match the main house, it is best to recess a side extension by at least 50cm to mark the change.
- Do not include a flat roof to a prominent extension unless there is good design or an architectural reason for doing so.
- Do not incorporate blank gable walls where extensions face onto public footpaths and roads.
- Avoid the use of prominent parapet walls to the top of side extensions.

Rear Extensions:

- Match the shape and slope of the roof of the existing house, although flat roofed single storey extensions may be acceptable if not prominent from a nearby public road or area.
- Make sure enough rear garden is retained.

Quality Housing for Sustainable Communities: Best Practice Guidelines, Department of the Environment, Heritage and Local Government (2007).

The Planning System and Flood Risk Management: Guidelines for Planning Authorities, Department of the Environment, Heritage and Local Government (2009), as supplemented by 'Planning Circular 02/2014 Flood Risk Management', Department of the Environment, Community and Local Government (2014).

Appropriate Assessment of Plans and Projects in Ireland - Guidance for Planning Authorities DoEHLG (2009)

Assessment

The main issues for assessment are:

- Zoning and Council policy;
- Visual impact and residential amenity;
- Services and drainage;
- Environmental impact assessment;
- Appropriate assessment.

Zoning and Council Policy

The site is located in an area with zoning objective RU - '*To protect and improve rural amenity and to provide for the development of agriculture*' in the South Dublin County Development Plan 2016-2022.

The use class 'Residential' is listed as open for consideration under this zoning objective subject to accordance with Council policy for development in rural areas. The proposed development will be assessed in the context of its accordance with Council Policy, in particular, compliance with the South Dublin County Council House Extension Design Guide, 2010 and Policy H27.

Visual Impact and Residential Amenity

Policy H27

As the site is located within an area zoned as 'rural', the proposed extensions must meet the requirements of Policy H27 (objective 1), which is as follows:

PR/1373/22

Record of Executive Business and Chief Executive's Order

Policy H27 Objective 1:

- Is designed and sited to minimise impact on the landscape including views and prospects of natural beauty or interest or on the amenities of places and features of natural beauty or interest including natural and built heritage features; **and**
- Will not have a negative impact on the environment including flora, fauna, soil, water (including ground water) and human beings; **and**
- Is designed and sited to minimise impact on the site's natural contours and natural drainage features; **and**
- Retains and reinstates traditional roadside and field boundaries; and
- Is designed and sited to circumvent the need for intrusive engineered solutions such as cut and filled platforms, embankments or retaining walls; **and**
- Would comply with Code of Practice Wastewater Treatment Systems Serving Single Houses, EPA (2009) or other superseding standards; and
- Would not create or exacerbate ribbon or haphazard forms of development.

Rural Housing Policy

Main Side / Rear Extension

The proposed works are an extension to the existing side/rear of the semi-detached cottage-type dwelling. It is noted that the proposed structure is significantly large in context to the original dwelling, with the proposed side / rear extension adding circa 95 sq.m to the northwest of the existing 83.7 sq.m dwelling, hence the proposal is larger than the size of the existing residence.

The proposed single storey side / rear extension has a pitched roofed structure at matching height of the original dwelling with a (side) westerly projecting depth of 13.6m and projecting to the (rear) north by 8m in an inverted L shape. It is considered that the proposal will result in a visually unbalanced extension in context to its surroundings. The planning authority have concerns that the proposed extension would fail to appear subservient to the main dwelling and would not complement it. It is considered that the proposed development is an overdevelopment of the existing bungalow at an existing width of 13.6m. Having regard to the excessive mass and scale of the extension along the western side of the semi-detached dwelling.

It is considered that a single storey side extension and a single storey rear extension that is significantly reduced in depth could be accommodated on this site provided the size and scale issues are addressed. In this context the applicant is required to address this by **Additional Information**.

Furthermore, it is considered that the submitted drawings under '*existing site layout*' and *proposed site layout*' are inadequate. The planning authority note anomalies of the submitted drawings and the omission of specific details where the rear extension is not joined to the main

<u>PR/1373/22</u>

Record of Executive Business and Chief Executive's Order

dwelling. Accurate drawings are required for the planning authority to assess the said proposal fully. More detail is required with regard to site levels and contours and the impact on the existing landscape. Contiguous elevational drawings are also requested with regards to the proposed extension with all the existing structures on site. The drawings shall also be resubmitted with a reduced redesign to lessen the impact of this proposal with **Additional Information**.

