Dear Rosaleen,

Please find attached an archaeological impact assessment report which was carried out in response to a request for further information for a residential planning application at Adamstown, Clonburris, Co. Dublin (Planning Reg.: SDZ23A/0004). The report is informed by a geophysical survey and a programme of test trenching carried out under licence from the National Monuments Service of the Dept. of Housing, Local Government and Heritage.

Kind regards,
Maeve
