

General Notes:

1. All details indicated on this drawing are for guidance only and are to be developed, verified and co-ordinated by the Contractor.
2. This drawing is intended to be viewed in colour.
3. Do not scale from this drawing.
4. The Contractor shall verify all dimensions on site.
5. For details of setting out dimensions, refer to the Architect's drawings.
6. Equipment and fitting substitutes will not be permitted without the written approval of the Engineer.
7. Workshop drawings are the responsibility of the Contractor. Axiseng drawings are to be used as reference on site.
8. This drawing is to be read in conjunction with all other relevant information from the specifications, schedules, schematics and design packages from other Design Team members.
9. Should any discrepancy be apparent in this drawing, the Engineer shall be made aware of this for further action.
10. The exact location of all plant equipment and penetrations are the responsibility of the Contractor, who shall co-ordinate the installation with all other trades.
11. The Contractor shall be responsible for the design, supply and installation of supports, bracketing systems and secondary steelwork supports required for this works package, unless otherwise stated.
12. Final co-ordination with the existing services and structure are the responsibility of the Contractor.
13. The Contractor is to ensure that all existing services are identified, with locations and invert levels reported to the Engineer prior to the commencement of works.
14. The Contractor shall identify any 'live' service which is to be retained and protected during the construction works.
15. The Contractor is responsible for the builder's works dimensioning and setting out for all penetrations through the building structure. The Contractor shall submit builder's work details for review prior to their installation, which shall be arranged in consultation with all other trades.