Rural Extension

- Is designed and sited to minimise impact on the landscape including views and prospects of natural beauty or interest or on the amenities of places and features of natural beauty or interest including natural and built heritage features; and
- It is noted that there are mature trees and foliage surrounding the site and also that the proposed development would take place immediately to the northwest of the existing dwelling and would not result in any change in levels or increased overall height across the site. Given this, it is considered that the impact on landscape is acceptable.
- Will not have a negative impact on the environment including flora, fauna, soil, water (including ground water) and human beings; and *From the submitted drawings the applicant appears to retain existing trees and plants on the site and therefore will not have a negative impact on the environment including flora, fauna, soil on the existing site.*
- Is designed and sited to minimise impact on the site's natural contours and natural drainage features; and

Under SD18A/0434 – the applicant was granted permission (subject to Wastewater Treatment System conditions) for the relocation & installation of a new wastewater treatment system with polished filtered percolation area; decommissioning of existing septic tank and all associated works.

- Retains and reinstates traditional roadside and field boundaries; and *From the submitted drawings the applicant appears to retain existing and traditional roadside and field boundaries. The proposal does not affect the existing boundary.*
- Is designed and sited to circumvent the need for intrusive engineered solutions such as cut and filled platforms, embankments or retaining walls; and *It is deemed that the proposal will require intrusive engineered solutions such as cut and filled platforms, embankments. It is not apparent that these have been clearly labelled on the submitted drawings.*
- Would comply with Code of Practice Wastewater Treatment Systems Serving Single Houses, EPA (2009) or other superseding standards; and

the applicant was granted permission under SD18A/0434 (subject to specific Wastewater Treatment System conditions) for the relocation & installation of a new wastewater

<u>PR/1373/22</u>

Record of Executive Business and Chief Executive's Order

treatment system with polished filtered percolation area; decommissioning of existing septic tank and all associated works.

• Would not create or exacerbate ribbon or haphazard forms of development. *The proposed extension is* adding circa 95 sq.m to the northwest of the existing dwelling, almost doubling the size of the *existing detached cottage and built into the existing landscape, it is deemed it shall impact on the landscape and therefore create or exacerbate ribbon or haphazard forms of development and therefore is contrary to the proper planning and sustainable development of the area.*

While it appears, there is scope on this site to accommodate a bungalow extension it would have to be significantly redesigned and substantially reduce in size and scale. In this context it is not considered the proposal would have an acceptable impact on visual amenity. Given the above, it is not considered that the proposal meets the requirements of Policy H27.

Residential Amenity

Regarding residential amenity, the proposed dwelling would be a single-storey only and would not result in any adverse impacts on the amenity of the adjacent occupiers to the east. The dwelling is situated on a large plot, and a significant level of private amenity space would remain following the proposed development. It is considered the provision for a side rear extension could accommodate this site; however, significantly redesigned and substantially reduced in size and scale. The impact on residential amenities would be considered acceptable, subject to outlined changes.

Services and Drainage

In the absence of a Surface Water Drainage report, the following is noted under granted permission under SD18A/0434 (subject to specific Wastewater Treatment System conditions)

The existing three-bedroom house on the site is served by a septic tank located at the rear of the property. The cover letter and plans & particulars submitted with the application do not indicate the rationale or need for decommissioning the existing septic tank. The Site Suitability Assessment lodged with the application indicates that the proposed wastewater treatment system and pressurised percolation area would provide capacity for a household size of 7 persons.

The Site Suitability Assessment has mistakenly claimed that there are no wells or springs within 250m of the site. St. Finian's Holy Well, a protected structure, is located approximately 100m away from the site. The Environmental Health Officer has advised that the well would be unaffected by the proposed development.

Irish Water has indicated that they have no objection to the proposed development.

<u>PR/1373/22</u>

Record of Executive Business and Chief Executive's Order

Archaeology and Geology

The following is noted under SD18A/0434 regarding the SEA Sensitivity Screening

The application site is located in the Area of Archaeological Potential associated with Newcastle village recorded monument (RMP Ref. DU020 - 003).

The site is also located in a Geological Site of Protection associated with Newcastle Buried Channel, a deep buried channel in the carboniferous limestone bedrock, representing the site of a former Vauclusian Spring type cave (a large resurgence of groundwater from a cave).

Having regard to the above and the requirements of the Additional Information with the reduction of the proposal in size and scale, it is considered that there would be no adverse impacts on these issues.

Screening for Appropriate Assessment

The subject site is not located within nor within close proximity to a European site. The proposed development is located within a rural area and comprises of a side and rear extension. Having regard to:

- the scale and domestic nature of the development,
- the location of the development in a serviced rural area, and
- the consequent absence of a pathway to the European site,

it is considered that the proposed development would not be likely to have a significant effect individually, or in-combination with other plans and projects, on the Natura 2000 network and appropriate assessment is not therefore required.

