South Dublin County Council

15th September 2021

Dear Sir/Madam

Re: Proposed Development at Block 4 Aerodrome Business Park

C

It directly responds to the request for a Tree and Hedgerow Survey, Tree and Hedgerow retention protection plan, Tree and Hedgerow constraints plan, and Arboricultural Implication Assessment", that's the wording the council used in their RFI.

1
(a)

Nature of Existing Trees on Site

Following a site visit on the 6th of April 2023 to the below site Figure 1. The first key point to note is that the subject site contains no trees and all trees and or other vegetation. There are a few self-seed Buddleia bushes along the perimeter other than that the site is a brown field site consisting of no vegetation. Therefore any development will not result in any vegetation loss and it is an opportunity to plant site appropriate native trees that will enhance the arboreal footprint of the site and improve the local biodiversity.

Yours sincerely

Michael Garry,

Arbor Care, Professional Consulting Tree Service
