7th November 2022

Dear Sir/Madam,

I, Andrew Dunne write in relation to planning application number **SD22A/0382** made by Jogor Point Ltd with regard to lands adjacent to Foxhunter, Ballydowd, Lucan, Co Dublin, as submitted on October 6th, 2022.

I have paid the prescribed fee of €20 and my receipt number is T4/0/722540 (attached).

I wish to object to the proposed development. My objection is based on the following observations and grounds:

1. The scale of development is significantly overscaled and out of character with the surrounding area. The average height of a typical 2-storey house in Ireland (such as those found in Hermitage Park) is between 4.7m and 5.8m. The proposed development reaches a height of 13.575m which is more than double the height of the residential houses in Hermitage Park.
2. There will be a significant loss of residential amenity to all surrounding properties in the vicinity of the development. This will result from the negative visual impact associated with the development, the loss of privacy resulting from, loss of light, overshadowing and an overbearing impact arising from the proposed structure.
3. The proposed development by virtue of the bulk mass, height, scale, design and physical dominance would result in an intense overdevelopment of the site, would be seriously injurious to the visual amenity of the area and to the amenities of the properties in the vicinity.
4. A pedestrian entrance through Hermitage Gardens will remove existing amenity to residents of Hermitage Gardens and Hermitage Park affecting security and increasing the probability of anti-social behaviour. Such anti-social behaviour occurred previously when the Foxhunter pub was in operation with many people scaling the boundary wall to use Hermitage Park as a short-cut. Based on past history, it is reasonable to assume that anti-social behaviour will likely be encouraged by the proposed pedestrian entrance.
5. The proposed pedestrian entrance is wholly unnecessary and unsolicited. The presence of a public walkway through an industrial area merely to gain access to another of the applicants premises is highly unusual and potentially problematic.

6. There are insufficient occupant details provided in the application which means it is difficult to understand the plans and the extent of the possible disruption. The supporting Planning Report notes that the proposed use would be a 'logistical warehouse' and the Transportation Assessment noting that the proposed use would be a distribution warehouse. This use is not listed as permissible or open for consideration within the RW zoning designation.
7. A logistics unit would also generate more traffic than a warehouse / storage facility so the lack of detail would have subsequent traffic impacts.
8. New developments should contribute positively to the character, appearance, environment, services and infrastructure of the wider surrounding area and their established communities and should be suitable in terms of height and scale. It should have a positive impact on the local character and improve infrastructure and services and not create further problems. However, this proposed development fails to achieve this due to its immense height, scale, design and density and obvious negative impacts and pressures it will have on residents, infrastructure, environment and services.

I would be grateful if you would consider the above in your assessment of the planning application.

Yours sincerely