Environmental Impact Assessment

Having regard to the modest nature of the development, and the distance of the site from nearby sensitive receptors, there is no real likelihood of significant effects on the environment arising from the proposed development. The need for environmental impact assessment can, therefore, be excluded at preliminary examination and a screening determination is not required.

Development Contributions

Side / Rear Extension: circa 95 sq.m. Assessable area: 55 sq.m

Building Use Type Proposed: Residential extension. *Floor Area:* circa 95 sq.m. *Land Type:* Brownfield/Urban Consolidation *Site Area:* 0.76 Ha.

<u>PR/1373/22</u>

Record of Executive Business and Chief Executive's Order

Conclusion

While it appears, there is scope on this site to accommodate a bungalow extension it would have to be significantly redesigned and substantially reduce in size and scale. In this context it is not considered the proposal would have an acceptable impact on visual amenity. Given the above, it is not considered that the proposal meets the requirements of Policy H27 it is deemed appropriate to request **Further Information** for a reduced design and clarity on the submitted drawings, site level and content of the entire site.

Recommendation

Further Information was requested on 20th July 2022 Further Information was received on 07th October 2022

Consultations:

Parks no comment.

Submissions/Observations

None received for this application.

The Further Information requested is as follows:

 The Planning Authority deem there is scope on this site to accommodate a bungalow extension, however it would have to be significantly redesigned and substantially reduced in size and scale. In its present context it is not considered the proposal would have an acceptable impact on visual amenity. Given the above, it is not considered that the proposal meets the requirements of Policy H27. The planning authority has concerns that the proposed extension would fail to appear subservient to the main dwelling and would not complement it. It is considered that the proposal is an overdevelopment of the existing semi-detached bungalow in size and scale at a current width of 13.6.m along the western side of this Rural site.

(i) the applicant is requested to provide a redesign with a significant reduction in scale and size to lessen the impact of the proposed extension and resubmit fully contiguous, elevational and sectional drawings.

2. The planning authority note anomalies in the submitted drawings and the omission of specific details where the rear extension is not joined to the main dwelling. It is considered that the submitted drawings under 'existing site layout' and proposed site layout' are inadequate. Accurate drawings are required for the planning authority to assess the said proposal fully with site levels and entire structures on site. The applicant is requested to submit revised drawings to address the following:

(i) site levels and contours and the impact of the proposal on the existing landscape.

PR/1373/22

Record of Executive Business and Chief Executive's Order

(ii) full contiguous/elevational/sectional drawings regarding the redesigned extension with all the existing structures on site.

Item 1

The Planning Authority deem there is scope on this site to accommodate a bungalow extension, however it would have to be significantly redesigned and substantially reduced in size and scale. In its present context it is not considered the proposal would have an acceptable impact on visual amenity. Given the above, it is not considered that the proposal meets the requirements of Policy H27. The planning authority has concerns that the proposed extension would fail to appear subservient to the main dwelling and would not complement it. It is considered that the proposal is an overdevelopment of the existing semi-detached bungalow in size and scale at a current width of 13.6.m along the western side of this Rural site.

(i) the applicant is requested to provide a redesign with a significant reduction in scale and size to lessen the impact of the proposed extension and resubmit fully contiguous, elevational and sectional drawings.

Assessment

The applicant has submitted a cover letter from *Alan and Helen Kelly on* the 06th of October 2022.

The applicant has redesigned and reduced the proposed extension in size and scale and has now re-oriented the (side) westerly projecting depth from 13.6m to 6.8m (width) and 8.6m (length) in a compact inverted L shape. In addition, the balanced overlap with the existing dwelling portrays the rear 4.4m projection is now only visible from the front of the property with a bay front that sits more cohesively in the overall rural site setting. The proposal is now considered acceptable and is deemed to be more proportionate in scale and size to the existing dwelling and the subject site.

The proposed single-storey side / rear extension with its pitched roofed structure at the matching height of the original dwelling and the use of cut stone cladding to merge the new extensions and existing dwelling is considered acceptable. The proposed extension would now appear subservient to the main dwelling and would complement the existing bungalow as a later addition with a contemporary architectural style. The overall proposal now sits in the landscape at ease and it is considered the proposal would have an acceptable impact on visual amenity. Given the redesign, it is considered that the proposal meets the requirements of Policy H27.

It is not considered the proposal would negatively impact the surrounding landscape or the visual amenity of the area and therefore is considered acceptable.

