Liffey Valley Corridor

River Liffey

Griffen-Grand Canal Link

Griffen River

Context Map

The site is within the Liffey Valley primary corridor, and part of the Griffen-Grand Canal Link.

Inset Map

The site is in a built-up area between the River Liffey primary green corridor and the Griffen-Grand Canal secondary link. By incorporating planting as outlined in the Landscape Masterplan, it can act as a 'stepping stone' between the two corridors.

The existing site contains a derelict building and overgrown vegetation. The site contains no trees of note, and contains shrub species and minor spots of the invasive species Buddleia. These are to be removed as part of the proposed development, and will be replaced by proposed trees and shrubs, and pollinator-friendly planting.

Green Infrastructure Plan - 'Hillview', Lucan

- Site boundary
 - Rivers
 - Primary GI corridor
 - Secondary GI Link (context map only)
 - Green open spaces
- Landscape Masterplan (inset map only)**
- Grass
 - Ground planting
 - Raised planting
 - Permeable paving
 - Trees
