

**LEGEND**

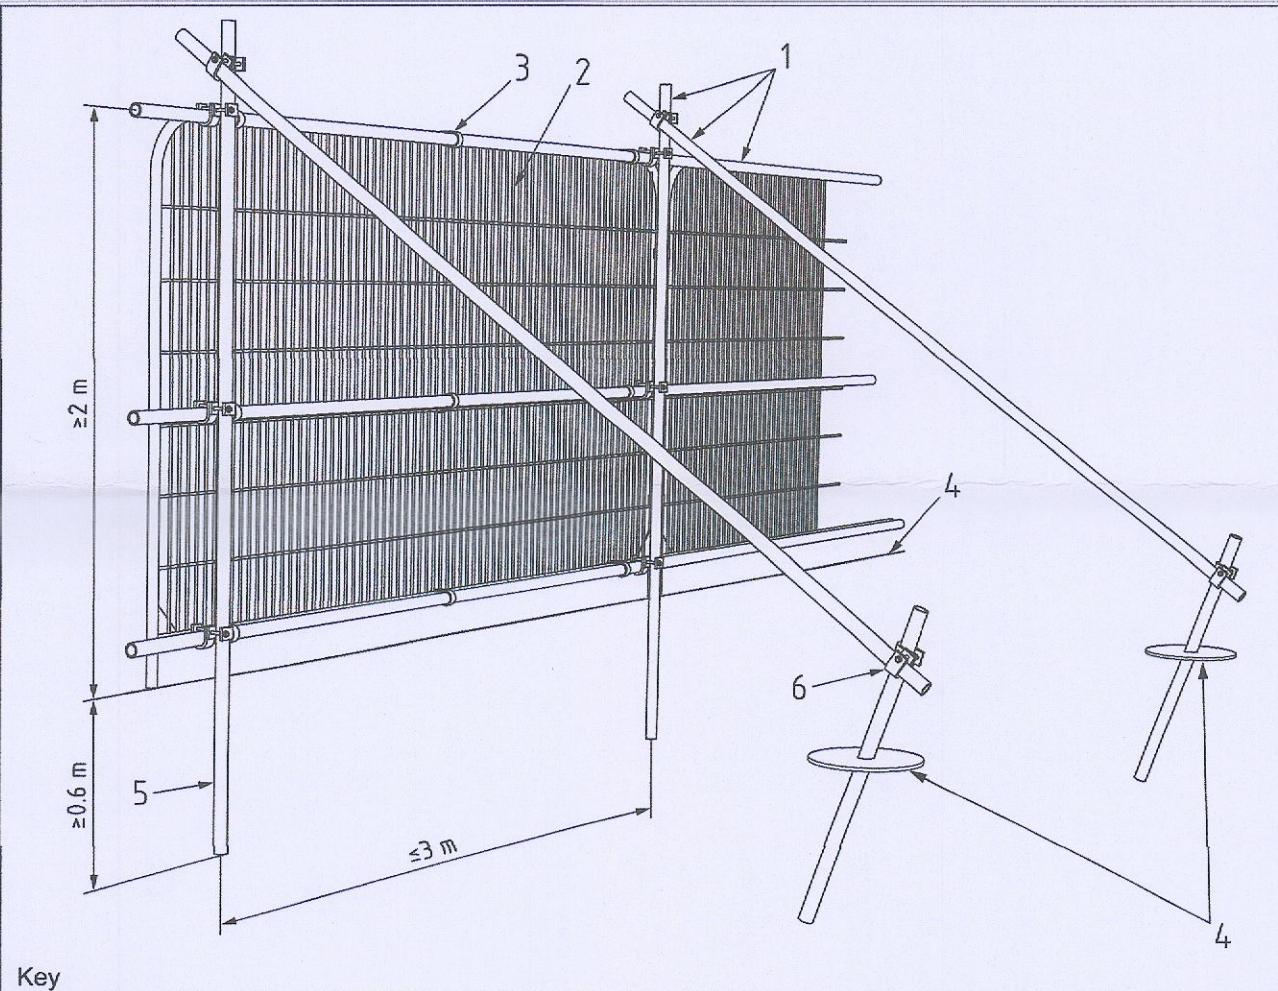

**TREE PROTECTION**

- TREES TO BE RETAINED
- CONSTRUCTION EXCLUSION ZONE
- TREE PROTECTION FENCING
- TREE SURVEY BOUNDARY

Drawing to be interpreted with reference to the Tree Protection Strategy & Method Statement report.

Note that general fencing type A to be used in all instances where space allows. Type B (trunk protection) to be used where space does not allow type A e.g. areas where paving is to be removed in close proximity to trees.

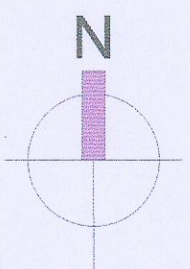

Where roots are exposed following paving removal or other works these areas are to be covered in damp hessian to reduce transpiration from roots and moisture loss from soil.