(i) the applicant has provided a redesign with a significant reduction in scale and size to lessen the impact of the proposed extension and has resubmitted fully contiguous, elevational and sectional drawings. Therefore, item 1 has now been addressed, which is now considered acceptable.

<u>PR/1373/22</u>

Record of Executive Business and Chief Executive's Order

Item 2

The planning authority note anomalies in the submitted drawings and the omission of specific details where the rear extension is not joined to the main dwelling. It is considered that the submitted drawings under 'existing site layout' and proposed site layout' are inadequate. Accurate drawings are required for the planning authority to assess the said proposal fully with site levels and entire structures on site. The applicant is requested to submit revised drawings to address the following:

(i) site levels and contours and the impact of the proposal on the existing landscape.

(ii) full contiguous/elevational/sectional drawings regarding the redesigned extension with all the existing structures on site.

Assessment

In response to the AI request, the applicant has submitted revised drawings titled:

- Existing: Elevations, Contiguous Elevations, Floor Plan, Site Plan with contours.
- <u>Proposed</u>: Elevations / Contiguous Elevations, Floor Plan, Site Plan including contours
- Sections: A-A / Section B-B / Section C-C
- Copy of standard details
- Photo montage illustrating the impact of design on Landscape.

The above drawings are now considered adequate for the planning authority to assess the said proposal fully with site levels and entire structures on site and therefore, item 2 (i)(ii) has now been addressed, which is now considered acceptable.

Green Infrastructure

The subject application provides for an increase in the footprint of the subject house within the boundary of this rural residential site. From the submitted drawings the applicant appears to retain existing and traditional roadside and field boundaries. The proposal does not affect the existing boundary hedging.

The site is not located within a Primary GI Corridor or Secondary GI Link as identified in the Green Infrastructure Strategy Map (Figure 4.4 and fully detailed in Appendix 4 of the South Dublin County Development Plan 2022-2028). A **condition** for surface water shall include for SuDS measures in the form of water butts.

Having regard to the extent of private amenity grassland retained, the scale of the footprint increases and the provision of SuDS measures, it is considered that the subject development has incorporated Green Infrastructure and will protect, manage and enhance the GI resources on the subject site. As such, the proposal is in accordance with GI1 Objective 4, GI14 Objective 1, GI12 Objective 4 and Section 12.4.2 of the South Dublin County Development Plan 2022 – 2028.'

<u>PR/1373/22</u>

Record of Executive Business and Chief Executive's Order

Services & Drainage

Regarding surface water drainage and flood risk, the Water Services have not submitted any further reports, however it is deemed that standard conditions can be obtained by **condition**.

Irish Water have not submitted a report however, the proposal and retained development shall not affect any new water connections and therefore standard Irish Water conditions shall apply.

<u>PR/1373/22</u>

Record of Executive Business and Chief Executive's Order

Conclusion

Having regard to the provisions of the South Dublin County Council Development Plan and the overall design and scale of the development proposed it is considered that, subject to the conditions set out below, the proposed development would not seriously injure the amenities of the area or of property in the vicinity and would, therefore, be in accordance with the proper planning and sustainable development of the area. It is considered that the proposed and retained extension would be in compliance with Council policy in relation to extensions to dwelling houses.

Recommendation

I recommend that a decision be made pursuant to the Planning & Development Act 2000, as amended, for the reasons set out in the First Schedule hereto, to Grant Permission for the said development in accordance with the said plans and particulars, subject to the condition(s) specified in the Second Schedule hereto, the reasons for the imposition of the said condition(s) being as set out in the said Second Schedule.

FIRST SCHEDULE

It is considered that the proposed development accords with the policies and objectives of South Dublin County Council, as set out in the South Dublin County Council Development Plan 2022 - 2028 and subject to the conditions set out hereunder in the Second Schedule is hereby in accordance with the proper planning and sustainable development of the area.

SECOND SCHEDULE

Conditions and Reasons

 Development to be in accordance with submitted plans and details. The development shall be carried out and completed in its entirety in accordance with the plans, particulars and specifications lodged with the application, and as amended by Further Information received on 07/10/2022, save as may be required by the other conditions attached hereto.

REASON: To ensure that the development shall be in accordance with the permission, and that effective control be maintained.

2. (a) External Finishes.

All external finishes shall harmonise in colour or texture that is complementary to the house or its context.

REASON: In the interest of visual amenity.

(b) Restriction on Use.

The house and the proposed extension shall be jointly used as a single dwelling unit for residential purposes and shall not be sub-divided or used for any commercial purposes, and the extension shall not be sold, let (including short-term letting), leased or otherwise

<u>PR/1373/22</u>

Record of Executive Business and Chief Executive's Order

transferred or conveyed, by way of sale, letting or otherwise save as part of the single dwelling unit.

