LEGEND

Existing Trees		
To be retained and protected during construction		
Proposed Trees, Multi-stem Trees and Shrubs Planting - 41 no. Total		
Tree planting throughout the scheme has been selected to blend the development in to its surrounding environs and create focal points within the development. The tree species selected will maximize food and nectar sources for birds and invertebrates. Trees will be planted as Standard and Heavy Standard to provide a reasonable degree of instant maturity to the development. All trees shall be planted between the months of Nov and March. The trees shall be purchased from a reputable nursery as rootball specimens and final order to be agreed by Landscape Architect; The trees shall be planted on delivery. If this is not possible due to weather conditions (wet or frosty), the plants must be heated in. Maintenance Watering is essential during the first 2 growing seasons regardless of the weather conditions - 1000L / Tree / Month
