

Senior Planner,
South Dublin County Council.

30th November 2022

Dear Sir Madam,

Reg. Ref: SD21A/0327/C6

Our Project Number: 22085

Condition 6 (a): Street Lighting

In response to Condition 6 (a), I am happy to confirm that we have considered ecologically sensitive receptors while undertaking the lighting design, as we do on all our projects.

Section 3.4 in our lighting design report, submitted as part of our design package, mentions the steps we take to ensure that the impact of the proposed lighting is minimised as far as practicable, while still complying with European Standards, South Dublin County Council's lighting specifications, and guidance documents from the *Institution of Lighting Professionals* and the *Society of Light and Lighting*.

As an accredited member of both professional bodies, we endeavour to follow all their guidance and follow their relevant codes of conduct.

We would be happy to address any specific concerns you may have regarding the proposed lighting, likewise if there is any further information that you may require.

Yours sincerely,

Patrick Redmond *IEng MILP MSL*

Managing Director.