REASON: To prevent unauthorised development.

(c) Drainage - Irish Water.

(i) The water supply and drainage infrastructure, shall comply with the requirements of Irish Water.

(ii) There shall be complete separation of the foul and surface water drainage systems, both in respect of installation and use.

(iii) All drainage works for this development shall comply fully with the Greater Dublin Regional Code of Practice for Drainage Works.

REASON: In the interests of public health, the proper planning and sustainable development of the area and in order to ensure adequate water supply and drainage provision.

(d) Minimise Air Blown Dust.

During the construction and or demolition phase of the development, Best Practicable Means shall be employed to minimise air blown dust being emitted from the site. This shall include covering skips and slack-heaps, netting of scaffolding, daily washing down of pavements or other public areas, and any other precautions necessary to prevent dust nuisances. The applicant/developer shall comply with British Standard B.S. 5228 Noise Control on Construction and Open sites and British Standard B.S. 6187 Code of Practice for demolition.

REASON: In the interest of public health and to uphold the Council's policies set out in the South Dublin County Council Development Plan.

(e) Construction Noise and Hours.

To control, limit and prevent the generation of unacceptable levels of Environmental Noise Pollution from occurring during construction activity, Equipment or Machinery (to include pneumatic drills, on-site construction vehicles, generators, etc.) that could give rise to unacceptable levels of noise pollution as set out generally for evening and night-time in S.I. No. 140/2006 - Environmental Noise Regulations 2006 shall only be operated on the site between 7.00 hours and 19.00 hours weekdays and between 9.00 hours and 13.00 hours on Saturdays. No works shall take place at any time on Sundays, Bank Holidays or Public Holidays.

Any construction work outside these hours that could give rise to unacceptable levels of noise pollution shall only be permitted following a written request to the Planning Authority and the subsequent receipt of the written consent of the Planning Authority, having regard to the reasonable justification and circumstances and a commitment to minimise as far as practicable any unacceptable noise outside the hours stated above. In this respect, the applicant or developer shall also comply with BS 5228:2009 Noise and Vibration Control on Construction and Open Sites, and have regard to the World Health Organisation (WHO) – Guidelines for Community Noise (1999).

The applicant or developer shall also endeavour to engage in local consultation in respect

<u>PR/1373/22</u>

Record of Executive Business and Chief Executive's Order

of any noise sensitive location within 30 metres of the development as approved prior to construction activity commencing on site. Such noise sensitive locations should be provided with the following:

- Schedule of works to include approximate timeframes

- Name and contact details of contractor responsible for managing noise complaints

- Hours of operation- including any scheduled times for the use of equipment likely to be the source of significant noise.

REASON: In the interest of public health by the prevention of unacceptable levels of noise pollution which could interfere with normal sleep and rest patterns and/or when people could reasonably expect a level of quietness, the proper planning and sustainable development of the area and to uphold the Council's amenity policies set out in the South Dublin County Council Development Plan.

3. Drainage - Surface Water.

(a) The disposal of surface water, shall fully comply with all of the technical requirements of the Council's Water Services Section.

(b) Include water butts as part of SuDS (Sustainable Drainage Systems) features for the proposed development.

(c) There shall be complete separation of the foul and surface water drainage systems, both in respect of installation and use.

(d) All drainage works for this development shall comply fully with the Greater Dublin Regional Code of Practice for Drainage Works.

REASON: In the interests of public health, safety, the proper planning and sustainable development of the area and in order to ensure adequate and appropriate surface water drainage provision.

4. Financial Contribution.

The developer shall pay to the Planning Authority a financial contribution of €1,930.98 (One thousand nine hundred and thirty euro's and ninty eight cent), in respect of public infrastructure and facilities benefiting development within the area of the Planning Authority, that is provided, or intended to be provided by or on behalf of the authority, in accordance with the terms of the Development Contribution Scheme 2021 - 2025, made under Section 48 of the Planning and Development Acts 2000-2011 (as amended). The contributions under the Scheme shall be payable prior to commencement of development or as otherwise agreed in writing by the Council. Contributions due in respect of permission for retention will become payable immediately on issue of the final grant of permission. Contributions shall be payable at the index adjusted rate pertaining to the year in which implementation of the planning permission is commenced.

REASON: The provision of such facilities will facilitate the proposed development. It is considered reasonable that the payment of a contribution be required, in respect of public infrastructure and facilities benefiting development in the area of the Planning Authority and that is provided, or that is intended will be provided, by or on behalf of the Local Authority.
